

Microsoft Windows 365 Envisioning and Proof of Concept (POC)

De-risk with Windows 365 for hybrid work

Hybrid work has stretched traditional PCs and legacy VDI, raising cost, complexity and risk. Windows 365 provides a personal, secure Cloud PC that's easy to administer with Microsoft Intune, keeps data in the Microsoft Cloud, and simplifies onboarding and offboarding across devices.

Advania's low-risk, time-boxed POC/pilot validates the Cloud PC experience with your users, apps and controls in your environment. We scope the pilot against agreed personas and security needs, configure representative Cloud PCs, connectivity and policies, and support IT and pilot users throughout.

You receive evidence on user experience, performance, security and operations plus a clear recommendation, adoption roadmap and indicative costs for wider rollout (or alternatives).

What's included

- ✓ Assessment and pilot design aligned to your business, personas and security requirements.
- ✓ Configuration of a representative set of Windows 365 Enterprise Cloud PCs, images and policies in Intune/Entra ID.
- ✓ Integration with identity, Conditional Access, Microsoft Defender, networking and key applications as required.
- ✓ Guided onboarding for pilot users and IT, with expert support during the trial period.
- ✓ Measurement of user experience, performance, security signals and administrative effort, with regular checkpoints.
- ✓ Final report covering findings, risks, recommendations and a roadmap for broader rollout, including indicative costs.

The Windows 365 Envisioning and POC from Advania is **FREE for qualifying customers**.

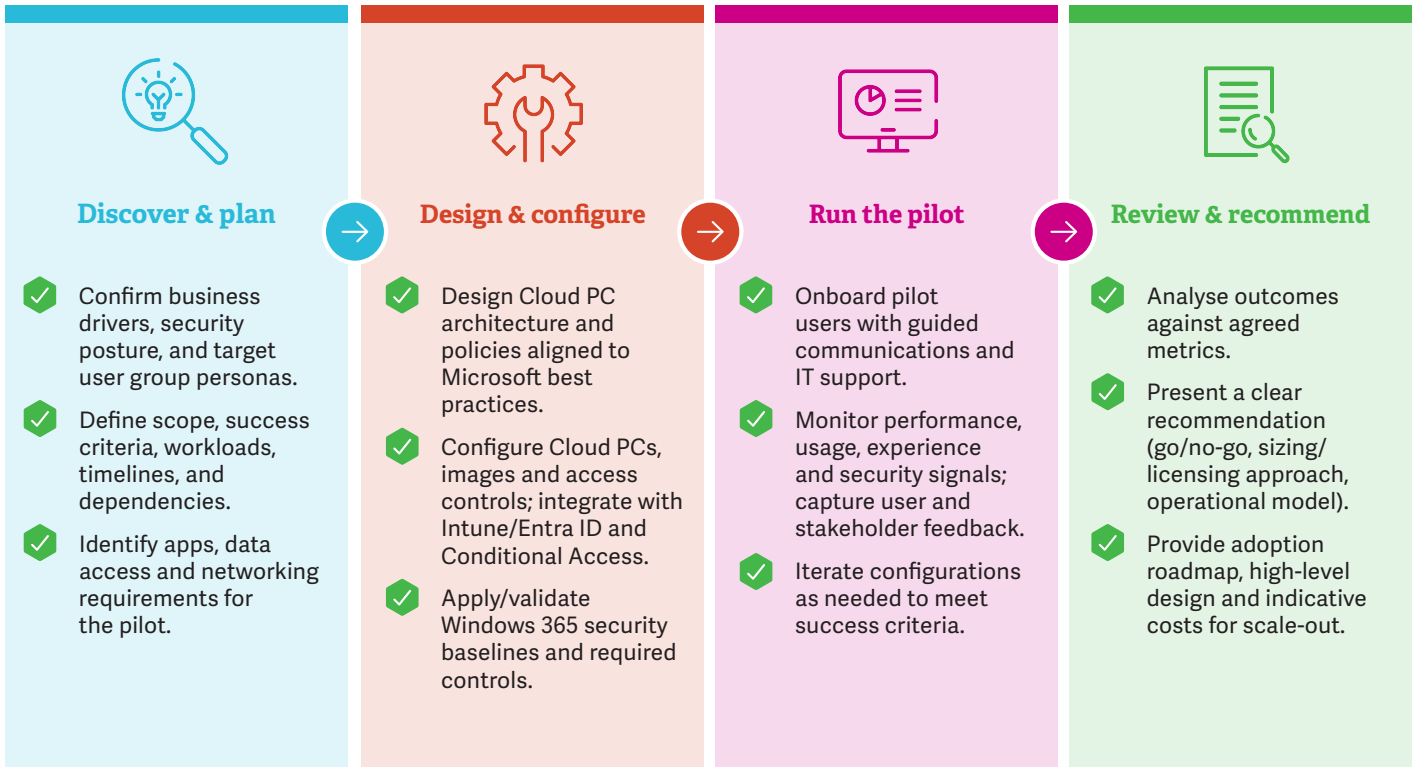

Let's talk.

A structured, low-risk proof of concept that ends in a clear decision

We start with focused discovery and pilot design, then configure Cloud PCs and policies aligned to best practice and your security posture. Through a time-boxed run, we support users and IT while monitoring experience, performance and compliance. The engagement concludes with evidence-based recommendations and a practical roadmap for adoption at scale.

Why choose Advania?

- As an Azure Expert MSP, we have been accredited by Microsoft for consistently delivering the highest level of Azure expertise and successful workplace outcomes.
- A Solutions Partner for Microsoft Cloud (including Modern Work, Infrastructure and Security), with specialisations including Modernise Endpoints and Azure Virtual Desktop, for Cloud PCs and endpoint management.
- Certified Windows 365 and Intune expertise, with MVP-led leadership in secure endpoint operations and adoption.
- Since the launch of Windows 365, Advania has supported clients in delivering flexible, user-centric experiences.
