SECURE BY DESIGN

Put security at your core with holistic services from Core BTS.

The cybersecurity landscape is rapidly evolving. It takes a combination of tools, technology, and talent to keep pace, and to protect your business from modern security threats. Not to mention, budget.

Secure by Design combines managed services with technical consulting to form a comprehensive security program that reduces risk, accelerates threat response, and decreases total cost of IT ownership. All while improving your security posture.

It consists of three program offers, each built to simultaneously address technical challenges and business risk. All offers are aligned to the NIST Cybersecurity framework, and CIS controls, giving you the power to defend against modern cyberattacks using industry best practices.

FEATURED SERVICES

- Emergency Incident & Response
- Governance, Risk, & Compliance
- Threat Hunting
- Interactive Reporting
- Vulnerability Management
- Real-Time Threat Monitoring

ASSESS & SECURE

Enhance your security posture. First, we identify security gaps and organizational risk. Then, we develop a roadmap that puts you on a strategic path towards improvement.

MONITOR & MANAGE

Take your security operations to the next level. From endpoint security to third-party risk management, we provide day-to-day monitoring and management to keep your environment protected.

PREPARE & RESPOND

Proactively address evolving threats. We work together to deploy technical solutions that help you defend against adversaries and accelerate response to threats.
