

BLOCKCHAIN FOR BUSINESS

Token Economy Solutions

2024

We provide an enterprise blockchain platform for use in **business applications** across all industries.

Our solutions enable companies to:

OFFER CHEAPER AND MORE COMPETITIVE PRODUCTS AND SERVICES TO THEIR CUSTOMERS

MAKE PRODUCTS AND SERVICES GLOBALLY AVAILABLE, ANYWHERE THERE IS INTERNET

ACCESS NEW CUSTOMER SEGMENTS

DATA IS THE NEW GOLD.

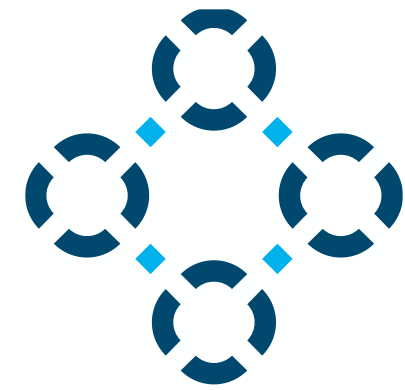

AND BLOCKCHAIN CAN ENSURE YOUR DATA'S VALUE!

THE FOUR ADVANTAGES OF BLOCKCHAIN TECHNOLOGY AT A GLANCE

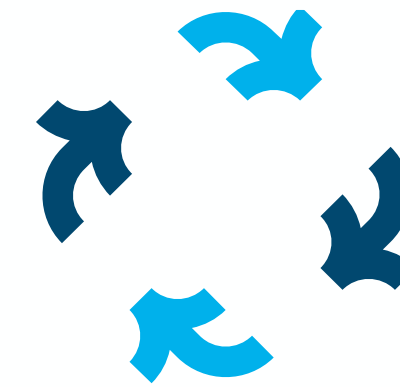

UNFORGEABLE
DOCUMENTATION

DECENTRALIZED
ACCOUNTING

GOVERNANCE
AND COMPLIANCE

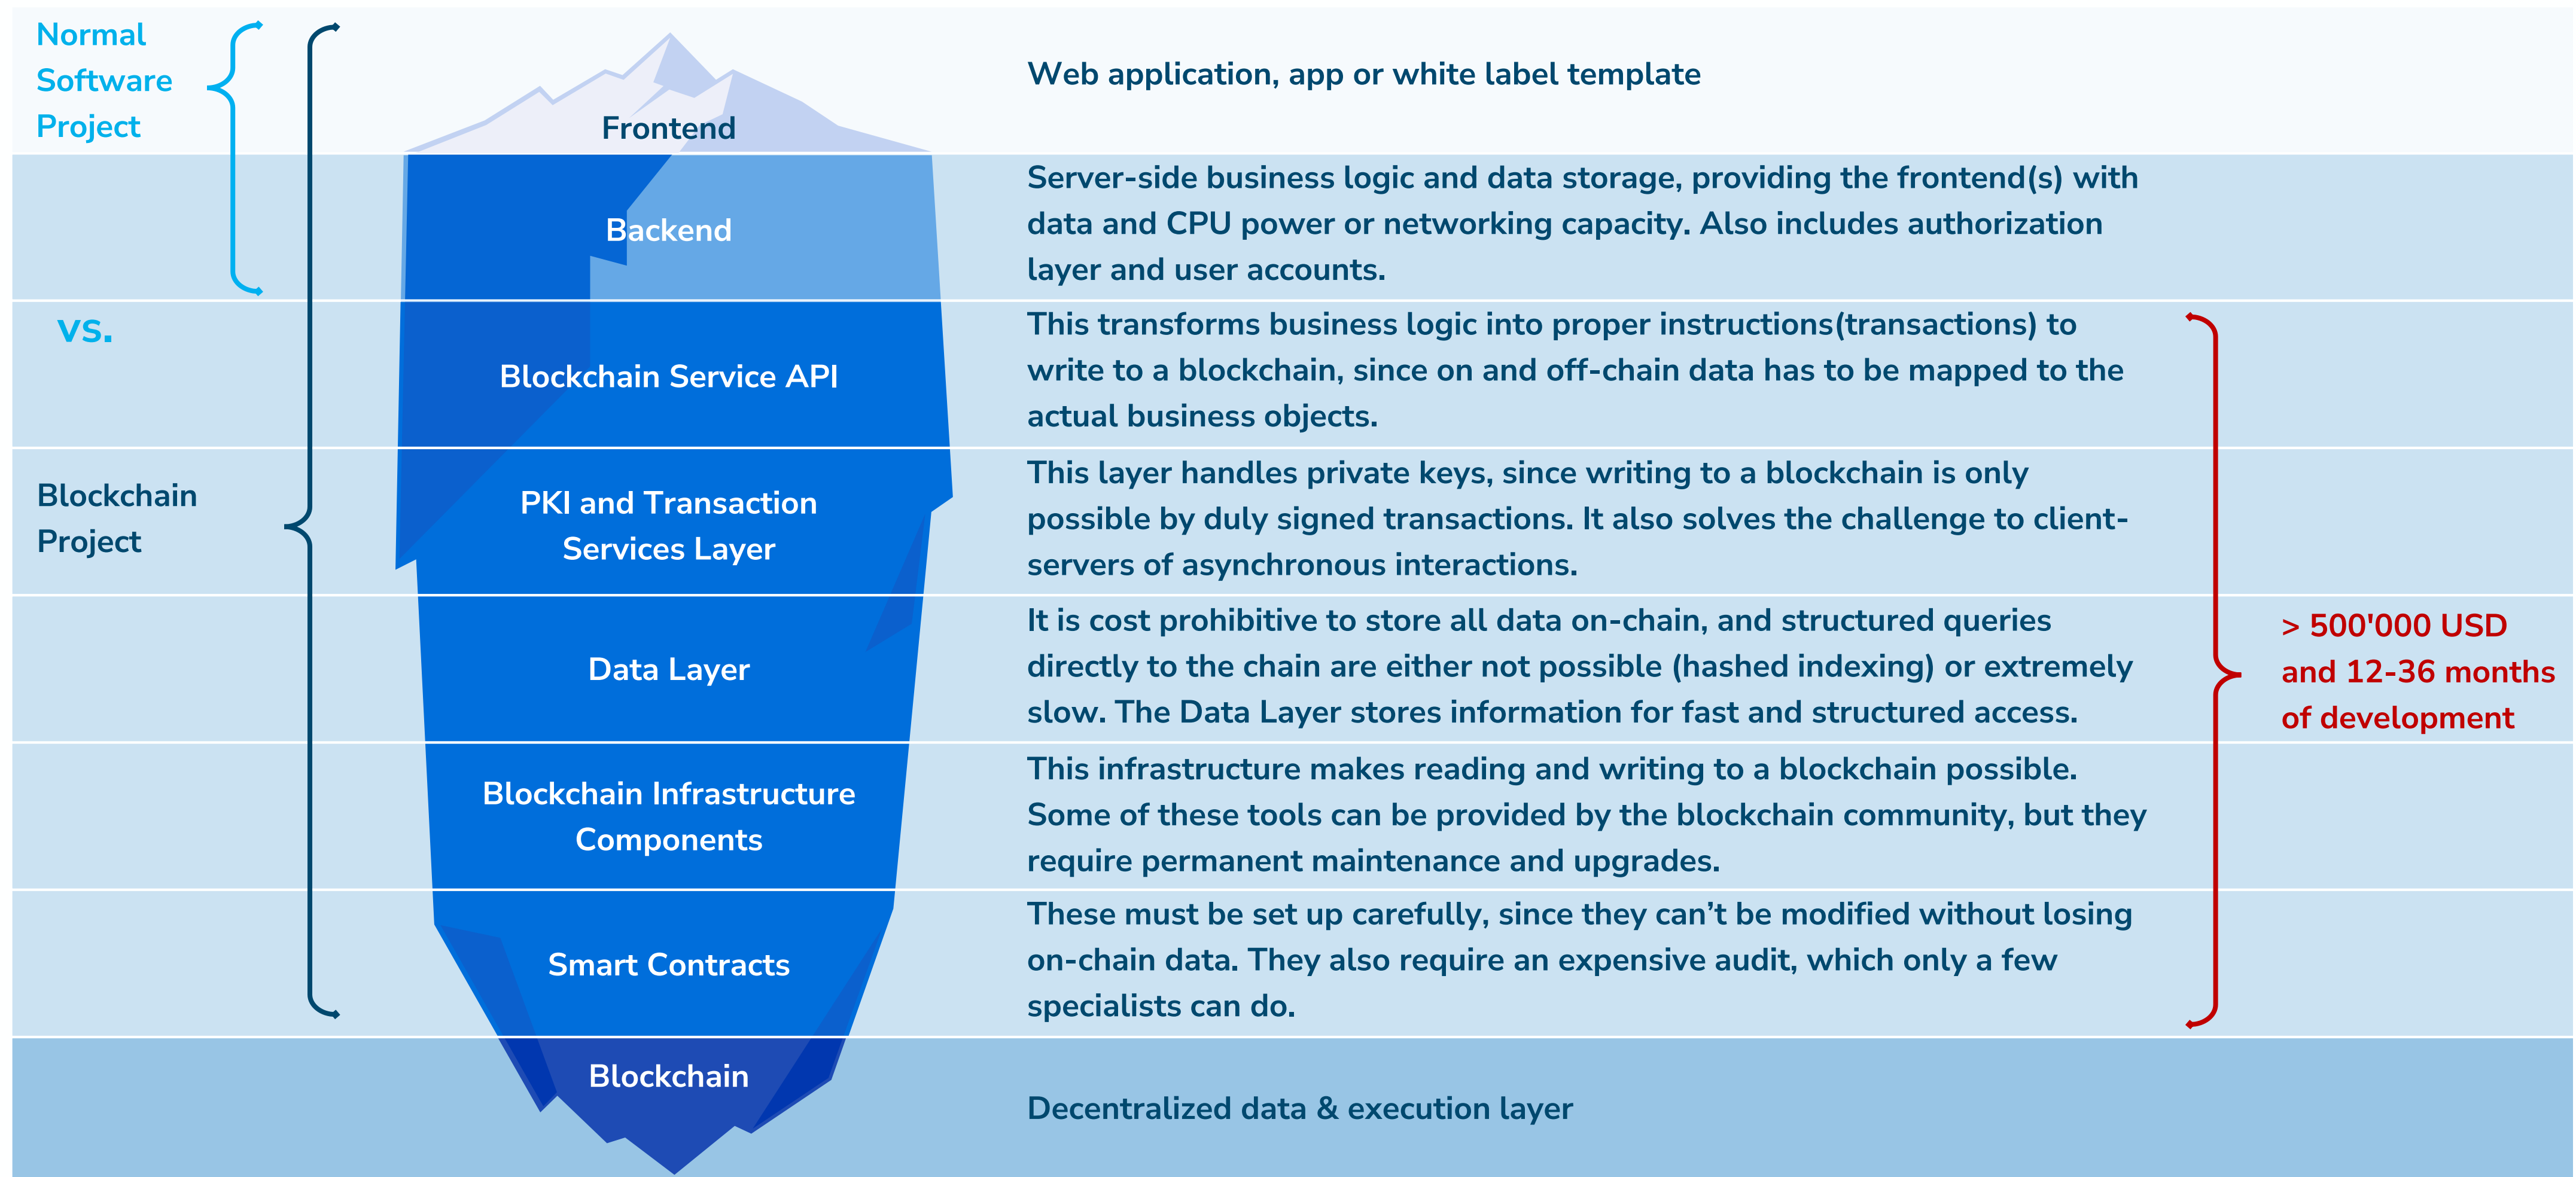

UNIQUE TRADING
ALGORITHMS

We have developed an operating system for blockchain applications with which all four advantages can be easily and inexpensively integrated into almost any business processes:

CoreLedger TEOS (Token Economy Operating System)

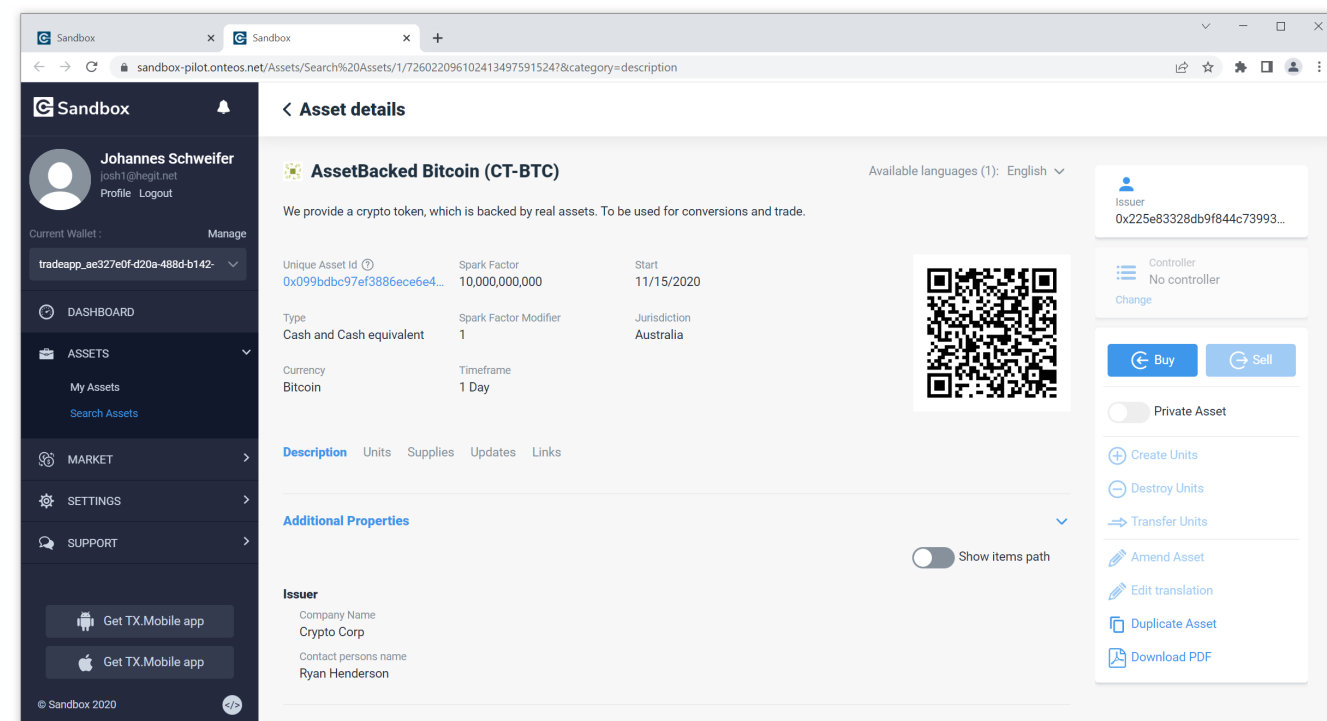

THE PROBLEM THAT WE ADDRESS: BLOCKCHAIN PROJECTS ARE COSTLY!

