ControlUp for Azure Virtual Desktop

Take charge of your VDI with ControlUp and Microsoft Azure Virtual Desktop

ControlUp Real-Time DX is a software-as-a-service (SaaS) platform offering Azure Virtual Desktop and other virtual desktop infrastructure (VDI) workloads comprehensive visibility into their environment. With real-time monitoring, troubleshooting and remediation capabilities, ControlUp transforms the way IT manages systems.

Why companies need ControlUp

70% Of workers want flexible remote work options to continue. [1]

20% Of employees felt supported when troubleshooting tech.[2]

Customer case study

Rio Tinto, the worlds second-largest metals and mining corporation, monitors 6,000 unique users and 2,200 concurrent daily sessions. They were looking to clean up user profiles and optimize their environment. ControlUp helped Rio Tinto realize a 33% cost savings and assisted in their Citrix-to-Azure Virtual Desktop migration.

"Rio Tinto is a big company… Now we have AVD on top of it. With ControlUp, I can monitor everything. I use it as a single pane of glass to see the whole environment in general and how we are doing."

Iaroslav Aleksyuk | Cyber Security Specialist, Rio Tinto

Customer benefits

Some of the ways ControlUp adds value to Azure Virtual Desktop environments:

- Improves the user experience.
- Ensures system health and availability.
- Helps reduce the cost of Azure deployments.

Who is Real-Time DX for?

Virtual desktop infrastructure (VDI), Azure, and Azure Virtual Desktop:

- IT Administrators
- IT Decision-Makers
- Business Decision-Makers

Real-Time DX is also great for customers with:

- Citrix Virtual Desktops & Apps and Citrix DaaS
- VMware Horizon

Customized Azure Virtual Desktop management

ControlUp offers 1,000's of real-time session metrics, out-of-the-box scripts and actions, and performance improvement automations. It also provides visibility into your end-user's network performance with Remote DX.

Proactive health & availability monitoring

Includes continual availability testing of Azure Virtual Desktop and Azure AD, proactive alerts, and a single-pane-of-glass of Azure and machine health metrics to allow IT Admins to identify issues before they reach the help desk.
