

Microsoft Power BI Kickstart Training

Kickstart your analytics journey with practical, hands-on Power BI enablement

Many organisations want to build internal Power BI capability but need structured, practical training that helps teams become productive quickly. Power BI Kickstart Training gives your analysts the foundational skills to build effective reports, understand data modelling, and apply best-practice visualisation techniques with confidence.

Led by Advania's Data & Analytics specialists, the training blends explanation, demonstration, and guided build-along exercises so participants learn by doing. Using curated datasets, your team will gain real, transferable skills that support better reporting, faster insight generation, and more consistent data storytelling across the business.

This workshop-based training is built to help organisations at the beginning of their analytics journey develop confidence with Microsoft 365 data tools, while setting strong foundations for future adoption of Fabric, self-service BI, and governance-aligned reporting practices.

What's included

- ✓ Instructor led, hands on training focused on practical Power BI skills.
- ✓ Step by step guidance across importing and transforming data, modelling and relationships.
- ✓ Visual design best practices and interactive dashboard creation.
- ✓ Build along exercises using a demo dataset to reinforce learning.
- ✓ Introduction to semantic models, measures, calculated columns and STAR schema basics.
- ✓ Support for publishing, workspace usage and sharing reports in the Power BI Service.

The Power BI Kickstart Training is delivered over four days at a fixed price of £5,000. As a Microsoft Partner, Advania UK has access to Microsoft-funded opportunities. Contact us to check your eligibility.

Learn Power BI the practical way

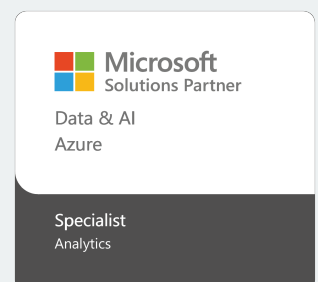

The Kickstart Training provides an immersive, hands-on introduction to Power BI, designed to rapidly build confidence and capability. Across a series of guided exercises, your analysts learn how to connect to data, shape and model it effectively and design impactful dashboards using best practice visualisation techniques.

By the end of the training, your team will have built a complete report from scratch and will be equipped with the practical skills needed to continue using Power BI independently.

Why choose Advania?

- ✓ **Proven Azure expertise** - As an Azure Expert MSP, Advania consistently delivers high-quality data and analytics platforms that drive measurable business outcomes.
- ✓ **Extensive real-world experience** - We have supported more than 500 organisations in defining, modernising, and executing their data strategies across diverse industries.
- ✓ **Deep technical capability** - Our team includes more than 250 Azure-certified specialists with expertise spanning data architecture, governance, analytics, and platform engineering.
- ✓ **Structured and reliable delivery** - We accelerate client data journeys through proven frameworks, robust methodologies and structured assessments that reduce risk and increase value.
- ✓ **Validated Microsoft excellence** - Holding the Analytics on Microsoft Azure specialisation demonstrates our advanced capability in delivering high-quality, production-grade analytics solutions on Azure.