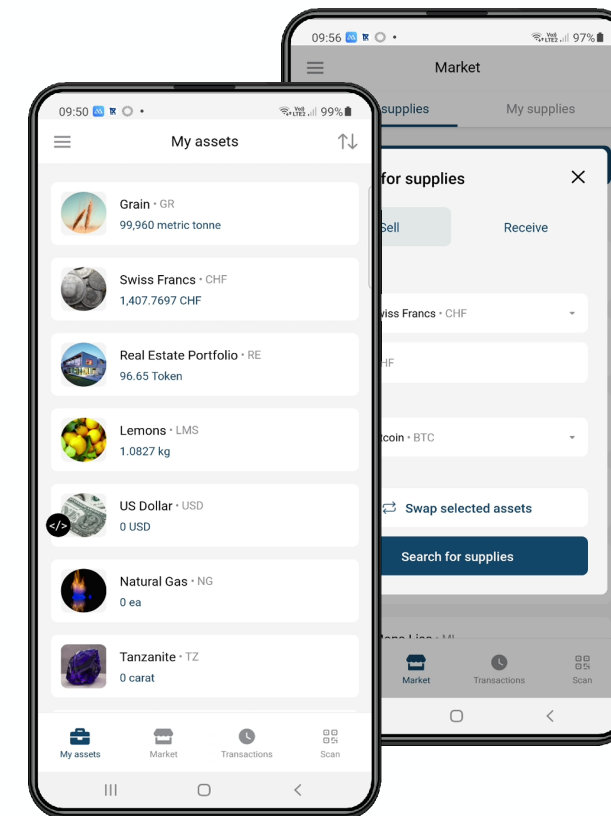

OUR PRODUCTS – TURNKEY READY APPLICATIONS AND COMPONENTS

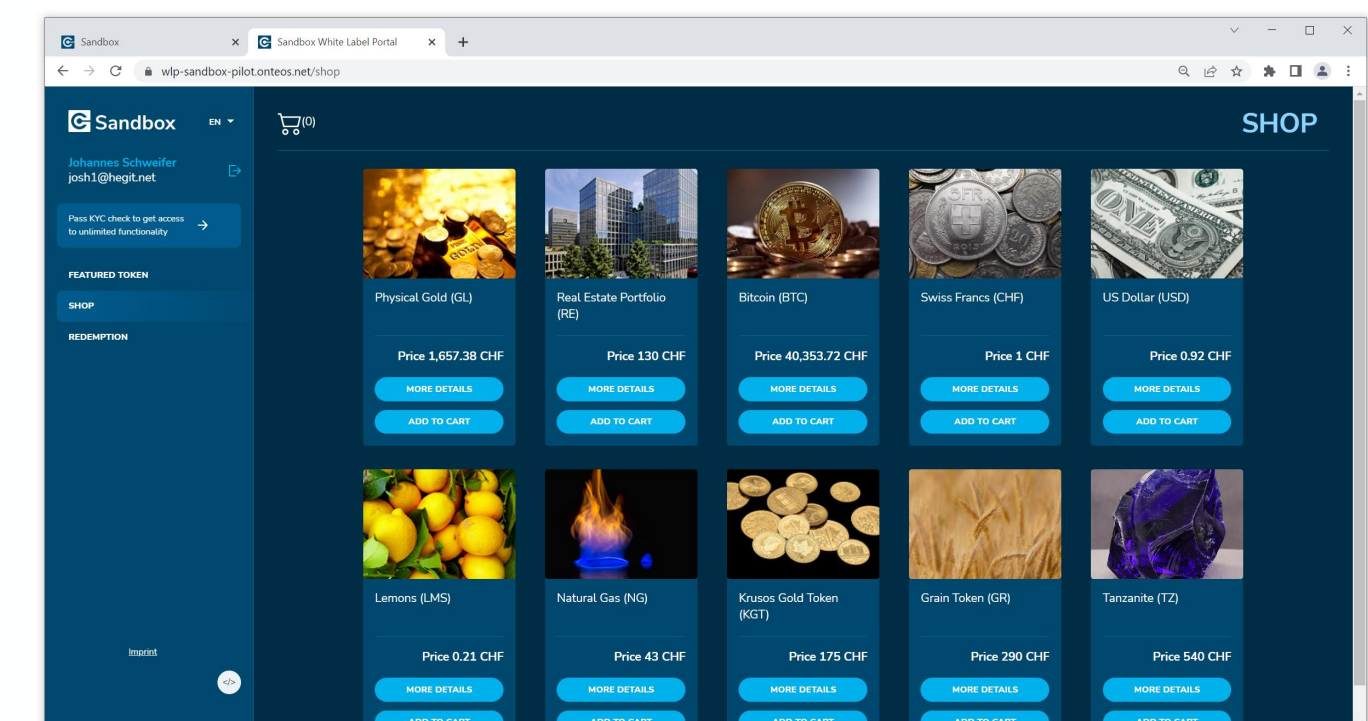

Administration of digital assets, rules (smart contracts) and tokens

Extensible blockchain-app including a DeFi market

Web-solution for OTC trading of digital assets

