

ZERO TRUST SECURITY ASSESSMENT

Concurrency helps IT and security leaders unify identity, device, and data protection while strengthening their overall security posture.

Concurrency

Overview

Concurrency helps organizations strengthen their security posture by aligning identity, device, and data protection under a **unified Zero Trust strategy**. Our targeted assessment identifies gaps, delivers a maturity scorecard, and provides a practical roadmap for reducing risk and improving compliance. We empower IT and security leaders with clear next steps to advance their Zero Trust journey with speed and confidence.

Why Choose Concurrency?

Proven Expertise: 35+ years helping organizations modernize security using Microsoft's cloud-native Zero Trust tools and frameworks.

Holistic Protection: Secure identities, devices, and data with an integrated, layered approach that reduces vulnerabilities and attack surfaces.

Actionable Roadmap: Gain a clear, prioritized path to Zero Trust maturity with quick wins and long-term strategies aligned to your business goals.

Partner with us to overcome these challenges:

Siloed Security Practices

Limited Visibility & Control:

Increased Risk Exposure

Unclear Next Steps

Resource Constraints

Inefficient Compliance Management
