

Azure Accelerate

A Cloud Economics Assessment & Planning Program

Need help determining the right cloud deployment model for your business? Ready to move to the cloud but need insight into ROI and TCO?

Azure Accelerate is designed to operationalize cloud adoption through structured analysis, financial planning, and roadmap development. Working with Blue Chip Consulting Group, a Core BTS company, you can discover the ROI associated with moving workloads into the cloud, as well as build the roadmap to actually do it.

Program deliverables include server insights, financial models and target-state architecture drawings.

Executed in alignment with Microsoft's Solution Assessment Program, this program accelerates Azure adoption by taking the guesswork out of planning and deployment.

Strategy Alignment

Align your business strategy to IT objectives and priorities for cloud adoption

Environment Discovery

Survey your existing environment to determine cloud readiness

Analysis & Planning

Review and analyze data to develop a comprehensive cloud roadmap and deployment strategy

Architecture & Governance

Design your cloud-state architecture and governance model and prepare for migrations
