

4-WEEK PROOF OF CONCEPT

Entra Identity Governance

*protecting organisations, **connecting people***

Protecting organisations, connecting people.

Bespoke external IAM solutions that drive growth, reduce friction, and improve security.

Entra ID Governance: solving common business challenges

Slow onboarding and offboarding of staff and temporary workers.

Process vulnerabilities and compliance risks caused by manual interventions

Siloed systems create blind spots and make access reviews near impossible.

Treating all users the same ignores diverse access needs and leads to inefficient license utilisation.

Manual creations and multiple accounts per user increase risks and costs.

Microsoft Entra ID Governance

Your Key to Efficient Access Management

Boost Productivity

Streamline access for employees, suppliers, and business partners to both cloud-based and on-premises applications and services.

Strengthen Security

Leverage machine learning for access decisions to mitigate the potential risks associated with access misuse and establish reviews to verify the ongoing user, group or access privileges.

Automate routine tasks

Assign routine resource access requests to relevant business groups and automate the approval process for standard resource access.

Microsoft Entra ID Governance

A Proof of Concept tailored to your user needs

This PoC goes beyond a demonstration of Entra ID Governance; it's a transformative experience designed to show you the value of Identity Governance in a setting real and familiar to you and your stakeholders.

Scoping Workshop

Together, we will collaboratively define your unique identity personas and access requirements.

System Assessment

To ensure smooth integrations with your HR systems.

Identity Lifecycle Management

Provisioning and automation for on-premises, cloud, or hybrid users

Role-Based Access Configuration

Implement granular access controls tailored to your specific roles and personas

Microsoft Entra ID Governance

A Proof of Concept tailored to your user needs

Streamlined access requests

Empower users with self-service requests and automated approvals for faster access.

Interactive stakeholder demonstration

So your stakeholders can witness the power of Entra ID Governance with a personalised hands-on experience.

Low level design documentation

Capture configuration decisions and ensure smooth implementation to prepare you for future deployment.

Optimised existing investments

Leverage your existing Entra ID licenses to help you reach their full potential.
