

Connectivity

CxC Flex Direct

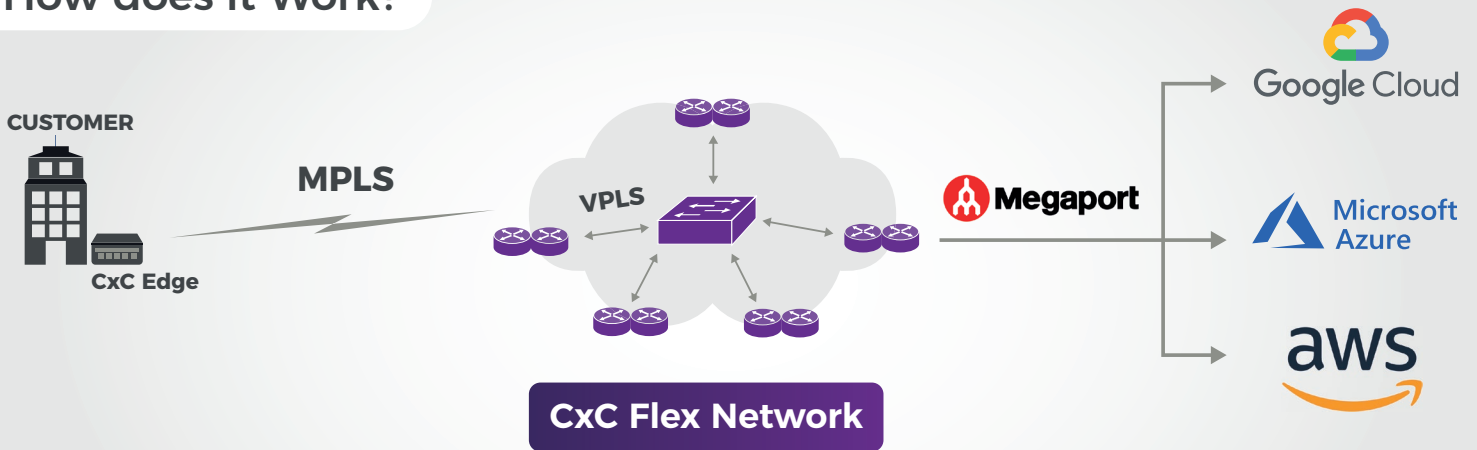

Fast, Fortified and Flexible Connectivity to the cloud

What is CxC Flex Direct?

Establish direct connection to all cloud services without using the public Internet, offering faster speed, lower latency, high reliability, stronger security and lower data cost

How does it Work?

1. A Last Mile CxC Flex Network with direct connection to CPE

2. Convergia Flex Network for fast, flexible, fortified data transit

3. We connect directly to all major cloud providers

Connectivity by **Convergia**

Competitive Advantages

1 Direct and private connection

- Public internet is not used
- Customer data is secure all the time

2 Safe Connection

- No routing through an unknown server

3 Connect directly to on-premises networks

- Servers deployed on Cloud are part of the private network, adding computing and storage capacity to existing datacenters with high connection speed

4 Supported bandwidth up to 10 Gbps

5 Lower latency

The Industries CxC Flex is best suited for:

Financial Industries

Deploying hybrid solutions and **transferring large amounts of transactional data** between Cloud applications and on-premises data repositories need the security and reliability of CxC Flex

Agroindustry

Business intelligence solutions **moving big data to the Cloud** needs the speed and the security of CxC Flex, so they can analyze the patterns that are hidden in the data and insure a better harvesting time

Health Sector

Capturing and processing lots of images and videos will achieve a time reduction during their upload, and their costs, thanks to CxC Flex higher **speed and no cost for uploads**

Insurance Companies

Managing large volumes of highly **classified information** will benefit from CxC Flex's superior level of security

Manufacturing Industries

Deploying big data applications with **video recognition to detect defective parts**, or delays in the processes will benefit from the speed and processing capacity of the cloud, and the reliability, and speed, of CxC Flex to upload the data
