

Microsoft Power BI Co-Build

Accelerate your Power BI capability with hands on co-development

Many organisations need rapid, practical support to build effective Power BI solutions while also developing their internal analytics capability. The Power BI Co-Build engagement pairs your analysts with our specialists to jointly design, shape and deliver a business-ready report that meets a clear objective and provides immediate value to your organisation.

Throughout the engagement, we connect to your data sources, build a strong and reliable semantic model, and apply best practice techniques for data preparation, visual design, and publishing. Your analysts work side by side with our team, gaining hands-on experience in modelling, DAX, layout design, usability principles, and workspace configuration, all within a structured and supportive environment.

By the end of the engagement, you receive a polished, production-ready Power BI report and a team that is more capable, confident, and equipped to continue developing Power BI solutions independently. This blend of delivery and upskilling ensures long-term scalability, improved reporting quality, and a stronger foundation for your organisation's analytics maturity.

What's included

- ✓ Joint development of a Power BI solution aligned to an agreed business objective.
- ✓ Connection to your data sources and creation of a robust, well-structured data model.
- ✓ Best practice visual design, report layout, and publishing guidance.
- ✓ Knowledge transfer embedded throughout to upskill your analysts.
- ✓ Support to enhance, refine and productionise the final solution.
- ✓ A scalable foundation your team can build on independently.

Power BI Co-Build is delivered over 10 days at a fixed price of £12,000. As a Microsoft Partner, Advania UK has access to Microsoft-funded opportunities. Contact us to check your eligibility.

Turn collaboration into capability

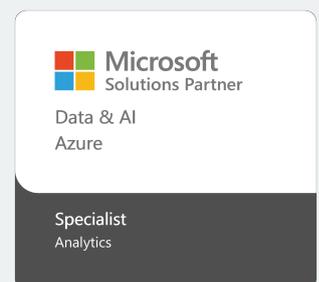

The Power BI Co-Build engagement blends delivery and enablement, giving your team hands on experience while collaboratively building a real, production ready solution. Together we connect to your data, engineer a reliable model, design impactful visuals and publish using best practice.

By the end, your team not only has a fully working Power BI report, but the confidence and skills to continue developing Power BI solutions independently.

Why choose Advania?

- ✓ **Proven Fabric expertise** – As an Azure Expert MSP, Advania consistently delivers high-quality data and analytics platforms that drive measurable business outcomes.
- ✓ **Extensive real-world experience** - We have supported more than 500 organisations in defining, modernising, and executing their data strategies across diverse industries.
- ✓ **Deep technical capability** - Our team includes more than 250 Azure-certified specialists with expertise spanning data architecture, governance, analytics, and platform engineering
- ✓ **Structured and reliable delivery** - We accelerate client data journeys through proven frameworks, robust methodologies and structured assessments that reduce risk and increase value.
- ✓ **Validated Microsoft excellence** - Holding the Analytics on Microsoft Azure specialisation demonstrates our advanced capability in delivering high-quality, production-grade analytics solution on Azure.
