

Asset Security and Compliance Monitoring

Data Sources

- 1 Data from sources of truth is transferred per source recommendation schedule. IP
- 2 Data is aggregated, parsed, and made available on SQL Server. Data is also classified by customer metrics and enriched as needed. IP
- 3 Once in SQL Server, Power BI reports provide insights into the data. IP
- 4 Users view and interact with the data via Power BI Reports. Reports are embedded in custom web apps or accessed directly. IP
- 5 *Alerts are created based on customer specific criteria and alerting levels. IP
