

Converture AI Transformation Office

Assess readiness. Build the roadmap. Govern execution. Measure value.

Move from scattered AI experiments to a structured, governed transformation program. The platform combines an explainable maturity assessment with recommendations, a 30/60/90-day roadmap, initiative management, and KPI tracking for leadership teams.

1 Maturity Assessment

Seven dimensions, weighted questions, explainable 1-5 scoring, and assessment history.

2 AI Guidance

Executive summary, strengths, weaknesses, and prioritized recommendations.

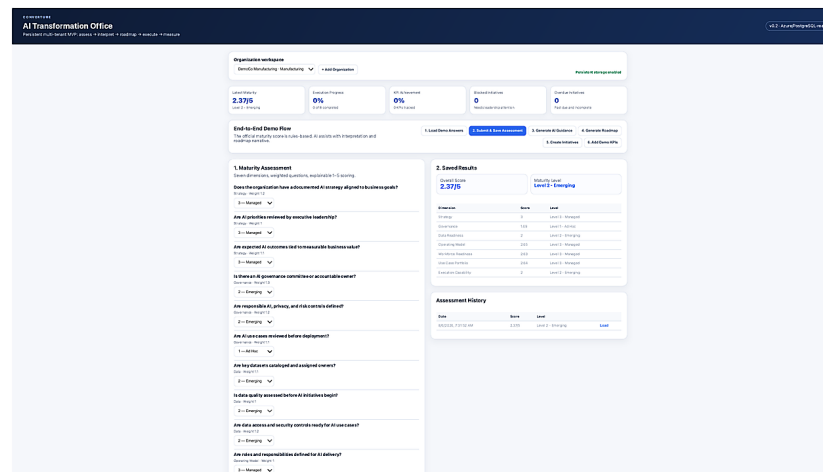

3 Roadmap Generator

Structured 30/60/90-day actions aligned to readiness gaps and business priorities.

4 Execution + KPIs

Owners, milestones, risks, progress, blocked items, and measurable outcomes.

Executive maturity and transformation workspace

From assessment to governed execution

Converture Inc.

Guidance, roadmap, execution, and KPI tracking

The screenshot displays the Converture AI Transformation Office dashboard. It is divided into several sections:

- 3. AI Guidance & Recommendations:** Includes a provider status alert, an executive summary of the organization's AI maturity score (2.3/5), strengths, weaknesses, and top recommendations.
- 4. 30/60/90-Day Roadmap:** A table showing tasks, timelines, and priorities.
- 5. Execution Tracker:** A table for tracking the progress of various initiatives.
- 6. Executive Notes:** A section for notes and updates.
- 7. AI Maturity Model:** A section for tracking the organization's AI maturity score.

Timeframe	Workstream	Action	Priority
0-30 days	Data	Identify and assign owners to datasets required by the top candidate AI use cases	High
0-30 days	Execution	Create an AI initiative register with owners, milestones, risks, and KPIs	High
0-30 days	Governance	Assign an AI governance owner and establish a monthly review cadence	High
31-60 days	Data	Run data quality and access readiness reviews for prioritized use cases	High
31-60 days	Governance	Assign a responsible AI, privacy, security, and human oversight champion	High
31-60 days	People	Launch role-based AI awareness and responsible use training	Medium
61-90 days	Execution	Introduce a monthly AI transformation performance and benefits review	Medium
61-90 days	Risk	Launch a controlled AI pilot with approved data, governance points, an accountable owner, and measurable KPIs	High

Initiative	Owner	Status	Risk	Due	Progress	Save
Identify and assign owners to datasets required by the top candidate AI use cases	OO	Not Started	Medium	09/05/2025	0%	Save
Create an AI initiative register with owners, milestones, risks, and KPIs	AI Transform	Not Started	Medium	09/05/2025	0%	Save
Assign an AI governance owner and establish a monthly review cadence	Data Lead	Not Started	Medium	09/05/2025	0%	Save

For enterprise transformation teams

- Leadership visibility across readiness, priorities, risks, and progress
- Rules-based official scoring with transparent maturity results
- Structured actions that turn assessment gaps into an execution plan
- Persistent organization workspaces backed by Azure PostgreSQL
- Azure-ready architecture with a portable application and provider design

Current delivery model

Controlled enterprise pilots. Authorized users sign in with Microsoft Entra ID. Converture defines the pilot scope, onboarding, access controls, assessment objectives, and measurable outcomes with each organization.
