

Microsoft Fabric FastStart

Accelerate your move to a production-ready Fabric platform.

Organisations often struggle with fragmented data estates, manual reporting processes and a lack of scalability across analytics environments. Microsoft Fabric provides a unified platform for modern analytics, but tuning its capabilities into a production-ready solution can be complex without the right foundations.

Fabric FastStart provides a structured, low-risk engagement that rapidly modernises your data estate. Our experts configure your Fabric environment, implement governance, monitoring, and source control, and migrate priority datasets into a best-practice Lakehouse architecture.

Your teams will gain hands-on experience throughout the build, ensuring they are equipped to confidently adopt Fabric. The result is immediate business value through production-ready analytics assets and a clear roadmap for ongoing modernisation.

Whats included

- ✓ A fully configured Microsoft Fabric environment aligned to governance, monitoring and source-control best practices.
- ✓ Migration of priority datasets into a modern Fabric Lakehouse architecture for rapid value.
- ✓ Creation of semantic models and initial Power BI reports to accelerate analytics use.
- ✓ Implementation of capacity management, platform monitoring, and operational guardrails for resilience.
- ✓ Hands-on upskilling and knowledge transfer for your data and analytics teams delivered throughout the build.
- ✓ A tailored roadmap outlining recommended next steps and further modernisation opportunities

The Fabric FastStart implementation from Advania is offered at a fixed price of £25,000 for a 20-day delivery. As a Microsoft Partner, Advania UK has access to Microsoft-funded opportunities. Contact us to check your eligibility.

Your fast track to Fabric success

The Fabric FastStart engagement rapidly configures a Microsoft Fabric environment aligned to governance, monitoring and source-control best practices. Priority datasets are migrated into a modern Lakehouse architecture, with semantic models and initial Power BI reports created to deliver immediate analytical value.

Your team received hands-on support and knowledge transfer throughout the process, ensuring confident adoption and a clear roadmap for continued modernisation.

Why choose Advania?

- ✓ **Proven Fabric expertise** – Advania consistently delivers high-quality data and analytics platforms that drive measurable business outcomes.
- ✓ **Extensive real-world experience** - We have supported more than 500 organisations in defining, modernising, and executing their data strategies across diverse industries.
- ✓ **Deep technical capability** - Our team includes more than 250 Azure-certified specialists with expertise spanning data architecture, governance, analytics, and platform engineering
- ✓ **Structured and reliable delivery** - We accelerate client data journeys through proven frameworks, robust methodologies and structured assessments that reduce risk and increase value.
- ✓ **Validated Microsoft excellence** - Holding the Analytics on Microsoft Azure specialisation demonstrates our advanced capability in delivering high-quality, production-grade analytics solution on Azure.
