

AI Agent FastStart (Copilot Studio)

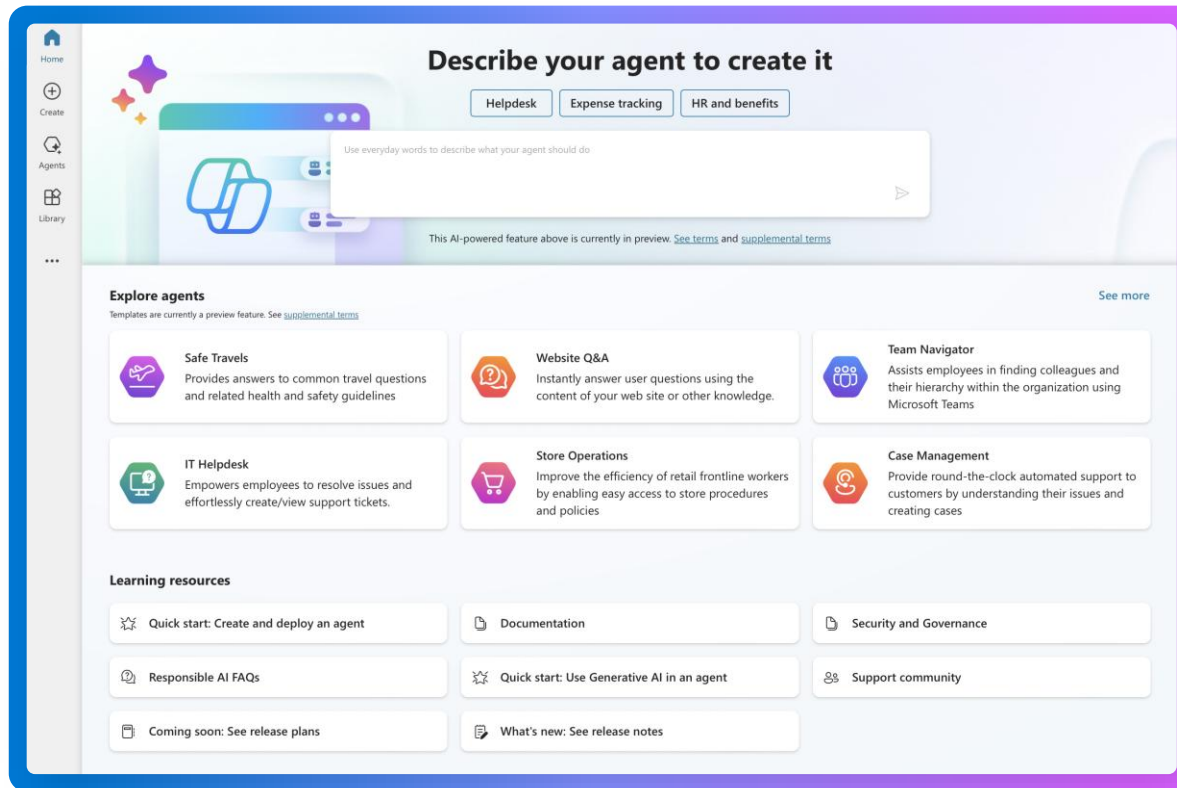

According to a McKinsey survey

Employees **want** automation tools

Agents in the workplace

According to Gartner®, "by 2028, **33% of enterprise software applications will include agentic AI**, up from less than 1% in 2024."

