

CLOUD *Journey*

Your roadmap to the cloud

**Controles
Empresariales**

Cloud Journey helps you select the best cloud adoption model for your business' needs and guides you through the implementation process.

We support your organization to adopt cloud services correctly, adequately and aligned with the desired vision and objectives. Along the process we advise the client in the best way to adopt the cloud, optimizing resources and income, while boosting innovation and business growth.

Why choose **Cloud Journey**?

Every business can benefit from our Cloud Journey, regardless of the stage in the adoption process that they are in:

- If your business is still wondering about adopting the cloud, but has not decided the best way to do it, we help you decide your roadmap and support you through the process.
- If your business is already prepared to migrate to the cloud, we can guide you through the process to minimize the impact and guarantee implementation times.
- If your business already has a cloud, we can help you manage it, optimizing its usage and ensuring that you are getting all the benefits, without unnecessary expenditure.

Benefits of **Cloud Journey**

- Increase productivity
- Remote availability of information
- Secure and trustworthy information
- Costs and ROI optimization
- Minimizing migration impact and times
- Aligning Cloud strategy with business objectives
- Strategic focus of IT department
- Centralizing cloud support services

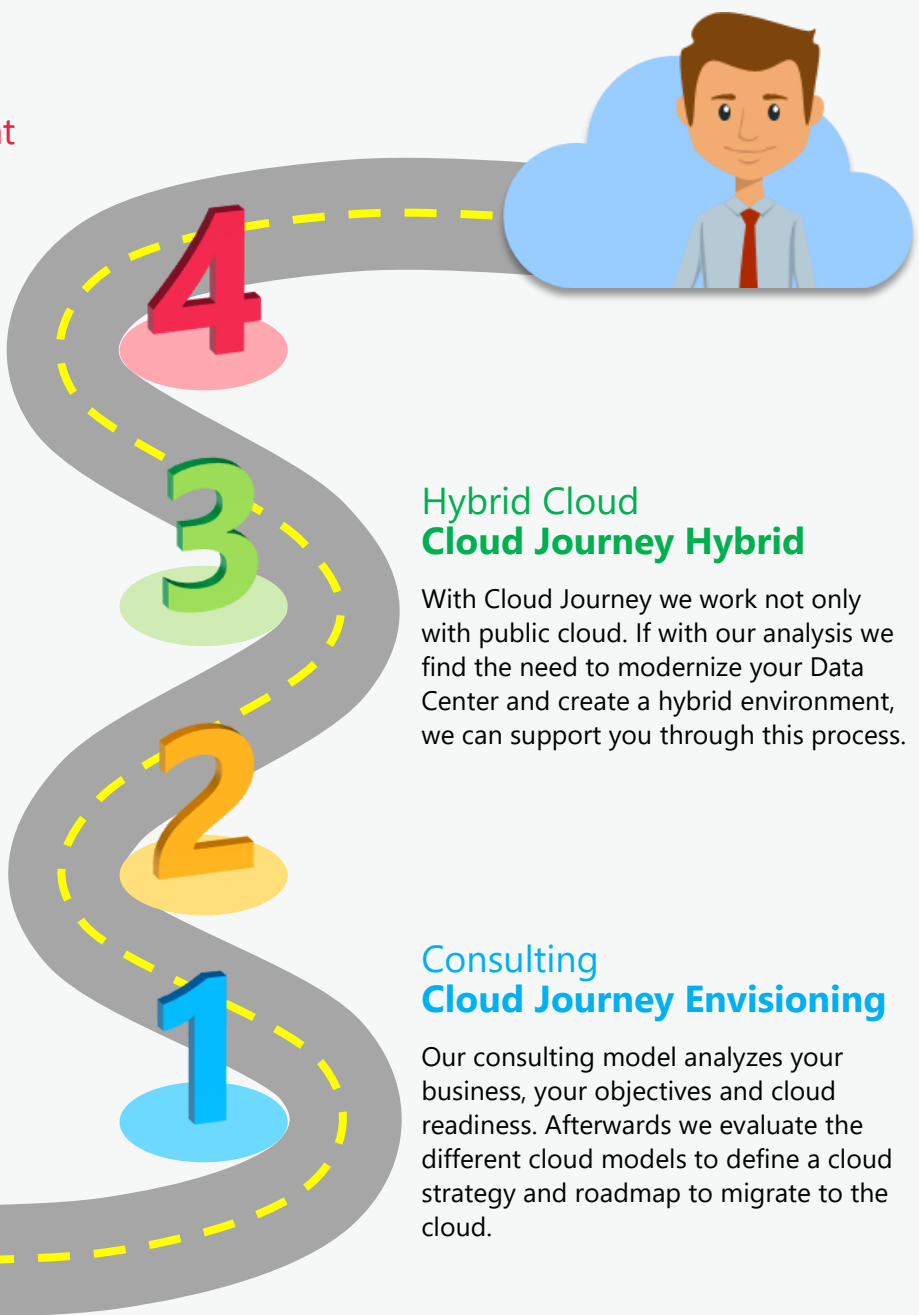

What can be achieved with **Cloud Journey**?

Consumption and Management **COEM Connect**

In Controles Empresariales we understand that adopting the cloud is not the end of the process. Managing and optimizing the cloud represents a great workload. Our management model constantly monitors the service and suggests opportunities to improve your return.

Implementation Services **Cloud Journey Provisioning**

Before starting the migration process, we generate an implementation plan, to guarantee times and minimize incidents that can arise through the process.

Experience and **Specialized Personnel**

Controles Empresariales has the expertise in implementing cloud workloads and specialized personnel that will advise you on the best architecture, the workloads that should move to the cloud and the ones to keep on-premise. Our methodology and processes are based on our experience and best practices.

We guarantee that the solution we will offer you is designed exclusively for your business and needs.
