

# Connect Bridge

The ultimate software integration platform

## What is Connect Bridge?

Connect Bridge is a powerful, yet easy to use integration platform that allows every developer to design their own integration solutions without much effort and training.

The Connect Bridge platform provides over 400 connectors to both popular business applications and sensors and machines for industrial applications. New connectors are built and launched frequently.

This robust API management platform can connect from **any software of the last 40 years**.

## Why is Connect Bridge better?

Connect Bridge can turn any developer into an **integration hero**. In just **3 hours**, the developer can understand how the platform works and can start building the integration software according to your needs and requirements.

Connect Bridge **eliminates the need for using the software API** by using standard SQL (Structured Query Language) syntax instead. It uses its connectors to translate the SQL statements into API calls. Not using the API directly, makes projects **faster**, easier, and less error-prone.

## Trusted around the world

Connecting Software is a 16-year-old company, with 40 employees spread in 4 different countries. Connect Bridge is our primary solution, on which we have built our successful market-leader products. We have **1000+ installations**, and 250 000+ active users on all six continents, from enterprises of all sizes to public sector and non-governmental organizations.

## When you use Connect Bridge

- Integration becomes **easier** as you don't need to worry about the APIs
- Your **own team** can tackle even complex integration projects
- Your projects are ready **faster** as you reduce the coding effort
- You can let your team use their **favourite programming language**
- There are no more worries about **future updates** of that software – that is handled by Connect Bridge

## Testimonials

*"With Connect Bridge we build an own connector for Enterprise Architect Repositories, first to enter the Azure cloud, then to connect from any other software. Speed and reliability is amazing!"*

LieberLieber 

### PETER LIEBER

Owner of LieberLieber Software &  
President of the Austrian Software Industry Association

*"Implementation was quite straightforward.*

*Connect Bridge works like a Swiss watch. We haven't had any issues since the launch"*

### ALEXANDER ZEHNDER

CTO at swenex – swiss energy provider

Connecting  
Software

# How does it work?

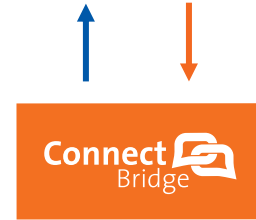

Connect Bridge allows developers to securely connect to a wide range of business software without having to use their API directly or study the API documentation. With Connect Bridge, you use SQL syntax inside your code and not API calls. That is good because SQL is a simple language that every developer knows, even at a junior level.

Connect Bridge **translates** that ANSI standard **SQL** statements (SELECT, INSERT, UPDATE and DELETE) **into API calls**, keeping your target system's integrity **secured** while offering easy communication between your application and a **vast variety of target systems** with its connectors.

**Drivers:** ODBC, JDBC, Web services

**Languages:** C#, Java, Python, C, PHP, Ruby, Node.js and any other language that supports the above drivers

**Deployment:** Cloud (Azure) or on-premises

Salesforce    OPC UA    OData    Microsoft Dynamics 365

... any many more

## Easy & fast integration with Connect Bridge

### Fast

- Use your existing team
- Train people in just 3 hours
- Installation up & running in 30 minutes

### Cost Effective

- No need for specialists
- PoC in 2 hours
- Reduce project team size
- Save up to 90% of time
- Attractive license models

### Safe

- Proven technology
- No direct access to the target system's database
- Encryption and authentication system included
- Can integrate with CB Digital Seal with Blockchain Technology for tamperproof files

### Simple

- One developer for logic AND integration
- Work in any programming language
- ONE language to talk from ANY backend system
- Less code and less errors

## ROI Highlights

Up to  
**10x**  
Faster integration process

Up to  
**90%**  
Less coding and bugs

Up to  
**200%**  
Minimal increase of productivity  
**GUARANTEED**

## Legacy system modernization: where do I start?

Does your company have a legacy system? You know, that piece of software that you have had for so long that no one can quite remember how it came to being... Yes, the one that doesn't integrate well with your organization's newer hardware and software systems, and that has become a bottleneck.

# Examples of Out-of-the-Box Connectors

There are 400+ connectors available for Connect Bridge. New connectors are launched regularly, and you can also build your own.

OneDrive	SAP HANA	SAP	Microsoft D365 Retail
Microsoft Exchange	Visual Studio	Oracle	Microsoft D365 Finance and Operation
Microsoft Office 365	OData	SharePoint	Microsoft D365 Business Central
Google Drive	Salesforce	Microsoft Dynamics 365	IBM DB2 & Informix
Dropbox	SugarCRM	Microsoft D365 Sales	Progress DataDirect
Intuit Quickbooks	G Suite	Microsoft D365 Customer Service	LogicalDOC
Marketo	Outlook	Microsoft D365 Field Service	MX OPC Server UA 2.01
OPC UA Connector	Gmail		TruMicro 2000 - OPC-UA interface
Microsoft Active Directory	MySQL		

## Why Connecting Software?

Connecting Software creates integration and synchronization tools for any developer, any software and any budget. Founded in 2004, Connecting Software is an award winning Microsoft Partner specializing in Software App Development. Connecting Software is now on the Microsoft Azure Marketplace and on Appsource. In Canada, we are listed in Government of Canada Software Licensing Supply Arrangement (SLSA).
