The Problem

Get RPA Right in 30 Days

Power Automate | Power Apps | CoPilot Studio

Our Solution

Onboard

Every Business wants to increase efficiency but don't know where to start… We Have Get RPA Right…

According to Gartner, 40% of enterprises will have RPA buyer's remorse

Organizations that want to scale RPA need to leverage business-led design which lends itself to low code/no code BUT business users need to be educated on how to properly design and implement.

The alignment between IT and business becomes more critical in terms of IT having proper governance to allow business users to automate and business users knowing what to do (and what not to do). We need to bring the Business and IT together to figure out how to drive low code solutions now. Where do we start?

Are these questions your organization can't answer…

We can't just let our business users automate whatever they want without understanding the risks and implications.

Our IT department is inundated with work, the business can't wait for them to make every simple change we need to be efficient.

Our business understands the concepts of RPA but have never truly been educated on how to properly implement.

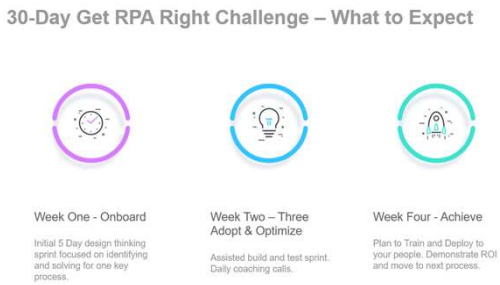
Where do we start?

If so….setup a call and let congruentX help you GetRPARight in as little as 30 days!

30 Day Low Code Challenge

with Power Automate Desktop (P.A.D.)

Framework to Amplify Customer and Employee Experience with Citizen Developers using Power Automate Desktop (Technology You Already Own)



Week One | Onboard
Initial 5 Day sprint focused on identifying and solving for one key process.
