# WE MAKE YOUR DATA WORK

CONWEAVER

Imagine
a fully ...

... integrated
corporation.

AGGREGATION

- Accelerate business processes
- Aggregate key figures across models or series
- Deliver JIT information for research and decision making
- Traverse dynamically linked information
- Stay informed with change agents or object subscriptions

INTEGRATION

- Leverage existing application infrastructure
- Supply additional in-context information
- Integrate inside 3rd-party applications
- Calculate and visualize impact of modification

DISTRIBUTION

- Analyse, update and observe data across warehouses
- Extend and enhance existing object information
- Bolster corporate information systems
- Automatically link and distribute data between databases and information systems

INNOVATION

- Speed up manual processes
- Provide highly connected innovative Apps
- Personalized apps and work items
- Interactively relate business objects
- Manage and match BOMs

Think of CONWEAVER as an intelligent umbrella bridging your data, departments or sites - no matter how structured or distributed - without altering any existing software or company architecture. This semantic middleware provides for a knowledge network through dynamic linking across system, process and language boundaries, instantly accessible by a click.

Data Transparency Through Dynamic Linking

Optimal Supply of Corporate Processes

Reduction of Process Complexity (cost saving)

Continuous IT-Migration Process (risk minimizing)

More Effective Business Processes (time saving)
