

Microsoft Fabric Custom Build

Build the Fabric platform for your business needs

A Fabric Custom Build delivers a fully tailored implementation designed around your organisation's data architecture, business priorities and long-term analytics goals. Our experts configure your Fabric environment, establish secure ingestion pipelines, design Lakehouse and Warehouse structures and implement governance, monitoring and modelling tailored to your needs.

You receive a complete, production-ready solution with custom dataflows, workspace structures and reporting foundation, along with the knowledge transfer your teams need to operate and evolve the platform confidently.

What's included

- ✓ Fully customised Microsoft Fabric environment setup aligned to your architecture and governance requirements.
- ✓ Secure data ingestion pipelines with incremental processing and validation.
- ✓ Bespoke Lakehouse and Warehouse configuration built around your data estate.
- ✓ Custom semantic models and reporting foundations for priority analytics scenarios.
- ✓ Platform-wide monitoring, workspace structures and operational guardrails.
- ✓ Full knowledge transfer so your teams can maintain, extend and scale the solution.

Fabric Custom Build engagements start at £30,000 for a 30-day delivery. As a Microsoft Partner, Advania UK has access to Microsoft-funded opportunities. Contact us to check your eligibility.

Unlock your full Fabric potential

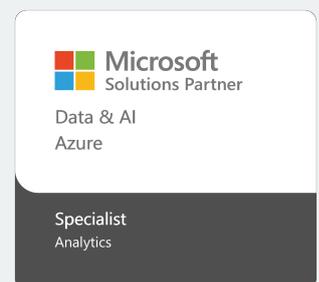

The Fabric Custom Build engagement delivers a fully tailored Microsoft Fabric platform aligned to your architecture, data landscape and analytics goals.

This structured approach follows a clear set of stages that take you from discovery through to handover, ensuring your teams are fully enabled to operate and grow the platform with confidence.

Why choose Advania?

- 
Proven Fabric expertise – Advania consistently delivers high-quality data and analytics platforms that drive measurable business outcomes.
- 
Extensive real-world experience - We have supported more than 500 organisations in defining, modernising, and executing their data strategies across diverse industries.
- 
Deep technical capability - Our team includes more than 250 Azure-certified specialists with expertise spanning data architecture, governance, analytics, and platform engineering
- 
Structured and reliable delivery - We accelerate client data journeys through proven frameworks, robust methodologies and structured assessments that reduce risk and increase value.
- 
Validated Microsoft excellence - Holding the Analytics on Microsoft Azure specialisation demonstrates our advanced capability in delivering high-quality, production-grade Microsoft analytics solutions.
