MODERNIZE BUSINESS APPLICATIONS

Transform outdated systems into secure, scalable, cloud-native solutions.

Concurrency

Overview

Concurrency helps organizations modernize their business application platforms by replacing legacy tools with modern solutions built on Microsoft Azure, Dataverse, and Power Platform. **Our approach enables faster innovation, simplified governance, and long-term sustainability** across your application portfolio.

Why Choose Concurrency?

Proven Modernization Expertise across industries using Microsoft technologies

Trusted Microsoft Partner for Azure, Power Platform, and enterprise delivery

Structured, Agile Approach aligned to Microsoft's Well-Architected Framework

Low-Code CoE Enablement to scale app development across your organization

Ready to modernize?
Contact Concurrency to get started on replacing legacy systems and empowering your teams with modern, cloud-based applications.

Are Legacy Applications Holding You Back?

Disconnected systems slowing down processes

Limited scalability and poor cloud integration

Slow development cycles & growing IT backlog

High costs & risks of legacy platforms

What's Included in the Engagement

1

Assessment & Prioritization
Evaluate current app environment, identify modernization candidates, and select target use cases with a structured backlog.
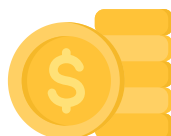

2

Aligned Development
Build solutions iteratively using Azure, Dataverse, and Power Platform, aligned with CoE and Azure Landing Zone best practices.

3

Collaborative Delivery
Conduct sprint reviews with stakeholders and finalize capabilities that meet business goals.
