Hybrid Cloud Security Workshop

Get integrated security for your digital assets

Today, organizations use 76 security tools, on an average. Despite that, there has been a 67% increase in attacks in the last 5 years. Organizations can no longer expect to stay safe by protecting individual areas such as email or endpoints. They need a better security model.

With Microsoft Security, broaden and deepen the scope of security protection and attack prevention with industry-leading technologies.

Prevent with Microsoft Defender for Cloud (MDC)

Get the most comprehensive Cloud Security Posture Management (CSPM) and Cloud Workload Protection (CWP) for all of your Azure, on-premises, and multicloud resources.

Protect with Microsoft Sentinel

Make your threat detection and response smarter and faster with AI running across Microsoft and third-party sources.

- Integrated, comprehensive security
- Coordinated alert and response
- Automated remediation with AI

Take the first step to unlock integrated protection

Understand how you can leverage a single integrated solution for cloud configuration management, alert detection, threat visibility, and incident response to help you strengthen your security posture and continue to take advantage of the cloud.

What's covered

Duration: 3 Weeks   Cost: $35,000

Envision
- Provide a technology walkthrough of MDC and Sentinel.
- Conduct a workshop to provide hands-on engagement on both the tools.
- Connect with the key stakeholders to define key success factors.
- Define the target solution configuration.

Deploy
- Configure the MDC and Sentinel environment in monitor mode only.

Evaluate
- Analyze and evaluate the collected data and socialize the findings.

Review
- Share the final analysis and recommendations on next steps with the leadership.

Core BTS is a leading national Microsoft and Azure Expert MSP. With strong competency in Azure and Modern Work, Core BTS can help you accelerate digital transformation.
