Rapid PGS for Dynamics Business Central

Implementation of Progressus PSA app for Dynamics 365 Business Central

Rapid-PGS revolutionises your operations through

A single-minded scope, ensuring the fastest time to implement

A focus on the most significant benefits of this market-leading platform

Ensuring your projects are profitable and identifying any slippage early

Empowering your users by providing deep functionality via a familiar user interface

Our expertise will allow you to get the fastest return on investment and affords a platform for expansion as you grow

Progressus PSA is the next-generation PSA (professional services automation) solution for project and services-based businesses. As you'd expect, it's mobile-enabled and architected for the intelligent cloud.

Progressus PSA is an extension of Microsoft Dynamics 365 Business Central, adding advanced project and resource management and complete project accounting, giving you total control of your projects and business.

Simply put, It's PSA and ERP all-in-one, bringing processes, people and data together. End-to-End.

As the foremost Progressus partner in the UK, IT Lab offers Rapid-PGS at a fixed price and scope, with rapid implementation of both PSA and ERP functionality.

Within four weeks, you will enjoy:

- The ability to product P&L and Balance Sheet reporting for your company
- The functionality to manage resources and track your projects' budgets and profit
- Timesheet and expense management
- Full management over cash, debtors and creditors
- Users trained and confident using the system
- Opening balances and master data transferred and tested
