Turning A.I. "Talk" into a Live Pilot Environment

- ⊖ Microsoft provides AzureAI/ChatGPT services that is native to Azure
 - ⊖ The instance is private / specific to your organization pointing to your data
 - ⊖ The process:
 - ⊖ Takes 2-3 days to setup
 - ⊖ Identify a business use case with associated data
 - ⊖ Load the data into Azure A.I.
 - ⊖ Support users in asking "good" questions
 - ⊖ (end to end, a 2-3 week process)
 - ⊖ My company (Convergent Computing) hands-on builds the environment, assists in identifying an initial use case, helps with data sanitation, and works with users to formulate the "good" questions to ask
 - ⊖ Under \$10k in Professional Services | \$350/mo in Azure consumption cost | Start to finish 2-3 weeks
- Get familiar with A.I. firsthand than rely on just what you hear and read...
- *** To start a AzureAI/ChatGPT Pilot (or for more info): seminar@cco.com ***

Questions Business Execs are Asking of their AzureAI/ChatGPT system

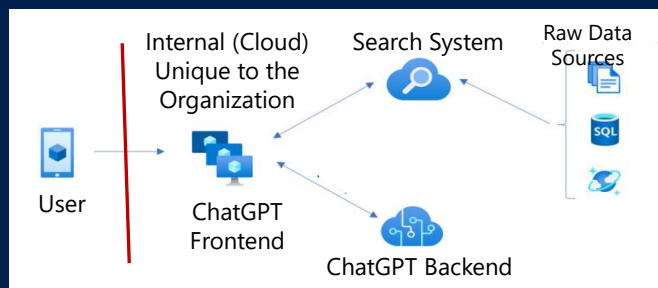

- “Based on last month’s financial results and our rolling 6-month financial data, write a statement on our financial outlook and projections for the next 6-12 months”
- “How many (xxxx) cars can we manufacture given our current and 60-day confirmed incoming inventory over the next quarter? What components do we lack sufficient inventory to produce whole vehicles? Compare production and current orders and demand trends, what insights can be derived?”
- “Comparing the clinical trial results over the past 3, 6, 12, and 18 months, what projections can be made on the success rate of this drug treatment over the next 6-12 months?”

3

AzureAI/ChatGPT is a Microsoft Azure Service

- ⊕ Your users (or your business application)...
- ⊕ ...talks to a ChatGPT Frontend (for users, it would be a Web page they can ask questions to (similar to a Google or Bing search bar))...
- ⊕ ...AzureAI/ChatGPT goes out to Azure Search and the Azure Backend system to query YOUR data (SharePoint folder, SQL database, Salesforce, Dynamics, ServiceNow, etc) and provides your user (or application) a response.

4

The Most Important Factor of AzureAI...

⊖ YOU determine WHO has access to WHAT information
