

AI ENABLED DOCUMENT PROCESSING WORKFLOWS

Concurrency helps organizations automate document processing to reduce errors and accelerate workflows.

Overview

Concurrency helps organizations eliminate manual document processing by integrating Microsoft's AI and App platforms. Using Azure AI Document Intelligence, we automate extraction, comparison, and classification of documents like invoices, POs, and remittances—analyzing unstructured data, identifying discrepancies, and delivering actionable outputs to accelerate workflows and reduce errors.

Why Choose Concurrency?

Proven Microsoft AI Expertise:

Successful delivery across Azure AI, OpenAI, and Power Platform.

Real-World Success: Real PoC-to-Production wins

End-to-End Solutions:

Seamlessly integrate AI models, RPA, and low-code workflows for measurable impact.

Ready to transform how your organization handles documents?

Contact Concurrency today and take the first step toward faster, smarter workflows.

Partner with us to overcome these challenges:

Manual Matching:

Slow, error-prone reconciliation of invoices, POs, and sales documents.

Inconsistent Formats:

Challenges with varied layouts, incomplete fields, and unstructured data.

No Scalability:

Inability to process and validate high volumes across systems.

Inefficient Processes:

Too much time spent on data entry and exception handling.

What You Get:

- ✓ AI-powered matching logic across 2+ document types
- ✓ Dashboard/report highlighting mismatches, errors, and metadata
- ✓ Documentation of architecture, models, and deployment steps
- ✓ Recommendations for productionization and scale

Typical Investment:
\$50–150k

Timeline:
4–12 weeks
