

epiq focus

Mitigate risk. Reduce cost. Take control.

What we offer

Office 365 is a powerful platform for ensuring an organization is meeting its compliance and eDiscovery demands. However, most organizations lack the know how or desire to perform the complexities associated with compliance and eDiscovery requirements.

For organizations that are still deciding whether Office 365 is the right solution for them; to those who have invested and migrated to the cloud but compliance concerns are slowing down utilization; to those ready to learn about the new eDiscovery capabilities available in the E5 license – Epiq is here to help. Our consultants help legal teams feel comfortable moving to Office 365 and our engineers work with IT teams to create a migration plan to ensure success.
