

Leah Legal

SECURE, LEGALLY TRAINED AGENTIC AI

Accelerate your legal processes with Leah Legal, a conversational AI-powered solution built by lawyers for legal teams. Leah Legal automates routine legal tasks with agentic AI, freeing up your teams to focus on high-value work.

MULTIPLE AGENTS. ONE INTELLIGENT PROCESS.

Power your legal team with intelligence, automation, and strategic agility.

Draft

Leah makes legal drafting faster and more accurate by intelligently using your templates, prior agreements, and knowledge sources to guide the process. Leah helps you produce accurate, consistent, well-formatted documents in a fraction of the time - from case summaries and regulatory updates to contracts and memos - highlighting what's missing and suggesting what comes next. You can start from scratch or build on what you already have, and Leah will walk you through each step, generate polished drafts, and keep everything compliant and aligned.

Analyze

Extract clauses, parties, and key data points instantly to reveal insights, gaps, and relationships across all your documents at once. With analysis tailored to your workflows and industry requirements, your teams get precise, relevant, and actionable results that accelerate decision-making. And with sourced insights, visual patterns, and comprehensive cross-document analysis, they gain the transparency and confidence needed to move faster with clarity.

DeepSights

Transform complex data into clear dashboards and visuals that update in real time. Leah gives you instant visibility into productivity, ROI, and cost savings with out-of-the-box dashboards that track performance across legal tasks. You can customize metrics, reference costs, and visualizations to reflect your organization's needs, and build live, interactive dashboards that refresh automatically - making it easy to explore data, spot trends, and share insights effortlessly.

Contract Review

Simplify contract review with AI that helps you quickly review, summarize, and redline agreements in one intuitive interface. Just upload a contract to get instant analysis, clear summaries, and risk insights, and easily spot missing, ambiguous, or unusual clauses to keep reviews consistent and compliant across teams. Collaboration becomes effortless with shared visibility, contextual explanations, and interactive prompts that guide clause-specific redlines and clarifications.

Drive

Turn unstructured data into searchable, actionable intelligence, and get insights directly from your document repository through a simple conversational interface. Leah ingests, classifies, and analyzes your legal documents to turn them into structured, insight-ready data. Automatically summarize, extract, and visualize key information so your documents become clear, actionable insights. And with natural, topic-based queries, you can instantly surface trends, key clauses, and recommendations across your entire library.

Helpdesk

Get quick, reliable answers to legal and policy questions by giving every business user on-demand access to your company standards, negotiation playbooks, and compliance guidance. With an AI-powered legal helpdesk, users receive accurate, policy-aligned responses and guided recommendations that support informed decision-making. And because the system is customized with your internal knowledge base, the guidance is always precise, context-aware, and tailored to your organization.

Legal as the Business Accelerator

30%

WEEKS

Drive Insights

Global VC Firm cut a 26-week job of gathering key data from various investment agreements down to 2 weeks.

WHAT SETS LEAH APART

Leah delivers powerful agentic AI through an easy-to-use interface designed specifically for legal workflows, terminology, and deliverables. This makes AI seamlessly usable for legal professionals.

- ✓ Concurrent Analysis brings speed, scalability, comprehensiveness and context to document review and discovery.
- ✓ Cross-File Referencing promotes transparency, accuracy, accountability, and contextual understanding when extracting insights across multiple documents.
- ✓ Custom Queries enable precisely tailored searches that provide users with more control, efficiency, and depth in extracting highly relevant insights from legal documents.
- ✓ Expanded Capacity allows maintaining speed, detail, and comprehensive insight, even for large-scale legal discovery and analysis. This enables uncovering subtle connections in big data and provides limitless detailed responses.
- ✓ Unlimited Responses allows AI systems to deliver truly comprehensive, detailed, and transparent analysis on even the most complex legal issues without artificial constraints. This ensures access to complete insights.

DEVELOPED BY LAWYERS, OPTIMIZED BY AI EXPERTS

Legal experts provide domain knowledge for training data and algorithms.

Ongoing performance refinement by data scientists.

Training emphasizes ethics, confidentiality, and compliance.

Transform legal work.
Achieve more impact with less compromise.
