

About eComFAX®

eComFAX® is a cloud-based service that allows to send and receive Faxes, SMSes and other advanced messages from any device by using only an email or a web browser.

Key Benefits

- **Efficiency:**
Send and receive fax with only an Internet connection.
- **Cost reduction:**
No need for communication lines, toner, paper, or unnecessary hardware costs.
- **Mobility:**
Use your smartphone to fax on the go.
- **Fax number:**
Get a personal Fax number in 8000+ cities worldwide, or keep your current one.
- **Global scope:**
Simplify your international Fax Network using a single and unique provider.

Cloud-First

- Progressive cloud technology that eliminates the need for heavy local infrastructure.
- UCaaS-enabled. Connect your Microsoft Teams or Cisco Webex to your network and fax- and SMS-enable them by allowing eComFAX® integration to communicate in an easy and secure way.
- Location flexibility and a true International Fax Network: send and receive faxes from anywhere in the world and reduce complexity by having a single and unique provider for all you fax and advanced messaging needs.
- Scalability: scalable cloud capacity under the Pay-Per-Use model (SaaS).

Security and Compliance

Compliant with the strictest security standards like PCI-DSS and regulations like Dodd-Frank Act and HIPAA in the US and MiFID II or GDPR with in the EU, among other directives that require the encryption, privacy, and traceability of various types of communications.

Fax Smoothly

- **Send/Receive** faxes and other advanced messages from any device with internet access.
- **Reduce complexity** by eliminating dedicated analogue lines, fax machines, ATA Terminals, Voice Gateways, and network electronics.
- **High efficient:** eliminate protocol issues, transmission errors, and illegible faxes.

Maximum Flexibility

- Keep your number, or select a new one from our database.
- Multiple formats: Microsoft Office, TXT, PDF, TIF, JPEG, HTML, PNG, and others.
- With searchable PDF reception.
- Confirmation of delivery via email or SMS.
