

PROOF OF CONCEPT

Entra ID

*protecting organisations, **connecting people***

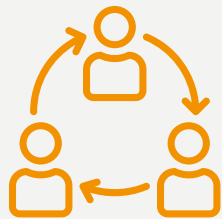

Protecting organisations, connecting people.

Integrated workplace IAM solutions that drive growth, reduce friction, and improve security.

Entra ID: solving common business challenges

Without proper monitoring and auditing, it's hard to prove compliance or detect identity-related threats early.

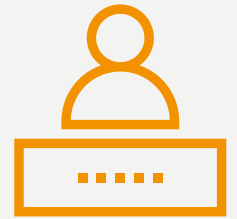

Manual onboarding and offboarding causes delays and security gaps.

Legacy systems struggle to apply consistent access policies across devices, networks, and work locations.

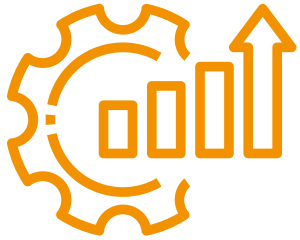

Granting external users access to internal resources without compromising security is often time-consuming and risky.

Multiple logins across apps, leads to poor user experience, productivity loss, and increased risk of password reuse and breaches.

Microsoft Entra ID

Manage and Protect

Boost Productivity

Reduce IT overhead and improve productivity by automating identity lifecycle and access workflows.

Strengthen Security

Reduce the risk of breaches and phishing attacks while improving compliance with data protection regulations like GDPR or HIPAA.

Secure & Scale Collaboration

Expand collaboration ecosystems and digital services securely, enhancing customer and partner experiences.

Microsoft Entra ID

Secure access for your employees to apps and resources in any cloud or on-premises with Microsoft Entra ID.

1

Help safeguard access to data and apps and keep it simple for users.

2

Apply the right access controls to strengthen your organisation's security.

3

Protect identities and block identity attacks in real time.

4

Confidently manage all Microsoft Entra multcloud identity and network access solutions in one place.

Microsoft Entra ID

PROOF OF CONCEPT

This proof of concept will provide your team with tangible value through hands-on implementation, showcasing the efficiency, security, and flexibility offered by Entra ID.
