

# Azure VMware Solution Accelerator for Public Sector

8-Week Implementation

**Extend or migrate your existing VMware Data Centre environment seamlessly to Microsoft Azure with Azure VMware Solution and Advania**

**In the Public Sector, technologies must align with a myriad of priorities and deliver clear ROI.**

- **Healthcare** Payors need to accelerate digital workplace modernisation programmes to optimise care management. Providers are striving to empower health team collaboration and enhance patient experiences.
- In **Education**, hybrid and blended learning through modern campus experiences and cloud-powered advanced research are high on the agenda.
- **Government Departments** must deploy environmentally sustainable solutions with next-level security and build applications that optimise public services and experiences.

Azure VMware Solution (AVS) provides the initial step in your modernisation journey, delivering a highly scalable, sustainable, and secure platform whilst making it simpler to access higher value native Azure services. These will facilitate the build and development of your future applications and unlock the potential of your data.

**What our AVS Accelerator gives you**

- Advania will provide accredited consulting and engineering expertise from our Azure Cloud Centre of Excellence to kick-start your project. Our fully project-managed, proven methodology, coupled with collaboration with your internal teams, will ensure that the business and technical objectives are clear for all stakeholders before activities commence.
- The Azure VMware Solution Accelerator follows our PUBSEC methodology and provides our clients with clarity and assurance through the design and deployment process to establish a VMware environment in your own private cloud powered by Microsoft Azure.
- In 8 weeks (subject to client stakeholder availability), we will deliver your AVS environment integrated with your on-premises data centre and conduct a pilot migration wave with performance testing to ensure your team is positioned for successful ongoing migrations.

**Why choose Advania?**

As an Azure Expert MSP, Advania is authorised to manage your application for the Azure Migrate and Modernise programme for AVS to bring skills building, cost-effective offers and incentives (be it subsidised services or Azure credits) which will help offset transition costs.

We hold Microsoft's Azure VMware Solution specialisation, assuring you of the highest standards for Azure service delivery and support. And with expertise across Microsoft 365, Security and Business Applications, we're also able to support your broader digital transformation journey with Microsoft technologies.
