Strategic Portfolio and Project Management Software
For Enterprise Organizations
The Power of Predictability

Who We Are and What We Do

The Cora platform delivers Strategic Portfolio and Project Management software that gives enterprise organizations real time visibility and complete control and governance over their projects, programs and portfolio.

With offices in the US, UK and Ireland, we work with customers in more than 50 different countries to help them manage projects worth over $100 Billion.

Operating in every sector of manufacturing and throughout the services industry, our customers include: Honeywell, Automated Logic, Boston Scientific and AbbVie.

Our customers use the Cora platform to consolidate their data, streamline processes and maximize their margins and revenue.

The Value Cora Delivers

Cora provides enterprises with the power of predictability by consolidating project and program data, standardizing processes and connecting costs, resources and budgets. This gives you visibility and control over your financial performance.

A dedicated customer success team works with you to drive best practice and to ensure you get the maximum value from the platform and its solutions.

Enterprise-wide Visibility and Consistency

Digitize your portfolio, programs and projects and streamline your processes to create a standardized work process that delivers operational efficiencies across the enterprise.

Controlled Governance and Compliance

Get complete control and governance across your programs and safeguard your enterprise with secure document management, logical workflows and automatically generated audit trails.

Better Margins and Profitable Growth

Ensure projects and programs are delivered on time and on budget by optimizing your resources and deploying your workforce more effectively, to increase growth, boost profits and maximize margins.

Control Tower

Actionable Insights Across Your Enterprise

Cora connects complex ecosystems, streamlines processes and centralizes data providing the complete control, governance and insight required to track performance and protect margins, effortlessly, from quote to cash.

