

Azure Velocity Landing Zone

2-4 Weeks

Enterprise Scale (from £20,000 to £25,000)

Get up and running in Azure quickly with a fully functional Enterprise Scale Azure environment that is secure and ready to run production workloads. Designed and implemented in your Azure tenancy by Advania within 2 to 4 weeks.

The Azure Velocity Landing Zone | Enterprise Scale is the ideal solution for the mid-market customer that requires a larger scale or multi-region landing zone deployment aligned to Microsoft's Enterprise-scale standard guidance.

The delivery model was first designed to meet the challenges, security requirements and timescales of Government organisations and deployed using DevOps and infrastructure-as-code, the VLZ has since scaled to help organisations across multiple sectors and diverse industries.

Accelerate your cloud journey

- A cloud MVP built on a core set of artefacts refined over many customer engagements
- Customisable to meet your individual requirements and product preferences
- Azure becomes a trusted extension of your on-premise data centre

Secure and compliant foundation

- Secure baseline environment with complete visibility of your threat and security landscape
- Secure governance framework applied through role based access to Azure and subscription management
- Aligned to Azure Architecture blueprints, MS Virtual Data Centre guidance and NCSC 14 Cloud Security principles

Easy to manage and develop

- Velocity Landing Zone is easily connected to your network for an efficient migration
- Designed to scale as services are built or moved to Azure
- Create "spokes" that define usage of Azure by team or application
