Microsoft365 Copilot
- Extensibility

WHAT

Copilot is a powerful Generative AI assistant that helps you with your daily challenges in an ever-evolving digital environment.

But Copilot is not just a tool for developers. It can also help you transform your business processes, workflows, and outcomes across different domains and industries. Whether you want to automate tasks, optimize performance, enhance customer experience, or innovate new solutions, Copilot can help you achieve your goals with less code and more intelligence.

However, adopting Copilot is not a simple switch. It requires careful planning, preparation, and support to ensure a smooth and successful transition. That's where ConXioN comes in. We are a leading partner for Microsoft 365 solutions, with extensive experience and expertise in Copilot deployment and readiness. We can help you assess your current situation, identify your needs and opportunities, and design and implement a customized solution that maximizes the value of Copilot for your business.

Solution Offer

Get more out of your Microsoft 365 Copilot with custom features that fit your business goals.

Microsoft 365 Copilot lets you work smarter and faster by using AI to handle your tasks without compromising your data or violating any policies.

We at ConXioN are specialists in connecting AI to different kinds of businesses & data. We configure plugins and connectors that link your data to Microsoft Graph and Dataverse, making Copilot more powerful and versatile. We also have industry and persona expertise, certifications, and innovative solutions that set us apart from other providers. We are committed to responsible AI and cloud security, so you can rely on us with your data and information.

To get more out of your Microsoft 365 Copilot, we offer Copilot Extensibility Solutions that address your specific needs.
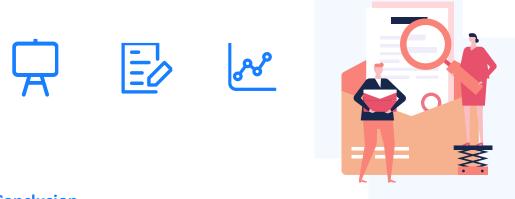

Our Services include:

- **Assessment** - Identifying the key personas and high-value use cases for Copilot extensibility in your organization, analyzing your line of business applications, and planning the required extensions.

- **Implementation** - Developing and delivering an integrated solution within the Microsoft 365 Copilot ecosystem using the best Generative AI technology.

- **Validation & Adoption** - Ensuring you get the benefits from the new features and training your users how to use them.

Let us use our skills and experience with Generative AI and Large Language Models to enhance your Copilot experience.

The price varies based on the scope and complexity of the project.

Conclusion

We believe that our solution offer is the best fit for your needs and goals. We have the experience and expertise to help you leverage the power of Copilot for your business. We have the resources and capabilities to deliver a high-quality solution that meets your standards and expectations. We have the passion and commitment to ensure your success and satisfaction with Copilot.

We look forward to working with you on this exciting and transformative project. Please contact us if you have any questions or feedback on our offer. Thank you for choosing ConXioN as your partner for Copilot adoption.