White Label Management Tool

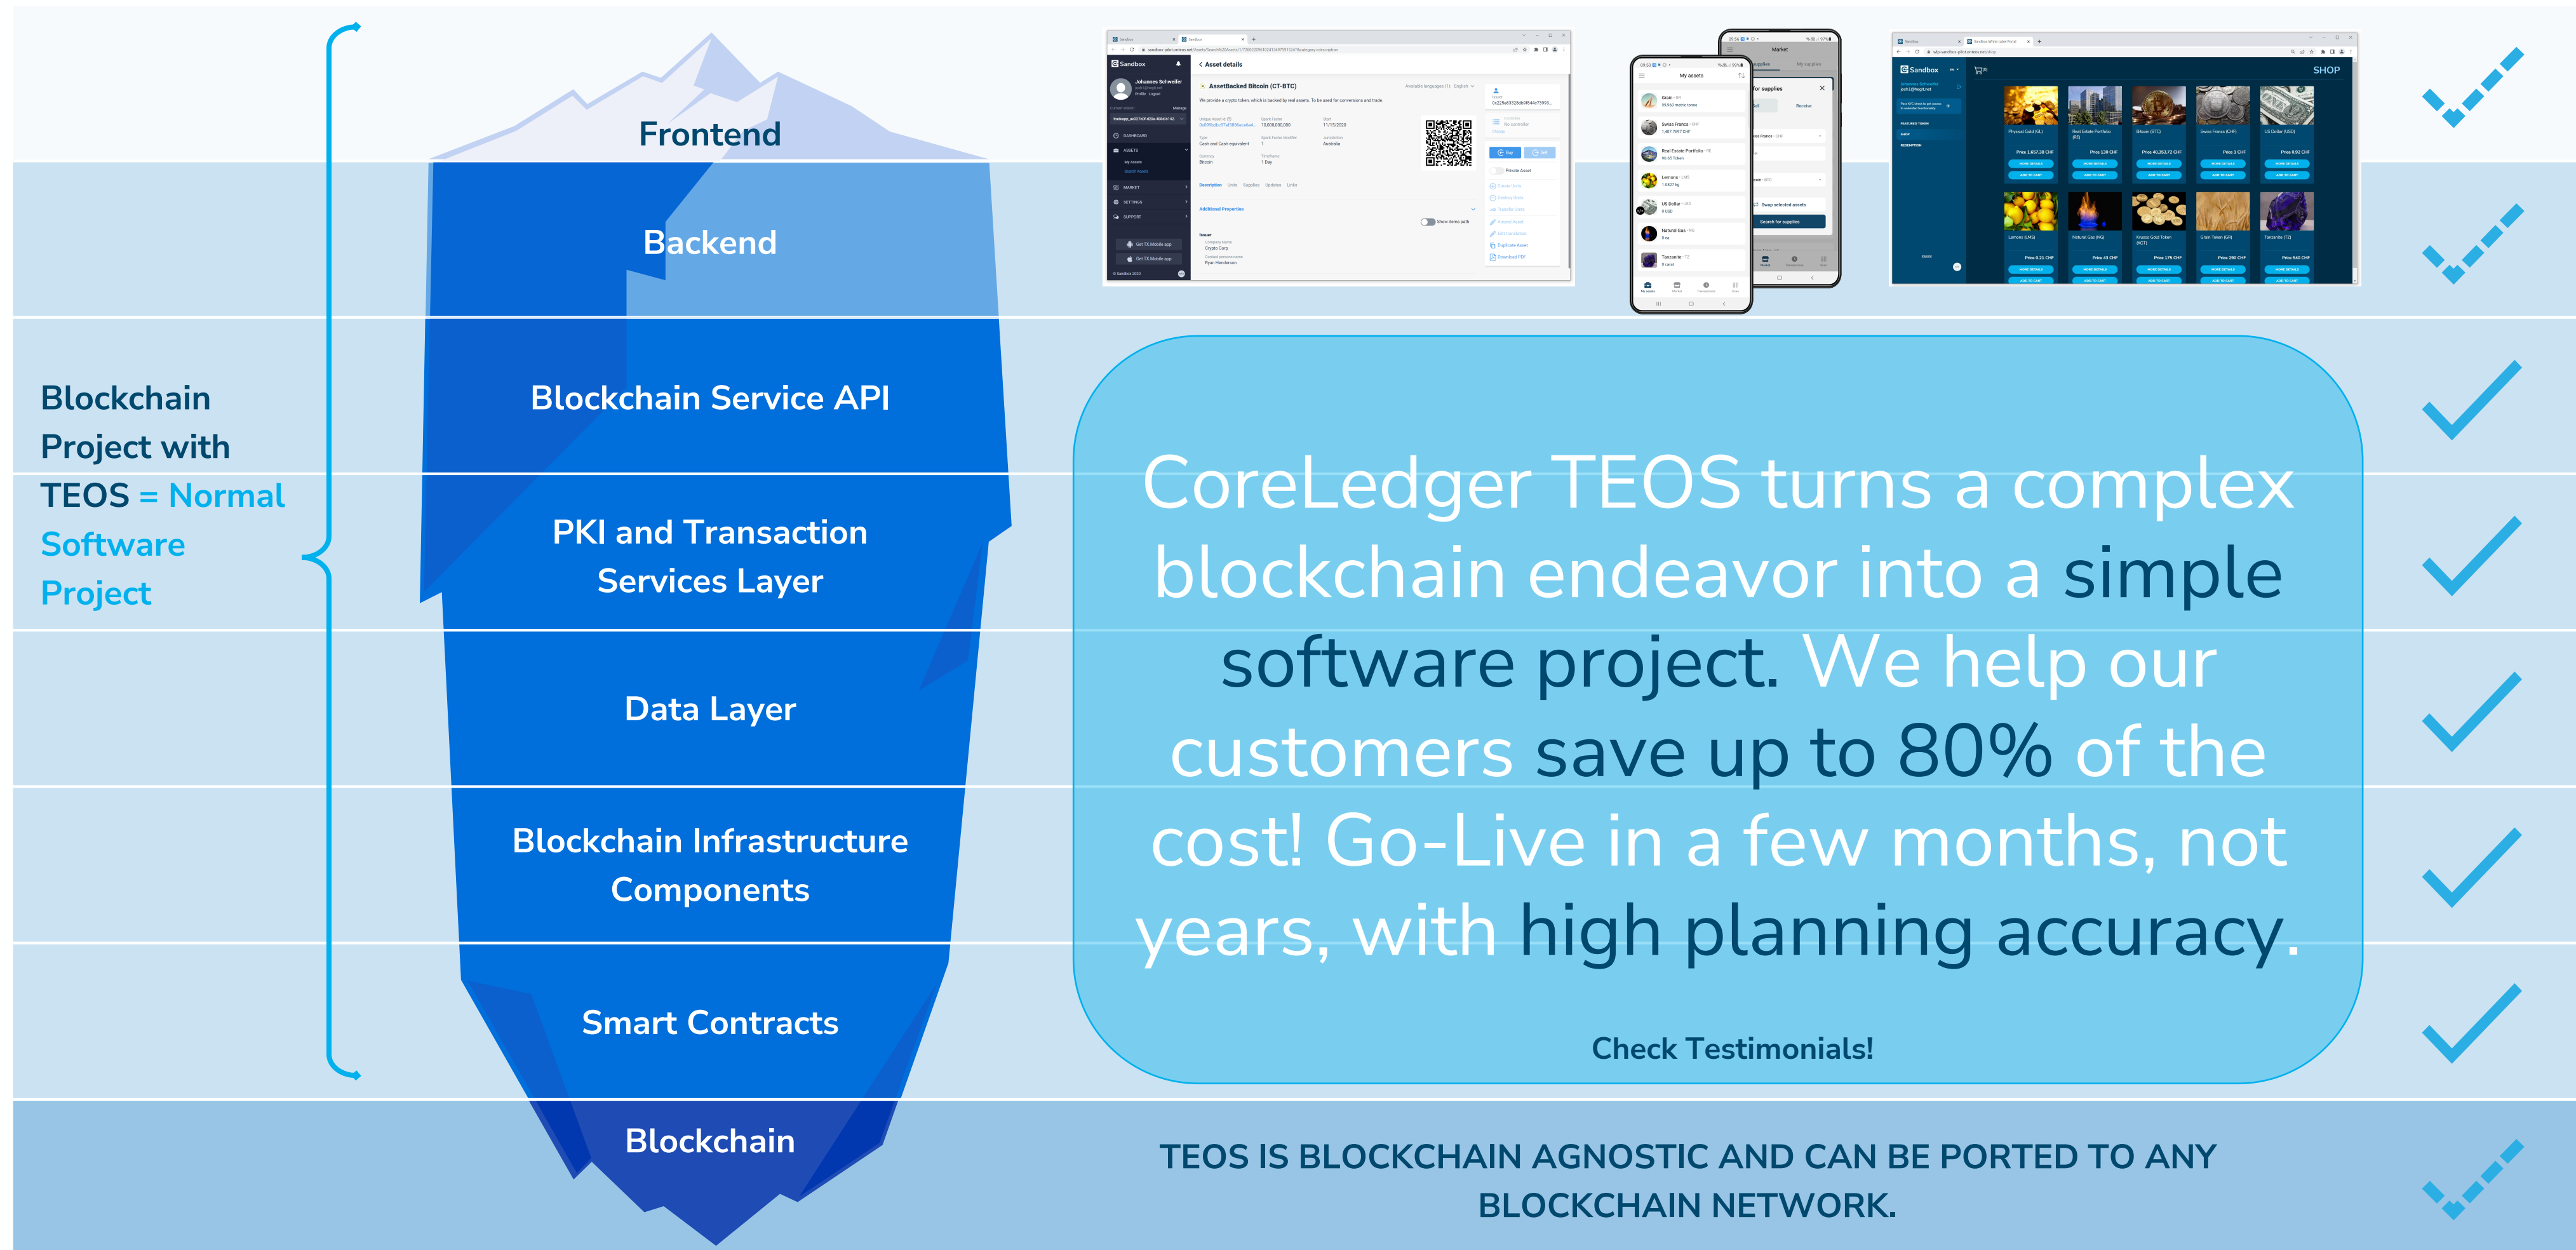

White Label App

White Label Portal

CoreLedger TEOS API (Programming interface for own blockchain-enabled applications)

Blockchains:  ethereum  SparkNet  INTERNET COMPUTER ( BINANCE SMART CHAIN  polygon coming soon)

