

# CONNECT TO MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

Integrate your Dynamics 365 Business Central data with your custom software and databases

Move on from Dynamics NAV to the cloud Dynamics 365 Business Central and **keep any existing integrations** with other software and databases you have.

Use **Connect Bridge**, the ultimate integration platform, to move or sync your data from on-prem to the cloud while keeping everything you already have in your system running smoothly.

Connect Bridge is a powerful integration platform that allows you to **build your custom integration with much fewer lines of code.**

## Upgrading the right way

Get the advantages of upgrading to Dynamics 365 and guarantee that

- The data you need is moved or synced
- The software that integrated with NAV keeps working
- The databases that were fed from NAV's data still get the necessary data

You can get all this by using Connect Bridge and standard SQL only. **No need to learn or use Dynamics' API.**

## Features

No need to study API of target systems

Forward compatibility guarantee

Keep your data safe - no direct access

From any software to Dynamics 365 BC

Utilize all the power of SQL, including Joins

Your custom solution with 100% control

# Customer Testimonial

"We moved to Microsoft Dynamics 365 BC (formerly Navision). Our hope was that Microsoft Navision, based on the Microsoft SQL database, would easily allow full integration of our PHP based website allowing data to flow in both directions, real time.

Fast forward 10 years and a number of failed attempts, including multiple ASP.net solutions, and we found Connect Bridge.

A week with Connect Bridge did what 10 years of development attempts failed to do"

**MARC MCDUFFIE**  
Vice President,  
RPS Corporation
