

Microsoft Windows 365 Business Case Assessment

Build a clear case for Windows 365

Organisations are re-evaluating how best to deliver secure, cost-efficient, and flexible computing for a hybrid workforce. Yet the true financial and operational impact of adopting Windows 365 is often unclear, making it difficult for stakeholders to commit with confidence.

Advania's Windows 365 Business Case Assessment provides an insight-led, evidence-based evaluation of your current environment, costs, risks, and user needs. By combining data discovery with expert analysis and financial modelling, we help you understand the viability, value, and strategic fit of Windows 365 for your organisation.

The outcome is a clear, actionable recommendation that supports alignment across IT, finance, and leadership.

What's included

- ✓ Automated discovery of devices, usage patterns, licensing, and management overheads to establish an accurate baseline.
- ✓ Persona-driven workload and performance analysis to assess suitability and readiness for Windows 365 Cloud PCs.
- ✓ Detailed cost benchmarking comparing current end-user computing spend with Windows 365 TCO and ROI scenarios.
- ✓ Assessment of security posture, hybrid work needs, operational risks, and optimisation opportunities.
- ✓ Modelling of commercial options, configuration approaches, and efficiencies achievable through modern management.
- ✓ A final assessment report providing evidence-based recommendations, adoption considerations, and a high-level roadmap.

The Windows 365 Business Case Assessment from Advania costs £6,750. As a Microsoft Partner, Advania UK has access to Microsoft-funded opportunities. Contact us to check your eligibility.

How our Windows 365 business case assessment gives you the answers

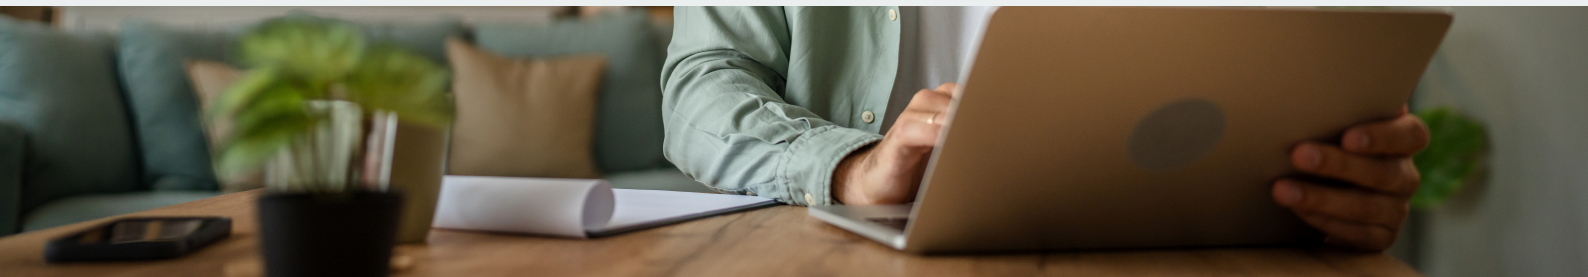

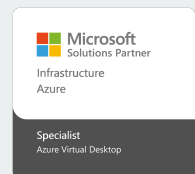

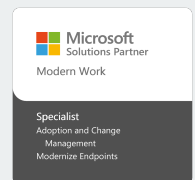

The assessment follows a structured, insight-driven methodology that captures data from your current environment, analyses its financial and operational profile, and models the potential benefits of Windows 365. Throughout the engagement we collaborate with your IT, finance, and security stakeholders to validate assumptions, align priorities, and shape a realistic path forward.

The result is a clear, defensible business case supported by quantified evidence and practical recommendations.

Why choose Advania?

- As an Azure Expert MSP, we have been accredited by Microsoft for consistently delivering the highest level of Azure expertise and successful workplace outcomes.
- A Solutions Partner for Microsoft Cloud (including Modern Work, Infrastructure and Security), with specialisations including Modernise Endpoints and Azure Virtual Desktop, for Cloud PCs and endpoint management.
- Certified Windows 365 and Intune expertise, with MVP-led leadership in secure endpoint operations and adoption.
- Since the launch of Windows 365, Advania has supported clients in delivering flexible, user-centric experiences.
