

# Microsoft Azure Rapid Migration Assessment

## Insight-led planning for your move to Azure

The Azure Rapid Migration Assessment provides a structured, low-risk way to evaluate your readiness for Azure. It delivers clear visibility of your estate, insight into migration and modernisation options, and a realistic view of cost, effort and risk.

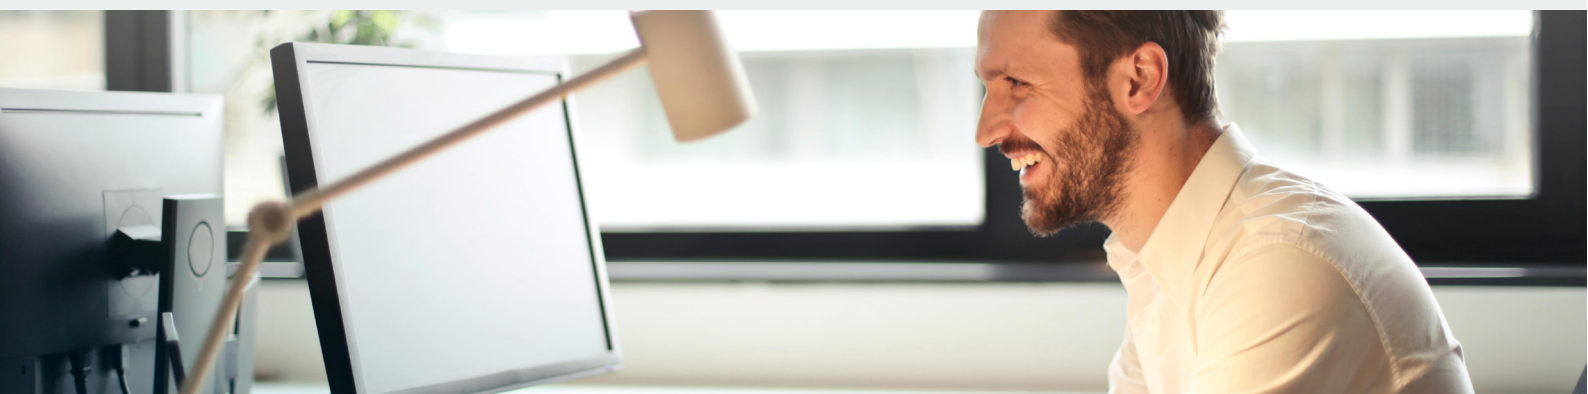

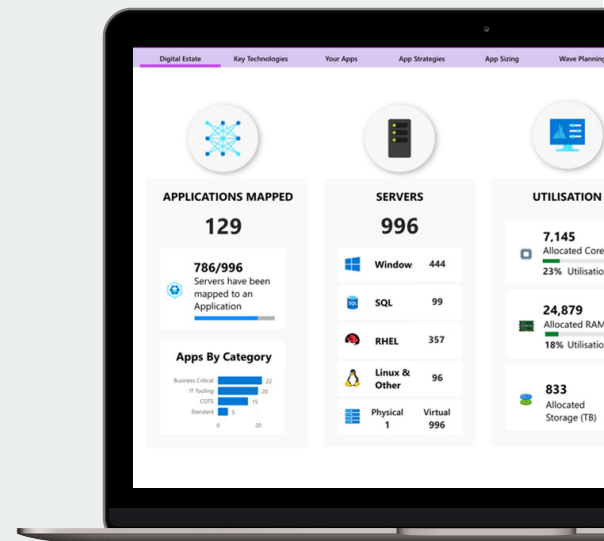

By assessing cost, complexity, and readiness alongside technical findings, the assessment enables informed conversations with stakeholders and aligns priorities before any change begins. The result is a clear, structured plan that supports confident next steps toward Azure.

Led by Advania, a Microsoft Azure Expert MSP, this engagement equips your organisation with the insights needed to make informed decisions quickly and plan your migration with confidence.

## What's included?

- ✓ Automated discovery of servers, workloads and key dependencies
- ✓ Clear visibility of your current infrastructure and application estate
- ✓ Azure-aligned workload sizing and cost modelling
- ✓ Categorisation of your workloads by complexity and readiness
- ✓ Migration and modernisation options for your priority applications
- ✓ Identified risks, constraints and interdependencies
- ✓ A prioritised Azure migration roadmap with next steps

The Azure Rapid Migration Assessment from Advania is **FREE for qualifying customers.**