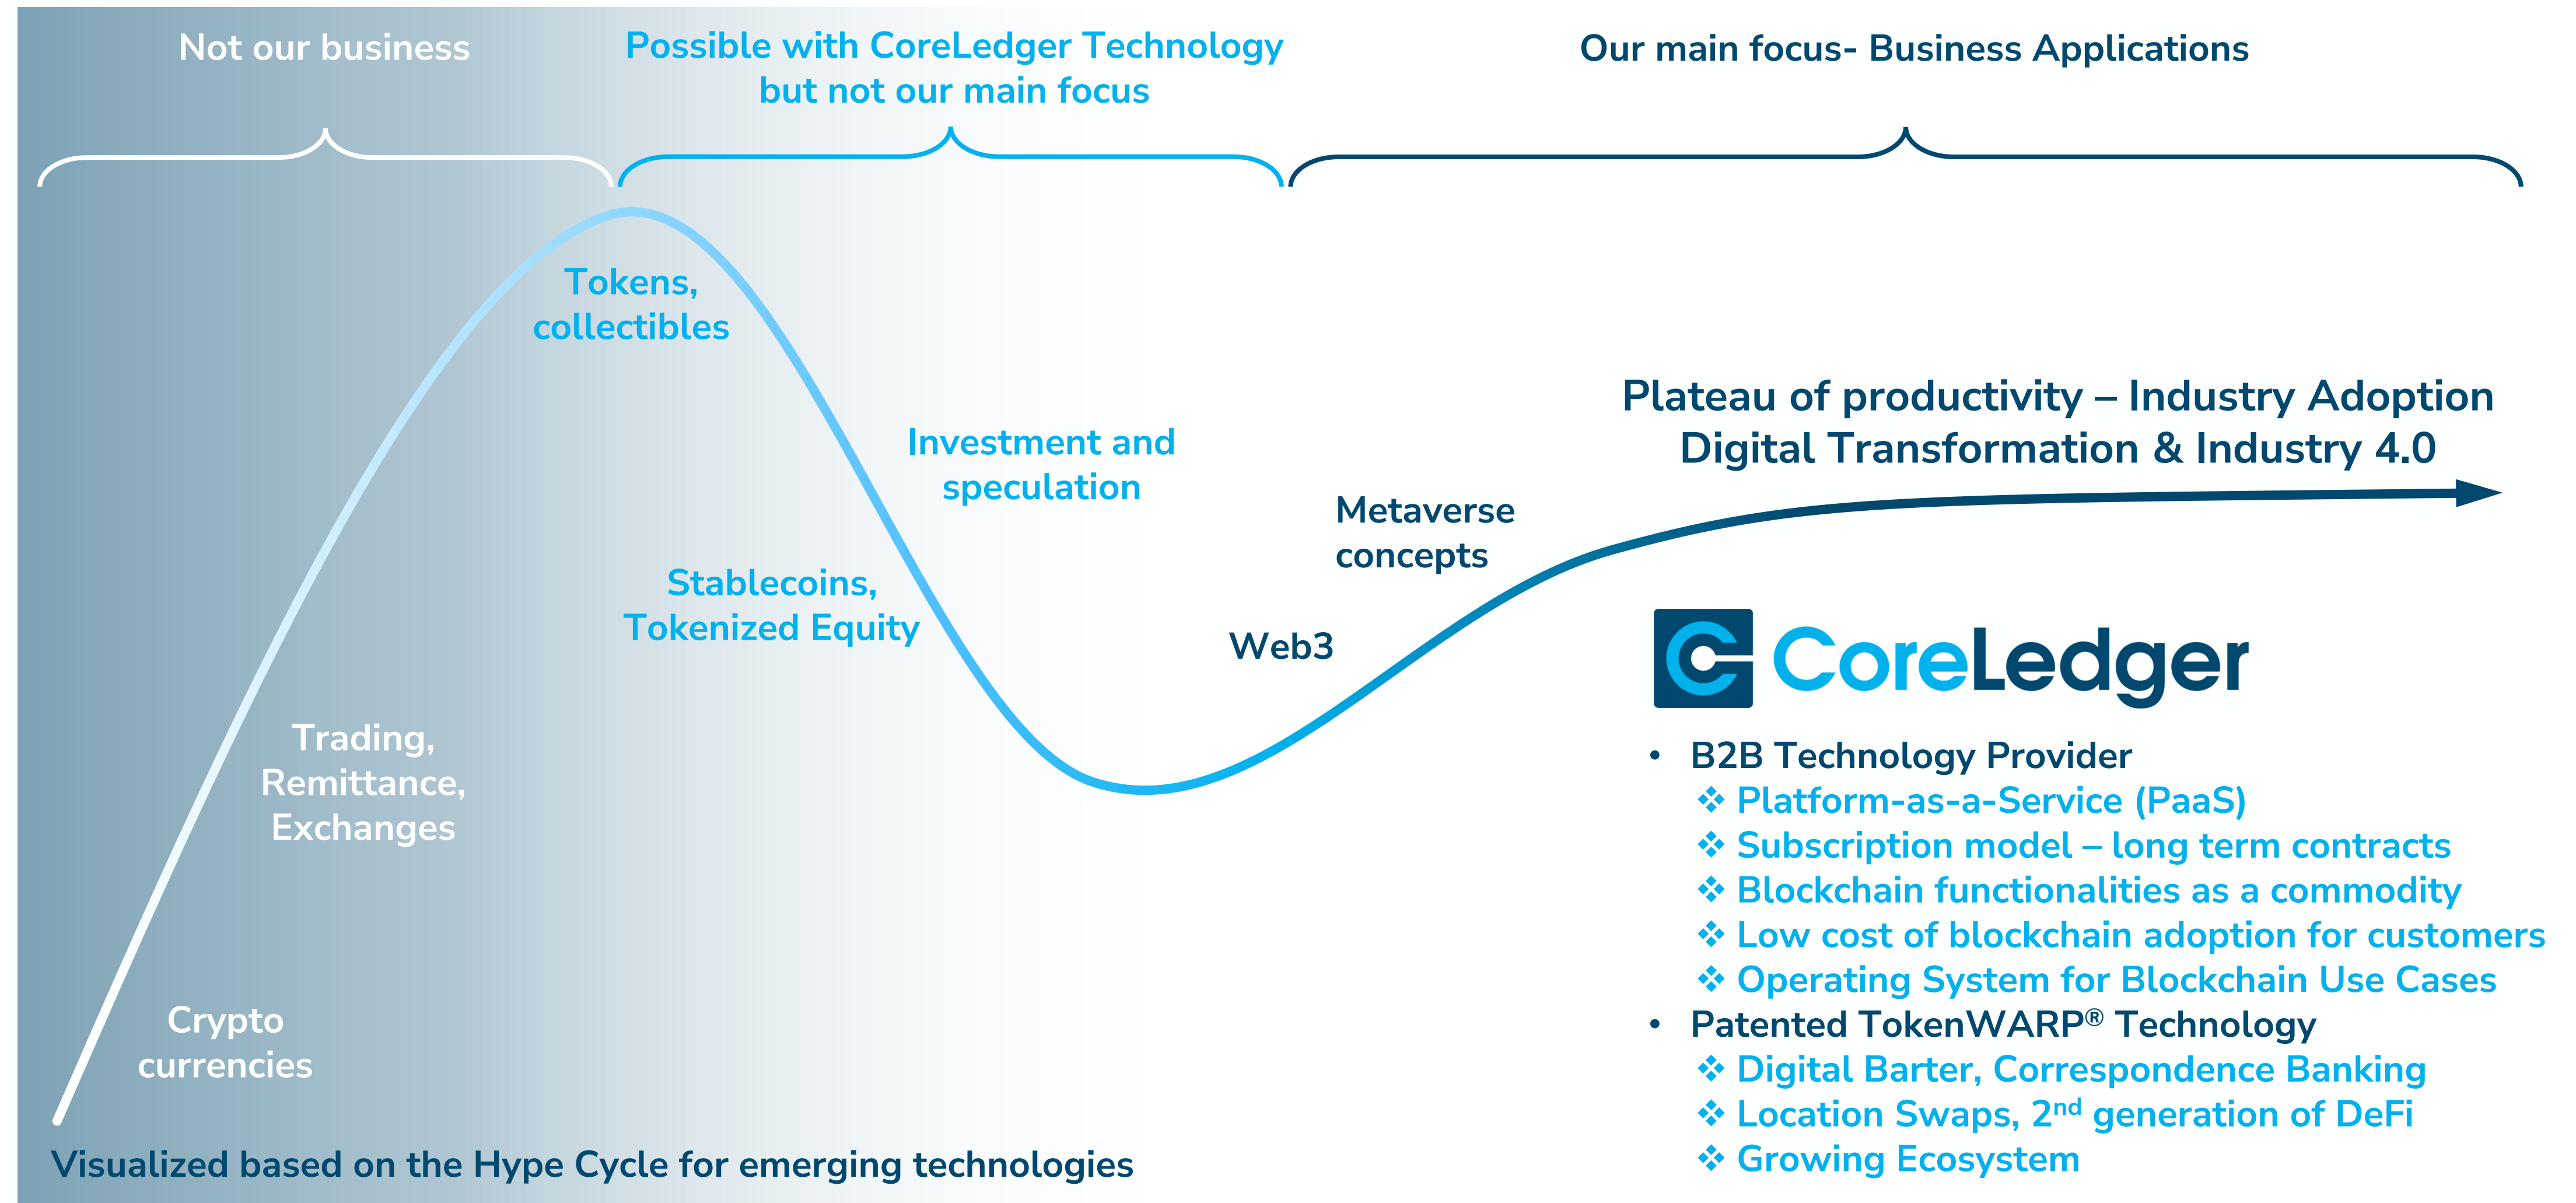

PROBLEM SOLVED: SAVE TIME AND MONEY WITH TEOS

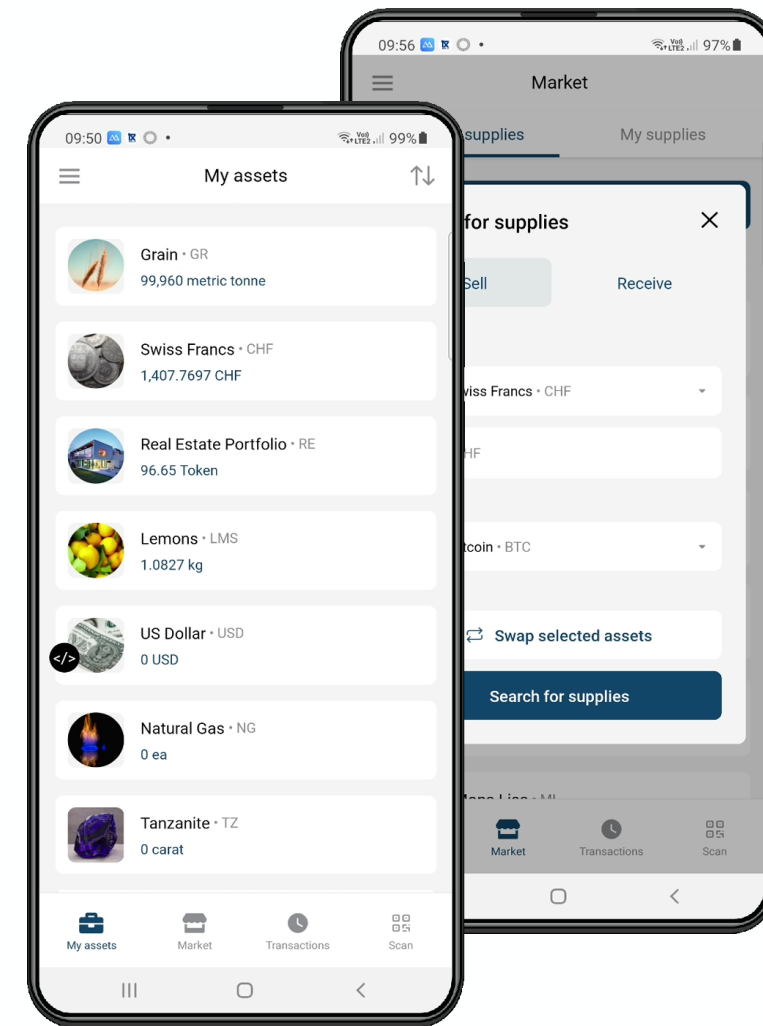

WHITELABEL PRODUCTS

TEOS

CORELEDGERS POSITIONING IN THE BLOCKCHAIN TECHNOLOGY MARKET

OUR UNIQUE SELLING PROPOSITION AND COMPETITIVE ADVANTAGES

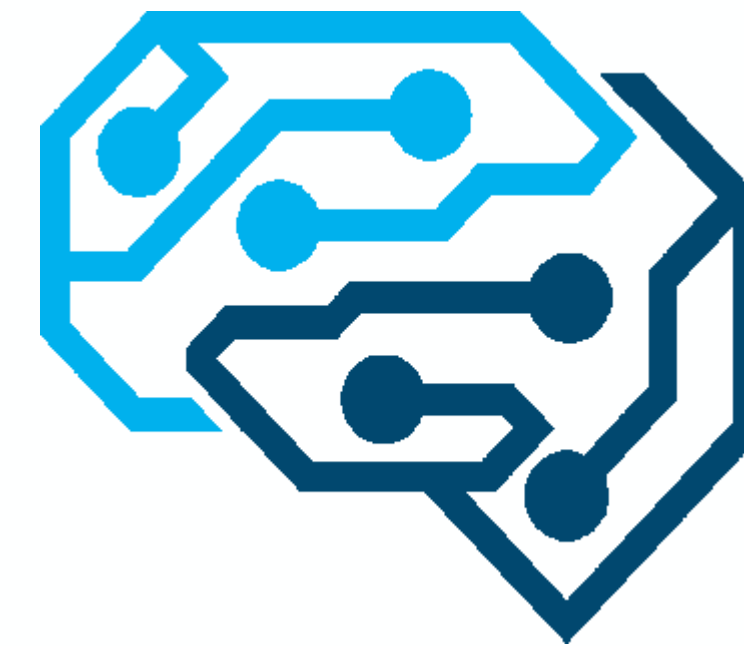

Versatile Blockchain APP (not just a simple wallet)

- Fast time-to-market for business solutions (e.g. Notarization on BC)
- Great end-user experience (UX)
- Low development and maintenance costs for businesses
- Solves the problem of convenient private-key handling and storage

Token WARP ®, proprietary patented DeFi solution

- Value conversion, which involves multiple assets and parties at once
- Allows solutions such as correspondence banking, digital barter, non-fungible assets (NFA) and ways to avoid regulatory difficulties.
- Provides the basis for an interconnected ecosystem with many ways to increase liquidity

Blockchain Expertise and unique rapid prototyping capability

- Blockchain experience of our team members started in 2011
- Founder is teaching CAS classes at HSLU
- We can quickly SHOWCASE any use-case with an Active Sandbox (PoC)
- Partner Products (e.g. NOTRZR) can be integrated in the PoC, so we can serve more and more actual business processes

CORE TEAM BEHIND CORELEDGER

Dr. Johannes Schweifer
CEO/Founder

With a PHD in theoretical chemistry, Johannes is a problem-solver, having more than 12 years of working experience as consultant, solution architect and project manager in FinTech and banking. He is active in the Blockchain and Crypto arena since 2011 and was Co-Founder, first investor and president of the board of Bitcoin Suisse AG. In 2017 he founded CoreLedger AG. He is responsible for Business Development.

Jevgeny Fedorovich
CTO/Co-Founder

With a Master's degree in information technologies and more than 15 years of working experience in the IT industry, Jevgeny leads the P2P infrastructure development team and is responsible for all internal IT initiatives and operations (DevOps). Jevgeny is Co-Founder of CoreLedger AG and responsible for Software development and IT operations.