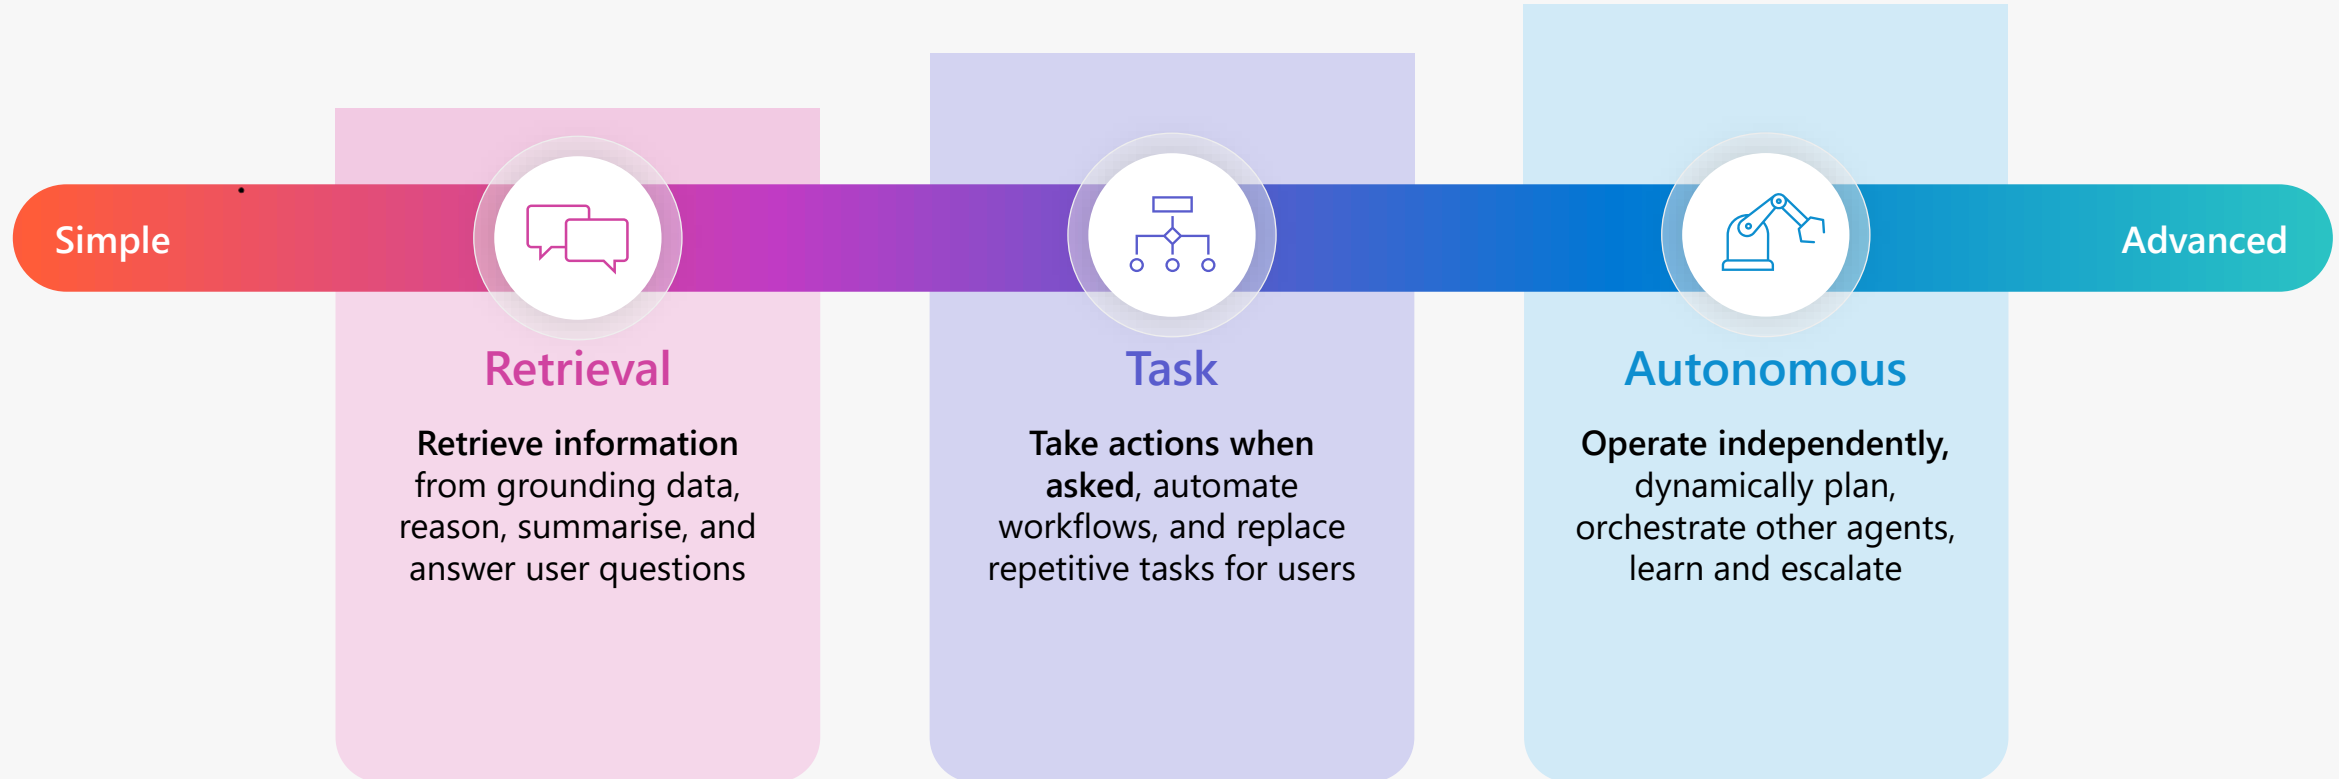

Agents

AI transformation

What are agents?

Agents use AI to automate and execute business processes, working alongside or on behalf of a person, team or organisation

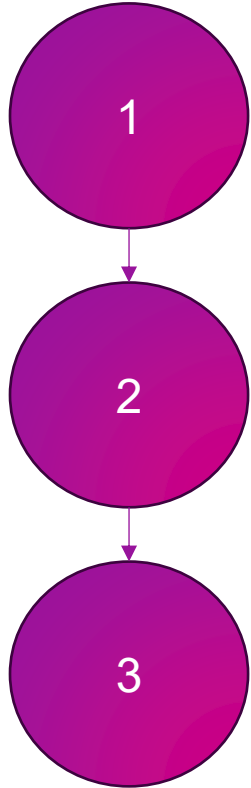

←..... Agents vary in levels of complexity and capabilities depending on your need→

