

# Concept Study – Dynamics 365 Business Central

## WHAT

ConXioN is a leading IT partner that helps customers optimize their business with the right IT solutions. We specialize in Microsoft 365 and Dynamics 365, including Business Central, a powerful and flexible ERP system that supports and integrates all business processes.

Microsoft Dynamics 365 Business Central is a cloud-based ERP system that helps you to make your business more efficient and profitable. With Business Central, you can manage your finances, sales, purchasing, inventory, manufacturing, projects, service, and more from a single platform. You can also easily integrate with other Microsoft applications, such as Office 365, Power BI, and Power Apps, to streamline your workflows and analyze your data. Additionally, you can take advantage of Business Central's innovative features, such as artificial intelligence, machine learning, and predictive analytics, to make better decisions and increase your competitive advantage.

We understand that moving to a new ERP system is a big decision that requires thorough analysis and preparation. That is why we offer a concept study, in which we map out your current situation, needs and objectives together with you and propose a tailor-made solution.

# Concept Study – Dynamics 365 Business Central

## A concept study consists of the following steps:

- An intake interview with our business consultants, in which we ask more than 200 questions about your business processes, strategic vision and reporting needs.
- A visit to your production and/or warehouse environment, if applicable, to observe your logistical and operational operations.
- A gap/fit analysis, in which we identify the gap between your current and desired situation and explain the possibilities of Business Central.
- A budget proposal, in which we make a realistic estimate of the costs and time needed to implement Business Central.
- A to-do list, where we give you tips and advice to prepare for the implementation and the changes that come with it.
- A demo, if possible, where we give you a taste of what Business Central would look and work like for your organization.

The results of the concept study will give you a clear picture of what Business Central can do for you and how you can make the switch. You can also compare other ERP vendors based on the same criteria. We are convinced that Business Central is the best solution for your company and that ConXioN is the ideal partner to guide you in this process.

The concept study price is determined by the number of processes that will be discussed such as Accounting, Production, Logistics, Service management and other business processes.

If you are interested, please contact us to make an appointment. We look forward to working with you!
