Technological stack

ISO 9001: It is an international standard for quality in business process management, which helps to improve the quality of the product and service offered to customers.

ISO 13485: It is a specific standard for medical device manufacturers that establishes quality requirements for the design, production and distribution of these products.

ISO 27001: It is an international standard for information security that provides a framework for managing information security and protecting sensitive data.

ISDP 10003:2020: It is a product development standard that defines guidelines for the design, development, production and distribution of high-quality products. It focuses on customer needs and risk management during the product life cycle.

Equipe is a CE liv. 1 certified medical device. The CE marking indicates that the product conforms to the essential safety, health and environmental requirements established by European standards.

Certifications

In the context of Connect Informatics' long-term investment in quality systems, the future certification roadmap includes the following additional certifications:

- **Q4 2023** - Connect Informatics' Esquema Nacional de Seguridad (ENS) certification - ENS is a computer security certification system, a security standard that defines the requirements for protecting information and computer systems of public and private organizations in Spain.
