

Microsoft Fabric Readiness Assessment

Accelerate your path to Fabric adoption

The Fabric Readiness Assessment provides a structured review of your current data estate and architecture to determine your organisation's readiness to adopt Microsoft Fabric. It examines your existing environment in detail, including governance, tooling, and security, to build a clear understanding of how well positioned your organisation is to take advantage of Fabric.

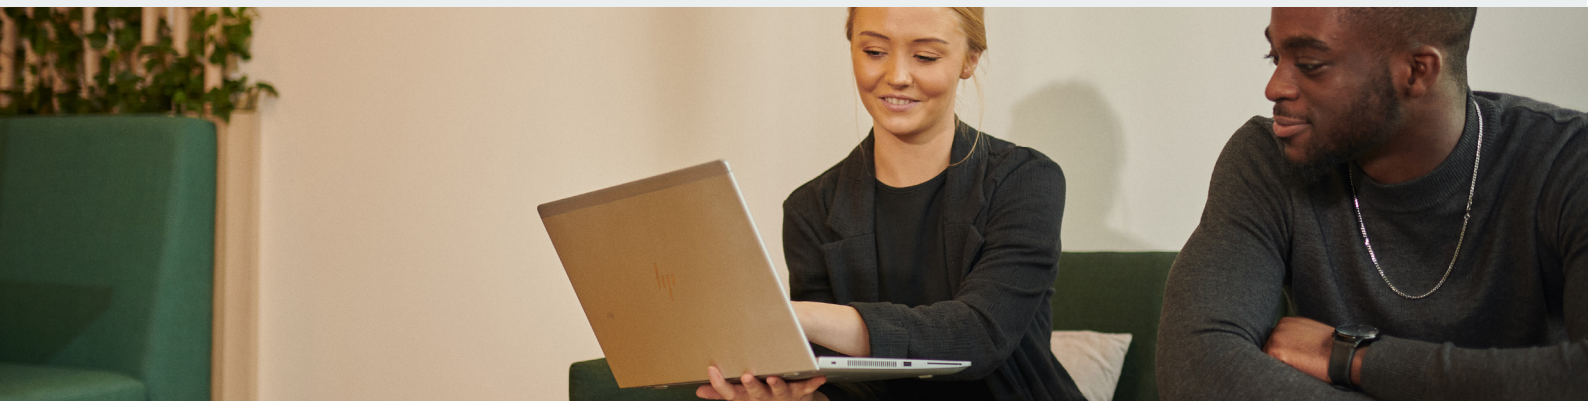

Our experts analyse your environment to identify opportunities, constraints, risks, and dependencies that influence your ability to adopt Fabric effectively. This includes assessing how your current architecture aligns with Fabric services, integration patterns, and best practice, as well as the operational and skills considerations needed for a smooth transition.

You receive a clear and actionable set of recommendations that outlines the steps required for adoption, the expected benefits, the upskilling your teams may need and the long-term value Fabric can unlock for your data strategy. This prepares your organisation to move forward with confidence toward a modern, scalable, and well-governed analytics platform.

What's included?

- ✓ Review of your existing data estate and analytics architecture to assess Fabric readiness
- ✓ Identification of risks, gaps, priority areas and dependencies that impact Fabric adoption
- ✓ Recommendations for governance, security and platform alignment to meet best practices
- ✓ A full report and presentation outlining the steps needed to successfully enable Microsoft Fabric
- ✓ Guidance on training, upskilling and operational requirements for your teams
- ✓ A benefits and opportunities summary to support business case development

The Fabric Readiness Assessment is delivered over 3 to 5 days at a fixed price of £5,000. As a Microsoft Partner, Advania UK has access to Microsoft-funded opportunities. Contact us to check your eligibility.

Discover your path to Fabric success

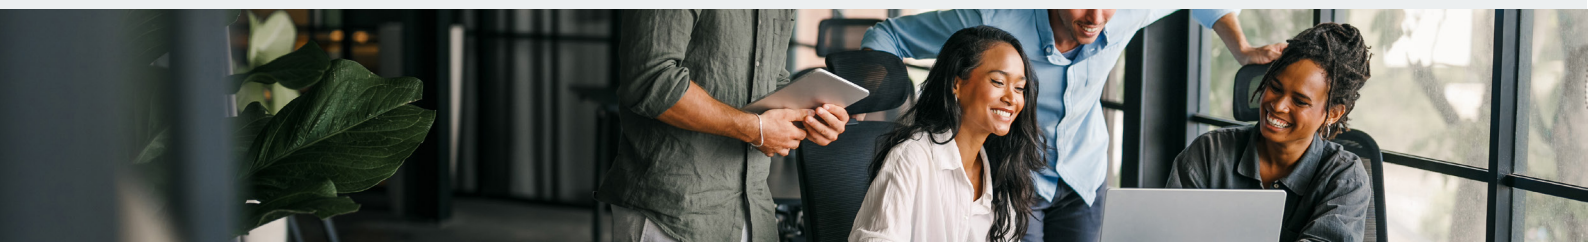

The Fabric Readiness Assessment provides a focused review of your data estate, architecture and governance practices to evaluate your readiness for Microsoft Fabric. Our team highlights strengths, risks and capability gaps, then defines the steps needed to adopt Fabric effectively.

The output is a practical report and executive presentation that prepares your organisation for a confident, well-planned transition.

Why choose Advania?

- ✓ **Proven Azure expertise** - As an Azure Expert MSP, Advania consistently delivers high-quality data and analytics platforms that drive measurable business outcomes.
- ✓ **Extensive real-world experience** - We have supported more than 500 organisations in defining, modernising, and executing their data strategies across diverse industries.
- ✓ **Deep technical capability** - Our team includes more than 250 Azure-certified specialists with expertise spanning data architecture, governance, analytics, and platform engineering.
- ✓ **Structured and reliable delivery** - We accelerate client data journeys through proven frameworks, robust methodologies and structured assessments that reduce risk and increase value.
- ✓ **Validated Microsoft excellence** - Holding the Analytics on Microsoft Azure specialisation demonstrates our advanced capability in delivering high-quality, production-grade analytics solutions on Azure.
