Concurrency Business App

Description

We build end-to-end business applications based on the Power Platform and Dataverse aligned to delivering concrete business process optimization.

Who we Help

- VP of Development or CIO

Problem We are Solving

- Build a refactored or ground-up business application
- Iterate associated with business value to customer
- Usually serving an internal vs. external business purpose

Outcome of Offering

- Business Application (either in Cloud Native platform or Power Platform) that serves a direct business purpose
- Business value being delivered and measured internally or externally

Why Us:

- Understanding of internal business applications and aligning to driving value with successive iterations
- 1 of 3 partners in the App Innovation and now Business Value Accelerator with Microsoft

Cost, Resource, Time

- $250k - $4m
- 3 – 12 months
- Architect, Engineer(s), SCRUM master

Next Step:

- Next Project: Connect App (next sprints)
- Next Project #2: Digital Ops
- Adjacent Project: App Modernization