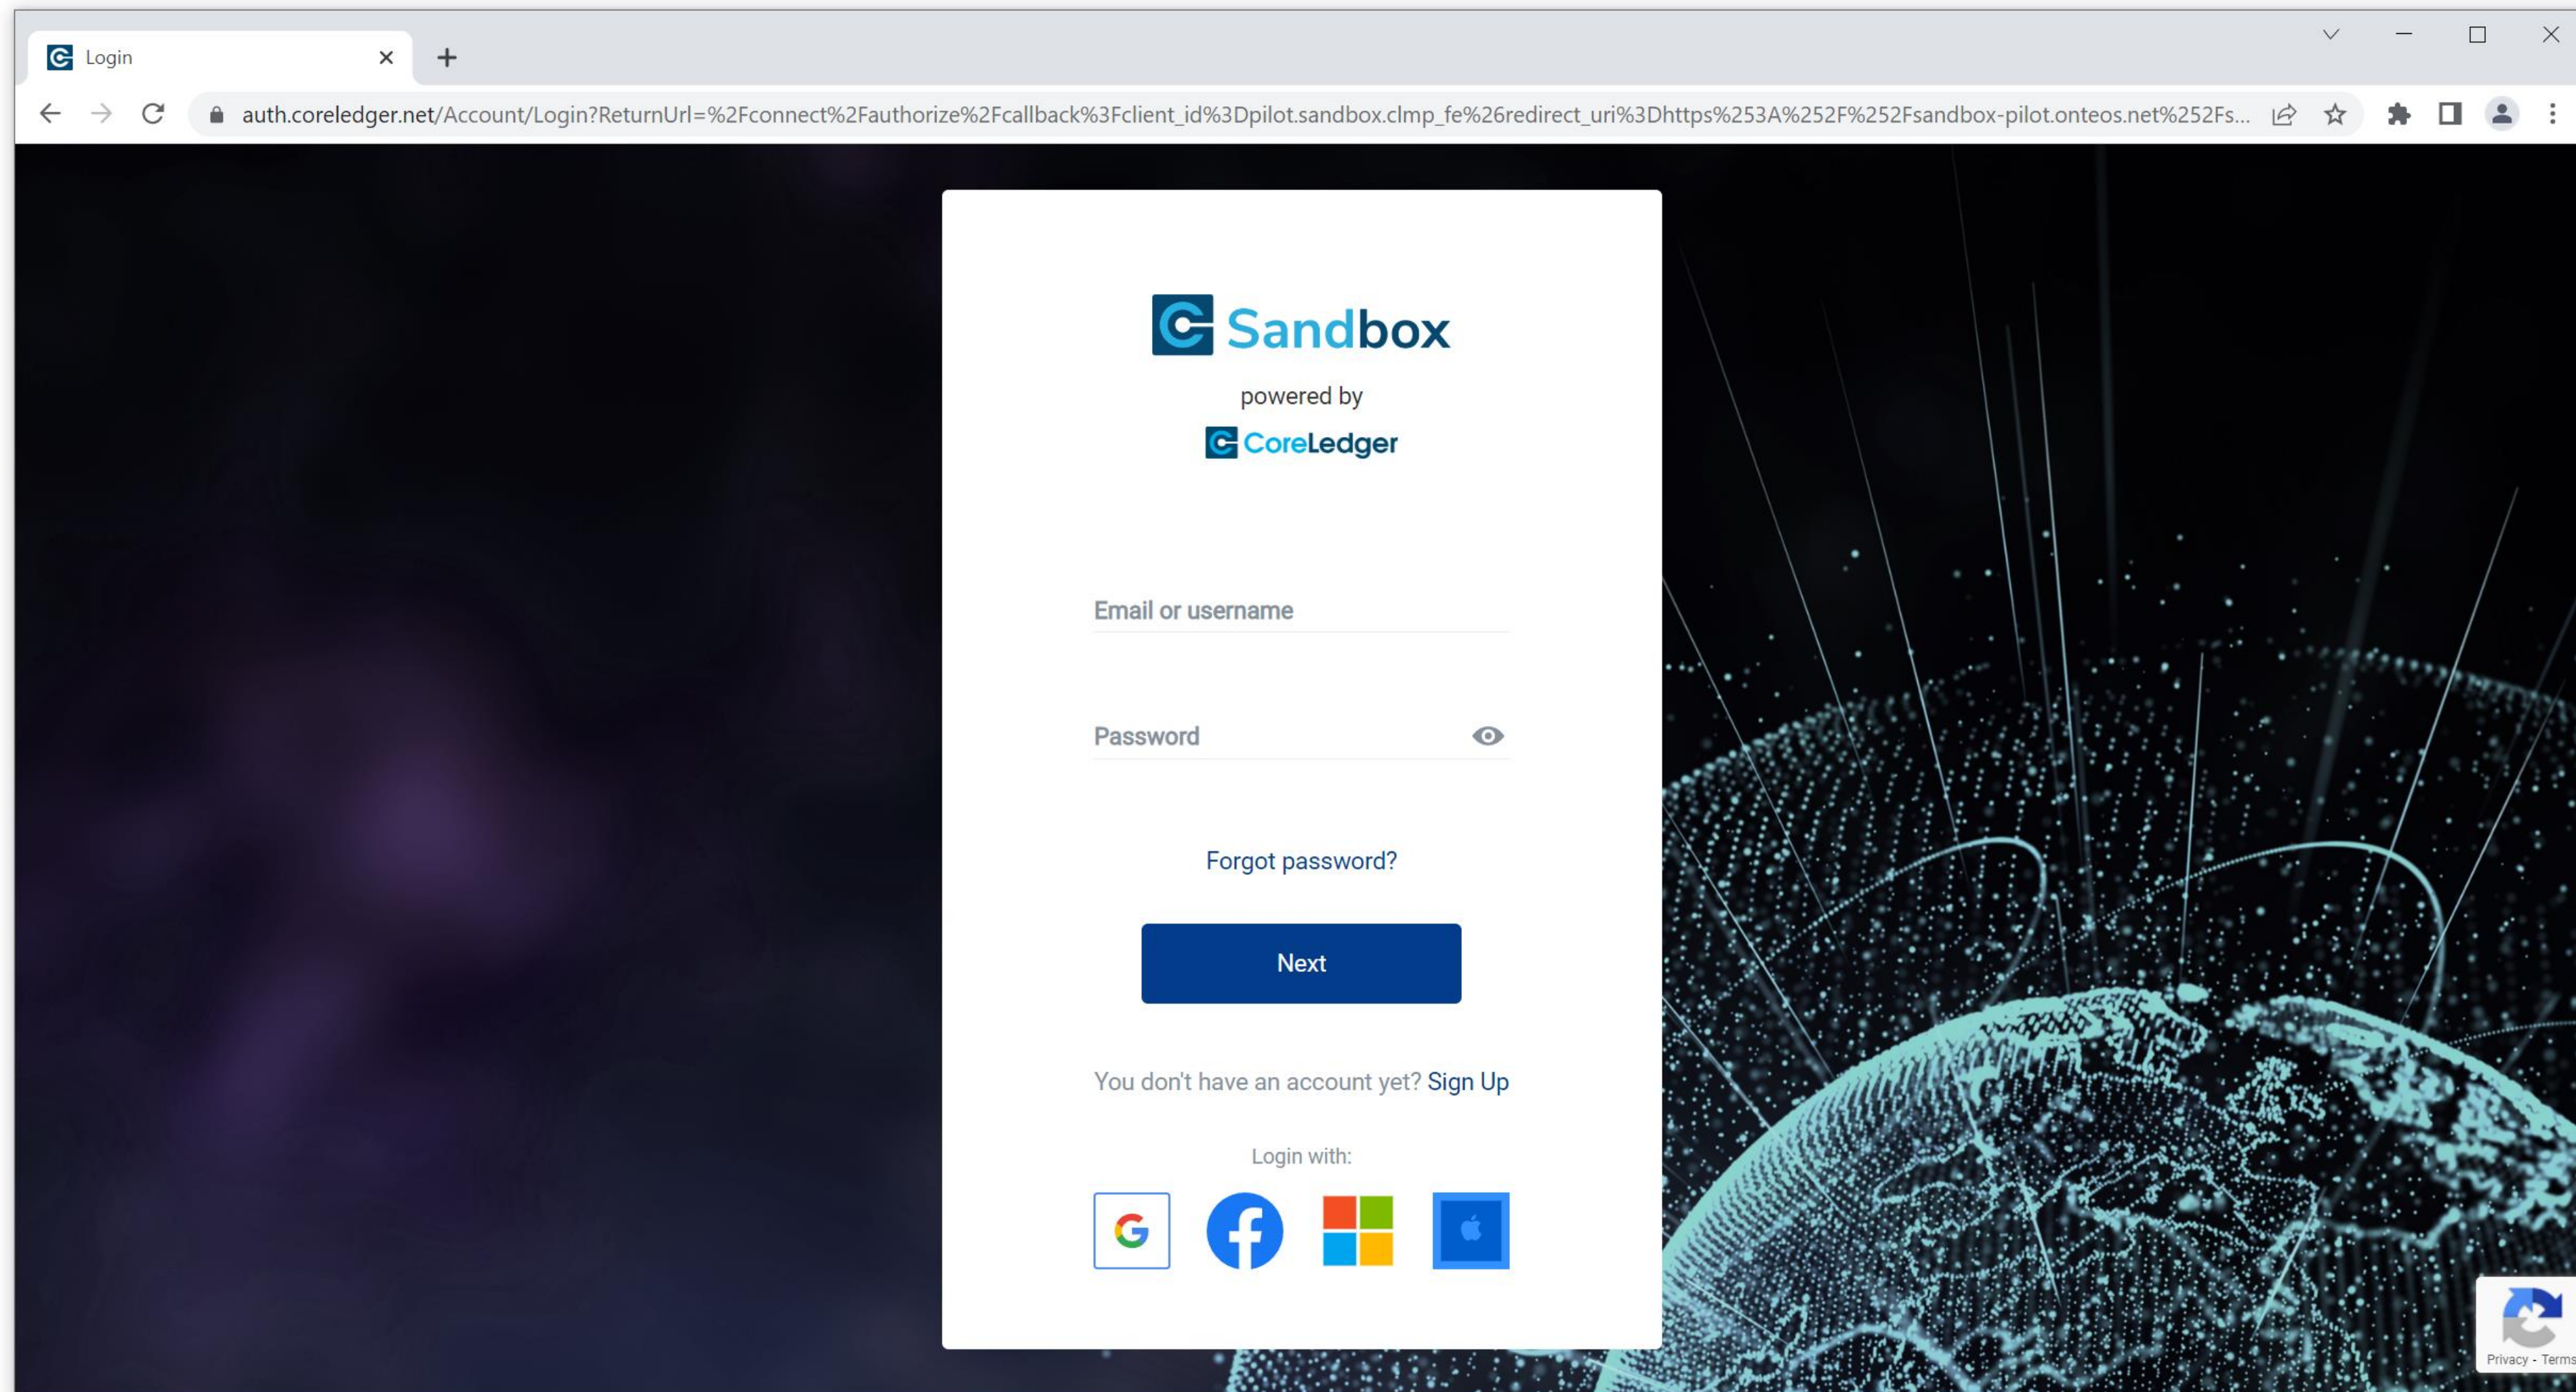

Martin Simeon
CFO

MBA SUNY, senior business executive with longstanding experience in leading international M&A projects, advisor to executive boards, experience in private SME's and public firms. Founder Simeon Consulting LLC. Martin is responsible for finance and controlling of CoreLedger AG.

WHITELABEL MANAGEMENT TOOL – ASSET SEARCH

The screenshot shows a web browser window with the URL `sandbox-pilot.onteos.net/Assets/Search%20Assets?query=btc`. The page title is "Search Assets". A search bar contains the text "btc" and a "Search" button. To the right of the search bar are "My saved filters" and "Advanced search" options. The search results list three assets:

- AssetBacked Bitcoin (CT-BTC) - highlighted with a blue border
- Bitcoin (BTC) - S
- Bitcoin (BTC)

The detailed view for "AssetBacked Bitcoin (CT-BTC)" is shown below the list. It includes a description: "We provide a crypto token, which is backed by real assets. To be used for conversions and trade." and a "More info" button. To the right of the description are "Buy" and "Sell" buttons. Below these buttons, the following details are listed:

Issuer	Francis
Jurisdiction	Australia
UOM	Bitcoin
SF	10,000,000,000

The left sidebar contains the user profile for Johannes Schweifer (josh1@hegit.net) and a navigation menu with options: DASHBOARD, ASSETS (My Assets, Search Assets), MARKET, SETTINGS, and SUPPORT. At the bottom of the sidebar are links to "Get TX.Mobile app" for Android and iOS, and a copyright notice "© Sandbox 2020".

