

Stay Protected, Stay Compliant, Stay Ahead

Managed Cloud Disaster Recovery

Disasters can strike at any time. Don't wait until it's too late. Choose our fully Managed Cloud Disaster Recovery solution to ensure your business stays resilient, compliant, and ready to thrive—without adding to your IT team's workload.

In today's fast-paced digital world, downtime isn't an option. Our Managed Cloud Disaster Recovery ensures your business remains resilient, compliant, and ready for anything. Leveraging the power of Azure public cloud, we deliver a seamless, cost-effective disaster recovery (DR) service that's fully managed by our expert team. No need for costly investments in secondary data centers or burdening your IT staff—we take full responsibility for maintaining and managing your disaster recovery environment.

Comprehensive Disaster Recovery for Business Continuity

In the event of a disaster, our failover processes ensure a swift transition to the DR site with minimal downtime. We regularly test and validate recovery procedures to guarantee effectiveness. Continuous data replication to Azure keeps your data up to date.

We take full responsibility for your disaster recovery, covering everything from design and deployment to monitoring, regularly testing failover procedures, guaranteeing that your systems are always ready for rapid recovery. We manage the Azure Site Recovery (ASR) appliance and agents on your side, ensuring seamless integration with your environment. This allows your internal IT team to focus on strategic projects while we handle the day-to-day operational tasks.

Our pricing model offers predictable costs with no unexpected expenses, ensuring peace of mind. In times of stringent regulations like NIS2 and DORA, which set high standards for data protection and business continuity, having a reliable disaster recovery process is not just important—it's essential.

Why We're Your Best Choice

Fully Managed Service

We take complete responsibility for your disaster recovery setup, from initial deployment to ongoing maintenance and testing. Your IT team can focus on strategic initiatives while we ensure your DR environment is always ready.

Effortless Compliance

Navigate the complexities of NIS2, DORA, and other regulations with ease. Our solution is built to keep your business compliant.

No Upfront Costs

Avoid large capital expenditures. Our managed service ensures you a CAPEX-free model with a predictable monthly cost and SLAs without compromises.

Let's talk and let's walk through our presentation today.

Key Benefits of Managed Cloud Disaster Recovery

Enhanced Business Continuity: Ensure uninterrupted business operations with a reliable and secure disaster recovery strategy that prioritizes data protection and guarantees rapid recovery in the event of a disaster.

Zero Upfront Investment: Start protecting your business with no need for expensive hardware or infrastructure.

Scalable & Flexible: Whether you're protecting a few critical servers or your entire IT infrastructure, our solution scales effortlessly to meet your needs.

Monthly Reports: Provide an overview of what's being replicated, the results of automated tests (including any issues), and key changes from the previous month.

Regulatory Compliance: Stay ahead of industry regulations with a solution that's designed to meet and exceed compliance requirements.

Expert-Driven: Rely on our team of specialists to manage your DR environment with precision and care.

Compatible with other NIL services: We have the expertise to enhance your data center capabilities by providing high availability options or additional capacity and scalability on demand with the use of public cloud.
