# WIN RESULTS

## aiwa

**AIWA Panama**, been present since 1951 as one of the iconic brands in entertainment technology. Decade after decade, we have focused on offering the best price-value relationship in electronic equipment, based on cutting-edge Japanese technology.

**The Goal:** Improve suppliers payment approval process.

**The Challenge:** Modernize and optimize its vendor payment management process to keep up with market demands and enhance its competitiveness in the industry. While AWIA had a functional process in place, it recognized the importance of adopting innovative technologies and more efficient practices to ensure agile and effective financial management.

- AI based.
- Easy to use.
- Role control.
- Simple approvals.
- Automation.
- Payment process efficiency.
- Integration with Microsoft 365.

## Transforming Payment Approvals

Designed to simplify and optimize the process of registering and approving payments to suppliers within companies. Its main objective is to streamline this process, reducing the time and resources needed to manage payments and improve overall operational efficiency. ARPA allows different departments within a company to request payments to their suppliers quickly and efficiently, while ensuring compliance with internal procedures and agreed-upon payment deadlines. It was designed to be easy to implement and use, with an intuitive interface that simplifies the payment request process for users.

## The Payment Process in total Harmony

Client X has experienced significant improvements in their payment management processes since implementing ARPA. With ARPA, Client X has streamlined their payment management workflow, resulting in faster processing times and reduced administrative burden. The application's automated features, including AI-powered invoice recognition and pre-filling of payment request forms, have greatly improved accuracy and efficiency.
