for the real people.

Our 3 pointer code of conduct

We work with a 3 pointer code of conduct:

1. ✔ We have empathy: every deal we make is focused on creating value for you, and not at all a way for us to earn money.
2. ✔ Things change: We understand requirements can change, and are flexible enough to accommodate them
3. ✔ We keep our word: Regarding timelines, regarding code quality.

In essence...

We provide technology development services to businesses of all sizes, and work with a wide variety of modern technologies to streamline any business use case or solve any complex problem, at a price point that works for you, and **we do this better than anyone you have ever met.**

Convinced? Still in doubt ?

How about getting in touch with us to see the difference yourself ? Just follow the link below, and we'll give you a call.

Connection Loops

We develop the fastest, most intuitive, and high fidelity Software-As-A-Service solutions.

It's the year 2023, and a lot has changed

Your software system no longer just resides on your computer. Today it needs to crunch millions of data points gathered from hundreds of devices, be agile enough at processing, so as not to make you wait, be accessible 24x7 on all your devices, and finally be smart emough that it wouldn't depend on you.

If you are developing a software, or an app or any tech driven product today, you will want developers who understand and appreciate these changes, and nobody is better than us when it comes revolutionizing the traditional boundaries. We have worked with numerous businesses, start-ups, and professionals to develop and scale their dreams.

What can we do for you

Running a business can be daunting, and between the 157 things that you need take care of on a daily basis, its quite easy to get used to just running your business that you get no time to innovate or to scale. Connection Loops can help. We specialize in developing highly intelligent, connected software systems that run in the cloud and can be accessed from any device. We can help you to streamline, and automate your business activities no matter where they are taking place or what their scale is.

taking place or what their scale is.

Our Services

Cloud Applications
Software as a Service (SaaS) Solutions
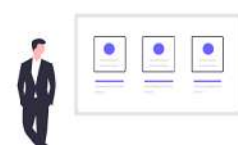

iOS App Development

Android App Development

Web Applications

AI & Data Analytics

Why You Should Choose Us

We have some of the most talented engineers who have a great deal of experience in working big tech roles on global scale.

Imagine this A-team working for you, not just to brainlessly write code, but to collaborate proactively, to explore every workflow in thorough detail, to give you the most remarkable solution possible.

We develop...

Cloud apps, android & iOS apps, web apps, microservices, AR & VR models, AI/ML solutions and data analytics applications
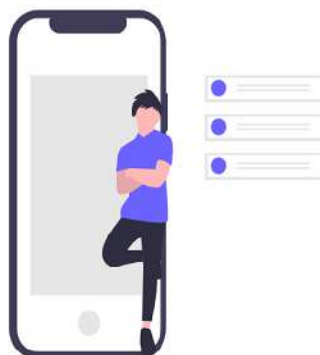

Who are our clients ?

Startups are our favorite, we have worked with a lot of them both small and big. We have worked with hospitals, pathology labs, clinics as well as individual professionals like doctors, accountants, architects, and interior designers. We have worked with farmers, small shop owners, educational institutes, real estate firms, as well as ad agencies. Over the past 3 years we have worked on numerous projects covering a wide variety of scale, markets, and consumers.

And what did we do for them ?

Cloud, web, and mobile app developments form the core of our service offerings. However, we do far more than just developing these apps, we close the entire loop, and deliver value to our clients to grow their businesses.

We partner with promising start-ups to help them develop their dream idea, right from prototyping to MVP to full fledged production development contributing significantly as if its our own product. We have continuous development contracts for development of the entire digital platform for our clients.

In the critical industries such as healthcare, we have developed next generation LIMS and HIMS systems that process millions of records per year. Many businesses run their core operations on the platforms develope by us.

How much do we charge

We have worked with a wide range of pricing models such as

- One time development cost
- Monthly installments
- Monthly / Annual Subscriptions
- Revenue sharing with **zero** down payment

Money is not our primary objective, creating great products that progresses our society is. We never turn down a project because of money, instead we'll get all creative and find a way to make it fair to both parties. Development is what we stand for in every sense of the word.
