

Microsoft 365 Copilot

Transform the way your business works with Copilot

Copilot is an innovative AI assistant within your apps, documents and conversations that will transform the way you work. Copilot enables day-to-day tasks to be completed faster and with greater effectiveness.

Increase productivity

Automate repetitive tasks like drafting emails and summarising documents so you can focus on more strategic initiatives.

Data-driven insights

Automate data collection and analyse large data sets at speed to generate actionable insights and enable quicker decision making.

Streamline information management

Use Copilot to suggest email responses, prioritise important messages and as a virtual assistant for meeting summaries and actions.

Automate business processes

Leverage Copilot agents to intelligently automate processes for transformational business value.

Expert-led Copilot strategy, deployment and support

Advania is a prioritised partner in the UK for Microsoft Copilot implementation services. With nine Microsoft Specialisations including AI Platform on Microsoft Azure, a team with deep technical expertise and eight Microsoft Most Valuable Professionals (MVPs), we can support you to plan, implement and realise lasting value from Copilot.

Through tailored assessments and workshops, our technology experts will assist you to envision the value Copilot can bring to your organisation, build the business case and ensure that you are ready to deploy securely and compliantly.

Our adoption and change management specialists will focus on the people side of the change, supporting you to keep your end-users informed and engaged throughout the transformation.

Discover

We will help you to identify the top scenarios for using Copilot. We assess your technical readiness and assist you to build a business case and roadmap for adoption.

Evaluate

Then we evaluate those use cases in practice, providing guidance to improve the productivity of an initial group of users and ensuring a solid, secure foundation.

Accelerate

Having found the business value, we support you with rollout and user adoption at a pace that is right for you to unlock the value at scale from Copilot for your business.

Extend

With Copilot embedded in your business, we can assist you to leverage Copilot Agents to extend into your business systems and processes.

Let's talk.

Contact your account manager to arrange a Copilot demonstration from our AI specialists.

Planning your Copilot journey

We run a variety of structured programmes that are designed to help you plan and implement your strategy and accelerate your Copilot adoption. Talk to your account manager to discuss which of our workshops is right for you.

Inspire and build the case

Copilot Vision and Value Discovery

A three-phase programme to aide discovery and evaluation and develop a strategic roadmap for AI transformation powered by Copilot.

What to expect:

- ✓ **Inspire:** showcase the vision and value, provide an overview of data security and understand best practice for adoption and change management.
- ✓ **Assess:** assess technical and organisational readiness and identify high-value scenarios.
- ✓ **Design:** create the business case and strategic roadmap for AI transformation.

Deploy and deliver impact

Copilot Proof of Value

A precise and guided evaluation designed to help deploy Copilot in a matter of weeks and accelerate time to greater value from your licences.

What to expect:

- ✓ **Get ready:** define scope and priorities, identify business stakeholders, champions and user cohorts.
- ✓ **Onboard and engage:** onboard your champions and users supported with training assets and communication templates.
- ✓ **Deliver impact:** implement activities to drive success including prompt training, review leanings and document next steps.

Scale and realise ongoing value

Copilot Deployment and Adoption Accelerator

Discover how to deploy Copilot at scale, accelerate time to value and create a Centre of Excellence to achieve lasting results.

What to expect:

- ✓ **Readiness:** discuss the benefits and the high value scenarios to prioritise.
- ✓ **Build the plan:** construct your adoption plan, strategy for your Centre of Excellence and determine how to track adoption success.
- ✓ **Drive adoption:** deploy your Centre of Excellence, execute your strategy and monitor performance against business case.

Get prepared with our Security and Readiness Assessment

Operating within your tenant, Copilot has access to all the data that each user is permitted to see. It's therefore vital to ensure that document permissions and sharing settings in OneDrive and SharePoint are correct before deploying extensively. Our Security and Readiness Assessment deliverables include:

- ✓ **Overshared and sensitive data:** Understanding your data risk including identification of sensitive data types, locations and owners and poorly governed sharing and permissions management.
- ✓ **Apps/licensing readiness report:** Understanding your posture for Copilot prerequisites including licencing readiness and application deployment readiness.
- ✓ **Recommended next steps report and roadmap:** Findings and recommendations from our analysis and a supporting roadmap for remediation and Copilot deployment.

Expert adoption and change management support

Our adoption and change management consultants will work with you to prepare and conduct a tailored program including communications, workshops and training to maximise engagement and minimise confusion with Copilot adoption.

We can implement customised strategies for each department, prioritising their goals. We'll help you to establish and track key performance indicators (KPIs) and collect actionable insights from end-users to measure success, provide employee support where required and adjust plans accordingly.