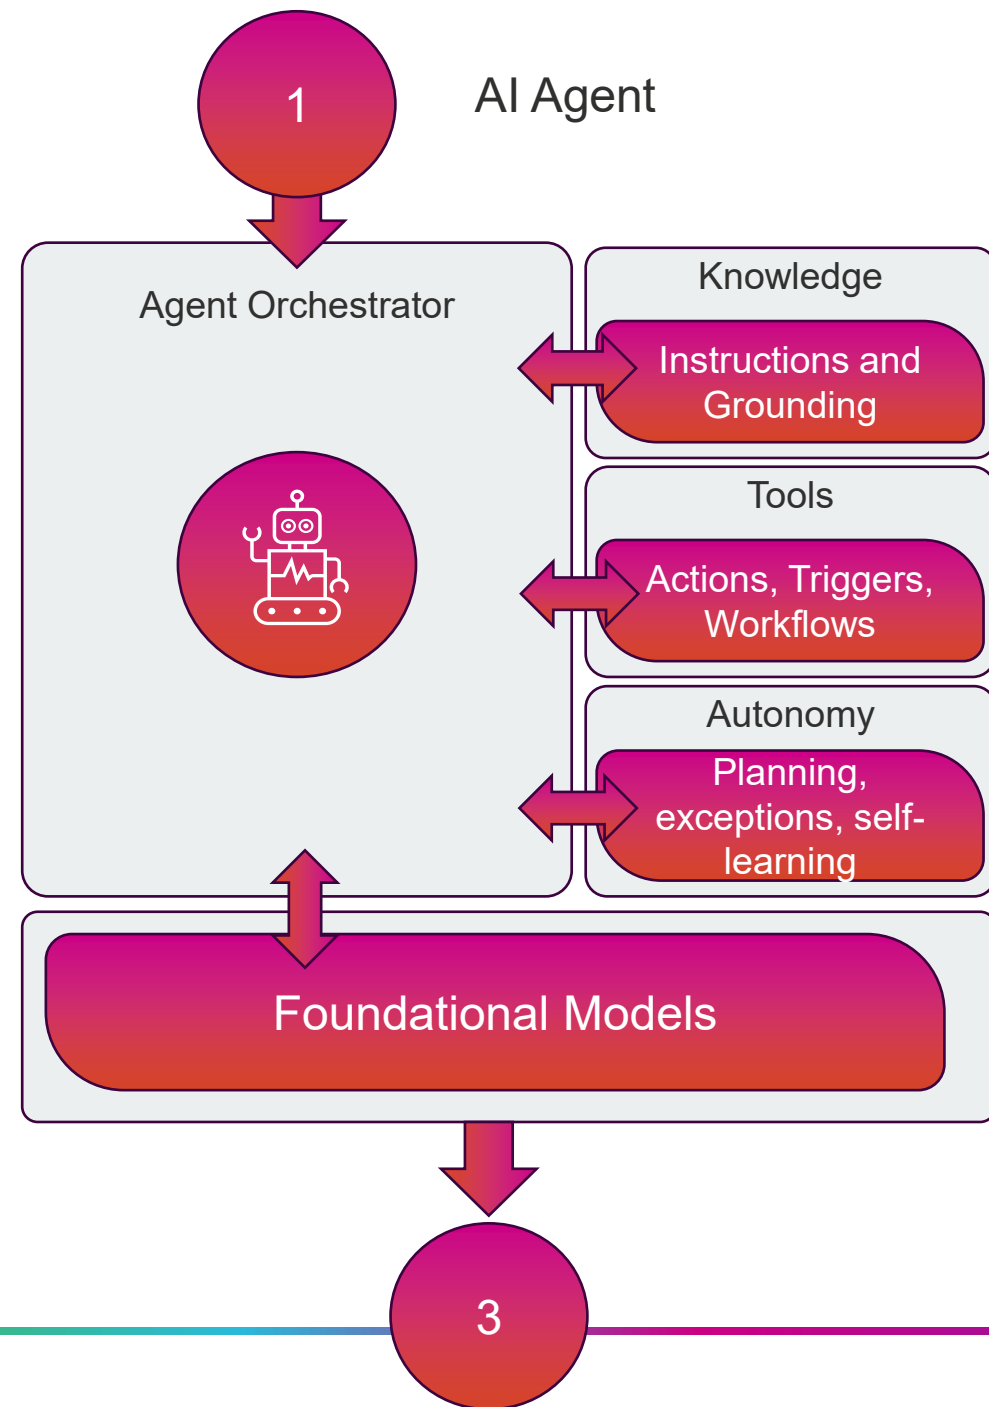

Different types of automation

Automation

Workflow

Workflow with AI

Explore a continuum of solutions

IT Helpdesk agent

How do I connect to the corporate network?

Device Refresh agent

Request a new laptop and send approvals via IT Service tool.

Lead Gen agent

The agent has identified and researched 15 new leads for you to review.

Simple

Advanced

Project Tracker agent

What is the status of phase 2 for project X and the remaining budget?

Budget Management agent

Review outstanding open PO's and begin financial planning.

Customer Support agent

The agent has identified new support issues and triaged to other agents.

Agent FastStart engagement

Fast Start

A timeboxed engagement:

- Advania bring expert Copilot Studio and AI skills
- You bring your use case(s)
- We work collaboratively through the process – frequent demos and working sessions

Timeboxed to a price point

Deep or broad focus across your business challenges – you choose:

Broad

Use Cases: 1- 3
We split time to explore
each

Deep

Use Cases: 1
We go deeper in this
scenario

Fast Start

What can I expect?

Duration

4-6 weeks

Cost

£22,000

This is for our standard scope – some clients flex up and down
by request

FAQ

Will you build in my environment or yours?	To be determined at the start (based on factors like account creation, environment access, Copilot Studio enablement, permissions etc.) Regardless, we hand over all the created outputs at the end of the engagement.
Do I get a completed and launched production-grade solution at the end?	Most likely no – you are buying a time-boxed POC on applying agentic AI capabilities to your use case(s). You should expect some follow-on work to get a completed solution in front of the business. However, we will use the time intelligently and if the scenario is relatively simple (and focused on one use case), it may be possible. We can give guidance during the engagement.
What are the activities and deliverables?	Engagement activities include a kick-off workshop, working sessions and demos, and a playback session at the end. Deliverables include the created AI agent itself (Copilot Studio package), a summary deck, and delivery of the sessions themselves
What will you need?	Approx. 5-8 hours from someone close to the scenario(s) – and ideally the ability to respond to e-mail questions within 1-2 days • If working in your environment, a small list of pre-reqs are involved (e.g. an identity for us to use, MFA set-up, Copilot Studio to be enabled etc.)

Case Study

Case Study: Empowering Energy

Generative AI over data

- + SharePoint Online – for end user facing guidance
- + Confluence – for platform design
- + Jira – to pull in work items
- + ServiceNow – used for internal support requests and ticket management
- + MS Learn – For learning paths

Outcomes & Benefits

- + Low-cost support: less than £1000 per month
- + Immediate responses
- + Instant knowledge updates: If a data source is updated, so is the Agent
