

# Microsoft

## AI document processing

### Automate extraction, generation and tagging

Every organisation runs on documents but exponential content growth, disconnected systems and difficulties managing information present increasing challenges around slow manual processes, discoverability and meeting compliance needs.

AI document processing can help tackle manual processes such as extraction and classification of data from documents, automatically generate repetitive documents and automatically tag images for better findability and compliance.

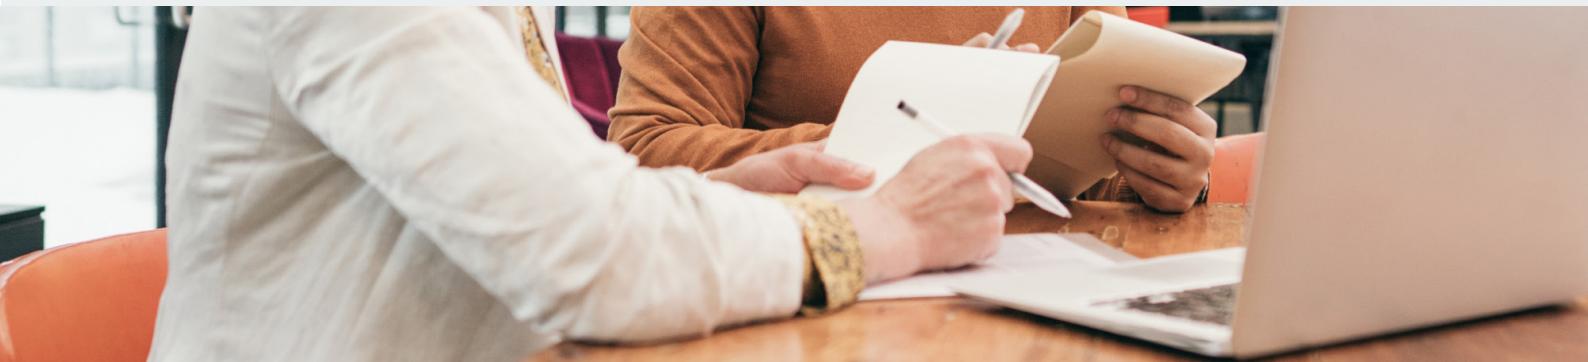

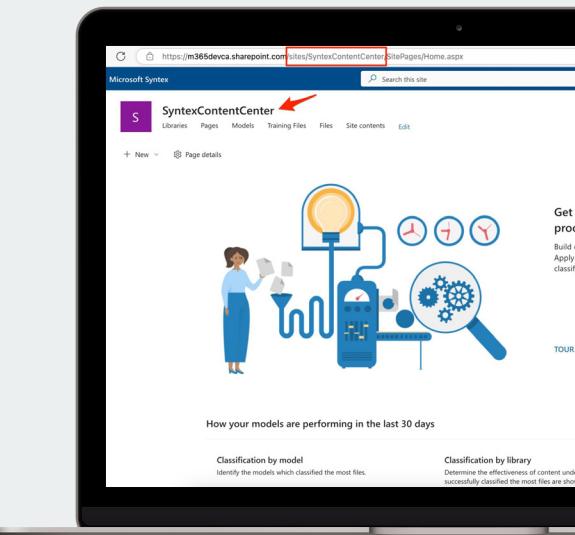

If you're ready to bring AI document processing into your organisation quickly and securely, our **AI document processing FastStart** enables you to move from concept to working MVP, with a clear path to a production grade solution.

### What's included?

Throughout the engagement, you'll benefit from Advania's expertise in AI and automation, guiding you through every stage, from defining the right use cases to building and deploying AI document processing that delivers results.

- ✓ **Use case validation** - Identify the right scenario with high impact and feasibility grounded in real user needs and system readiness.
- ✓ **Training of model and prompt engineering** - Iterative implementation to choose the right services for the use case.
- ✓ **Testing & feedback loop** - Test with real users, gather feedback, and refine the process for consistency and accuracy.
- ✓ **Deployment & roadmap** - Deploy MVP and receive a clear, actionable roadmap for broader rollout and future iterations or ideas of other use cases to tackle. Understanding of processing costs.

The fee to deliver the AI document processing FastStart is: £28,500

## From idea to automated processing

In this engagement we focus on 1 to 3 use cases where AI document processing and automation can help – giving you the choice of whether to go deep on one use case or quickly evaluate AI document processing for up to 3 disparate business challenges. Our AI document processing FastStart is flexible but follows this methodology:

## Why choose Advania?

- ✓ Clients get to work with experts that know how to get the most out of AI document processing.
- ✓ Clients can get started quickly with an exploratory approach to make sure we are using the right technology for the identified use case.
- ✓ We can take advantage of adjacent Microsoft Technologies such as Power Platform to automate a manual process end to end.
- ✓ We're working with many organisations on their AI journey and have worked with Microsoft AI and the underlying platforms for years.
- ✓ We have "Preferred" status in Microsoft's Content AI Partner Programme – giving us early access to new features and roadmap info (1 of 20 globally)
- ✓ We have a strong heritage and extensive capability across Teams, Power Platform and SharePoint