Cora Delivers Measurable Results

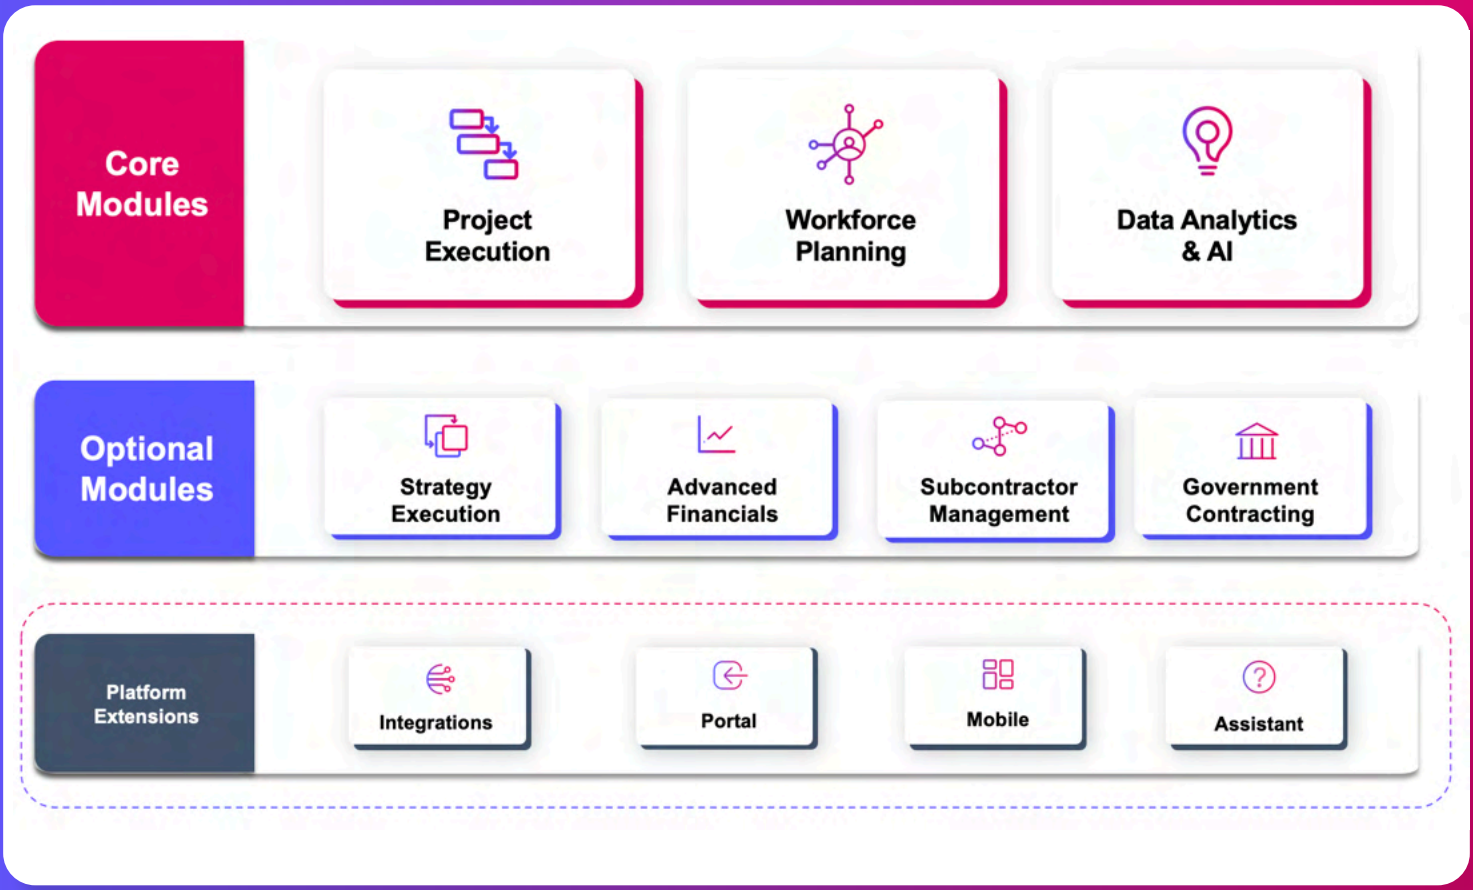
One Integrated Platform

Our versatile software platform meets your every need. The core modules provide the PPM essentials to automate your project management office, giving you the ability to plan, execute and evaluate your projects and programs.

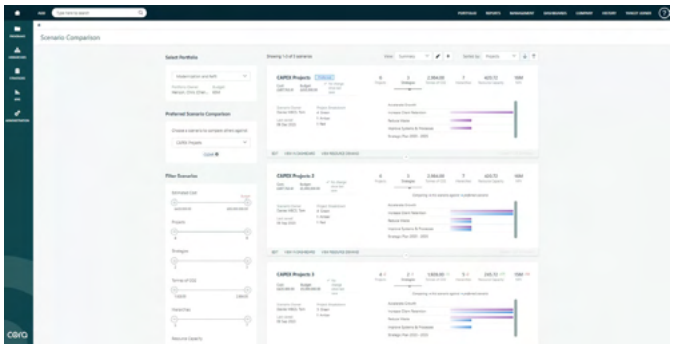
A suite of optional modules provide you with an SPM solution to optimize strategic capabilities and track progress. While giving you the tools to improve project selection and prioritization, and measure benefits against your business plans.

Your data is consolidated, your processes are streamlined and all your business units are connected, ensuring your data is reliably consistent.

Everything is seamlessly integrated into one system, giving key stakeholders that bird's-eye view of the portfolio and providing you with actionable insights to protect margins and increase profitability.



Platform Capabilities Include:



The **Strategy Execution** module provides you with scenario comparison tools to explore any number of what-if scenarios, allowing you to visualize potential changes to resource allocation and improve decisions around project selection and prioritization.

The **Project Execution** module gives you a suite of tools that enable you to precisely track and control every stage of your project's lifecycle, and includes Work Breakdown Structures, risks/opportunities management and timesheet and expenses functionality.
