

Cloud DevOps Offering

Description

We work with combined cloud and application development teams to build out automated release pipelines for cloud applications using GitHub Enterprise and Azure DevOps

Who we Help

- CIO / Vice President of Infrastructure / Application VP

Problem We are Solving

- Automation of application deployment
- Infrastructure-as-code conversion
- DevOps best practices for the cloud

Outcome of Offering

- Identified applications automated for deployment
- Best practices associated for DevOps
- "Walk with Them" as practices are deployed

Why Us:

- Extremely difficult to find people
- Building scale with commoditization of tasks
- Teach a person to fish

Cost, Resource, Time

- \$120k - \$2m
- 3 – 9 months
- Often sold "staff aug", try to convert to team

Next Step:

- Next Project: Landing Zone & Governance
- Next Project #2: Digital Ops
- Adjacent Project: App Modernization