WHITELABEL MANAGEMENT TOOL – ASSET DETAILS

The screenshot displays the 'Asset details' page for 'AssetBacked Bitcoin (CT-BTC)'. The interface includes a dark sidebar with navigation options like Dashboard, Assets, Market, Settings, and Support. The main content area shows the asset's name, a description, and a table of properties. A QR code is visible for the asset. On the right, there are controls for buying/selling, private asset status, and various management actions like 'Create Units', 'Destroy Units', and 'Amend Asset'. The user profile 'Johannes Schweifer' is visible in the top left.

WHITELABEL PORTAL – PRIMARY MARKET FOR TOKEN SALES

The screenshot shows a web browser window with two tabs: 'Sandbox' and 'Sandbox White Label Portal'. The address bar shows the URL 'wlp-sandbox-pilot.onteos.net/featured'. The website has a dark blue sidebar on the left with the 'Sandbox' logo, a user profile for 'Johannes Schweifer' (josh1@hegit.net), and navigation links for 'FEATURED TOKEN', 'SHOP', and 'REDEMPTION'. The main content area features a large heading 'International real estate marketplace' over a background image of houses. Below the heading is a paragraph of text explaining the benefits of real estate as an investment vehicle and how tokens can lower the barrier to entry. At the bottom of the main content, there are three buttons: 'Investors Purchase a Token', 'Rent or Subdivide', and 'Flipping Tokens'. A shopping cart icon in the top right corner shows '0' items. A 'How does it work?' section with a lightbulb icon is also visible. At the bottom right, there is a product card for '1 token Real Estate Portfolio' priced at '= 130 CHF' with an 'Add to cart' button.

International real estate marketplace

Real estate is one of the most popular investment vehicles, and for good reason. Housing is a basic necessity, and as an investment real estate has been rated one of the best long-term options, ahead of gold, stocks, and mutual funds. Personal property ownership has also been a cornerstone of equity, and in many ways home ownership has helped determine future wealth. In recent years, however, with rising housing costs, the barrier to entry has become too high for many younger or lower-income folks. The Seacrest Apartment Complex* is offering individual units and lots via token sale. Each token represents the complete and legal ownership of a unit. These tokens are fungible, allowing the unit's owner to subdivide lots and lower the cost barrier to property ownership significantly.

How does it work?

Investors Purchase a Token Rent or Subdivide Flipping Tokens

WHITELABEL PORTAL – WEBSHOP FOR TOKENS

The screenshot displays a web browser window with two tabs: 'Sandbox' and 'Sandbox White Label Portal'. The address bar shows the URL 'wlp-sandbox-pilot.onteos.net/shop'. The page features a dark blue sidebar on the left with the 'Sandbox' logo, a language selector set to 'EN', and user information for 'Johannes Schweifer' with email 'josh1@hegit.net'. A blue button prompts the user to 'Pass KYC check to get access to unlimited functionality'. Below this are sections for 'FEATURED TOKEN', 'SHOP', and 'REDEMPTION'. The main content area is a grid of ten token listings, each with a representative image, a title, a price in CHF, and buttons for 'MORE DETAILS' and 'ADD TO CART'. A shopping cart icon with '(0)' items is located at the top left of the main area. The word 'SHOP' is displayed in large white letters at the top right. At the bottom left of the sidebar, there is an 'Imprint' link and a small circular icon with a code symbol.

Token Name	Price (CHF)
Physical Gold (GL)	1,657.38
Real Estate Portfolio (RE)	130
Bitcoin (BTC)	40,353.72
Swiss Francs (CHF)	1
US Dollar (USD)	0.92
Lemons (LMS)	0.21
Natural Gas (NG)	43
Krusos Gold Token (KGT)	175
Grain Token (GR)	290
Tanzanite (TZ)	540

WHITELABEL PORTAL – PAYMENT METHODS

The screenshot displays a web browser window with two tabs: 'Sandbox' and 'Sandbox White Label Portal'. The address bar shows the URL 'wlp-sandbox-pilot.onteos.net/checkout/details/payment'. The page features a dark blue header with the 'Sandbox' logo, a language dropdown set to 'EN', and a breadcrumb trail: '1 Select wallet > 2 Details > 3 Your Order > 4 Payment'. The word 'CHECKOUT' is prominently displayed in the top right. A notification bar indicates a 15:00 deadline for order submission, with a timer showing 14:49. A sidebar on the left contains the user's name 'Johannes Schweifer', email 'josh1@hegit.net', a 'Pass KYC check' button, and menu items for 'FEATURED TOKEN', 'SHOP', and 'REDEMPTION'. The main content area is titled 'Select the payment method for these assets:' and offers three options: 'Bank Transfer' (with a bank icon), 'Creditcard' (with a credit card icon), and 'Cryptocurrencies' (with Bitcoin, Ethereum, and Litecoin icons). Each option includes a brief description and a 'SELECT THIS METHOD' button.

WHITELABEL PORTAL – REDEMPTION OF REAL VALUES

The screenshot shows a web browser window with two tabs: 'Sandbox' and 'Sandbox White Label Portal'. The address bar shows the URL 'wlp-sandbox-pilot.onteos.net/redemption'. The page features a dark blue sidebar on the left with the 'Sandbox' logo, a language dropdown set to 'EN', and user information for 'Johannes Schweifer' with email 'josh1@hegit.net'. A button prompts the user to 'Pass KYC check to get access to unlimited functionality'. The sidebar also contains navigation links for 'FEATURED TOKEN', 'SHOP', and 'REDEMPTION'. The main content area is titled 'REDEMPTION' and includes a progress indicator with four steps: '1 Select method', '2 Details', '3 Summary', and '4 Finish'. A paragraph explains that users can request a payout of accumulated revenue, which can be converted into Swiss Francs, Bitcoin, ETH, and Erc20, with restrictions on minimum and maximum payout limits. Below this text are five redemption options, each with an icon, a 'Receive' and 'Pay with' description, and 'MORE INFO' and 'SELECT THIS METHOD' buttons. The options are: 1. Bank transfer - USD (with a house icon), 2. Bank Transfer - CHF (with a bank icon), 3. Bank Transfer - USD (with a bank icon), 4. Receive: Bitcoin (with a Bitcoin icon), 5. Receive: Ethereum (with an Ethereum icon). A sixth option, 'Physical Delivery - Grain' (with a forklift icon), is partially visible at the bottom. The footer of the sidebar includes an 'Imprint' link and a code icon.

WHITELABEL PORTAL – ACCOUNT DETAILS

The screenshot shows a web browser window with two tabs: 'Sandbox' and 'Sandbox White Label Portal'. The address bar shows the URL 'wlp-sandbox-pilot.onteos.net/account'. The page features a dark blue sidebar on the left with the 'Sandbox' logo, a language dropdown set to 'EN', and user information for 'Johannes Schweifer' (josh1@hegit.net). A button prompts the user to 'Pass KYC check to get access to unlimited functionality'. The sidebar also lists 'FEATURED TOKEN', 'SHOP', and 'REDEMPTION'. The main content area is titled 'MY ACCOUNT' and includes tabs for 'ORDER HISTORY' and 'REDEEM HISTORY'. A user profile card displays 'Johannes Schweifer' with 'josh1@hegit.net' and buttons for 'MANAGE CREDENTIALS' and 'EDIT PERSONAL INFO'. Personal details include Phone (+412324324), Birthdate (01/14/2022), Nationality (sdfdfs), Address 1 (sdfsdf), Zip code (sdf), City (sdf), State (sdf), and Country (AF). A 'Current KYC Tier' section shows 'NOT VERIFIED' and a 'START KYC' button. The 'Existing Bank Accounts' section lists two CHF accounts: 'Bank Cler CH 8378 2388 1305 001 Q' and 'Some bank 298374983274873492', each with edit and delete icons. An 'ADD BANK ACCOUNT' button is at the bottom. The footer contains 'Imprint' and a code icon.

NOTARIZATION ON BLOCKCHAIN – NOTRZR APP

NOTARIZATION ON BLOCKCHAIN – UNFORGABLE TIMESTAMPED DATA

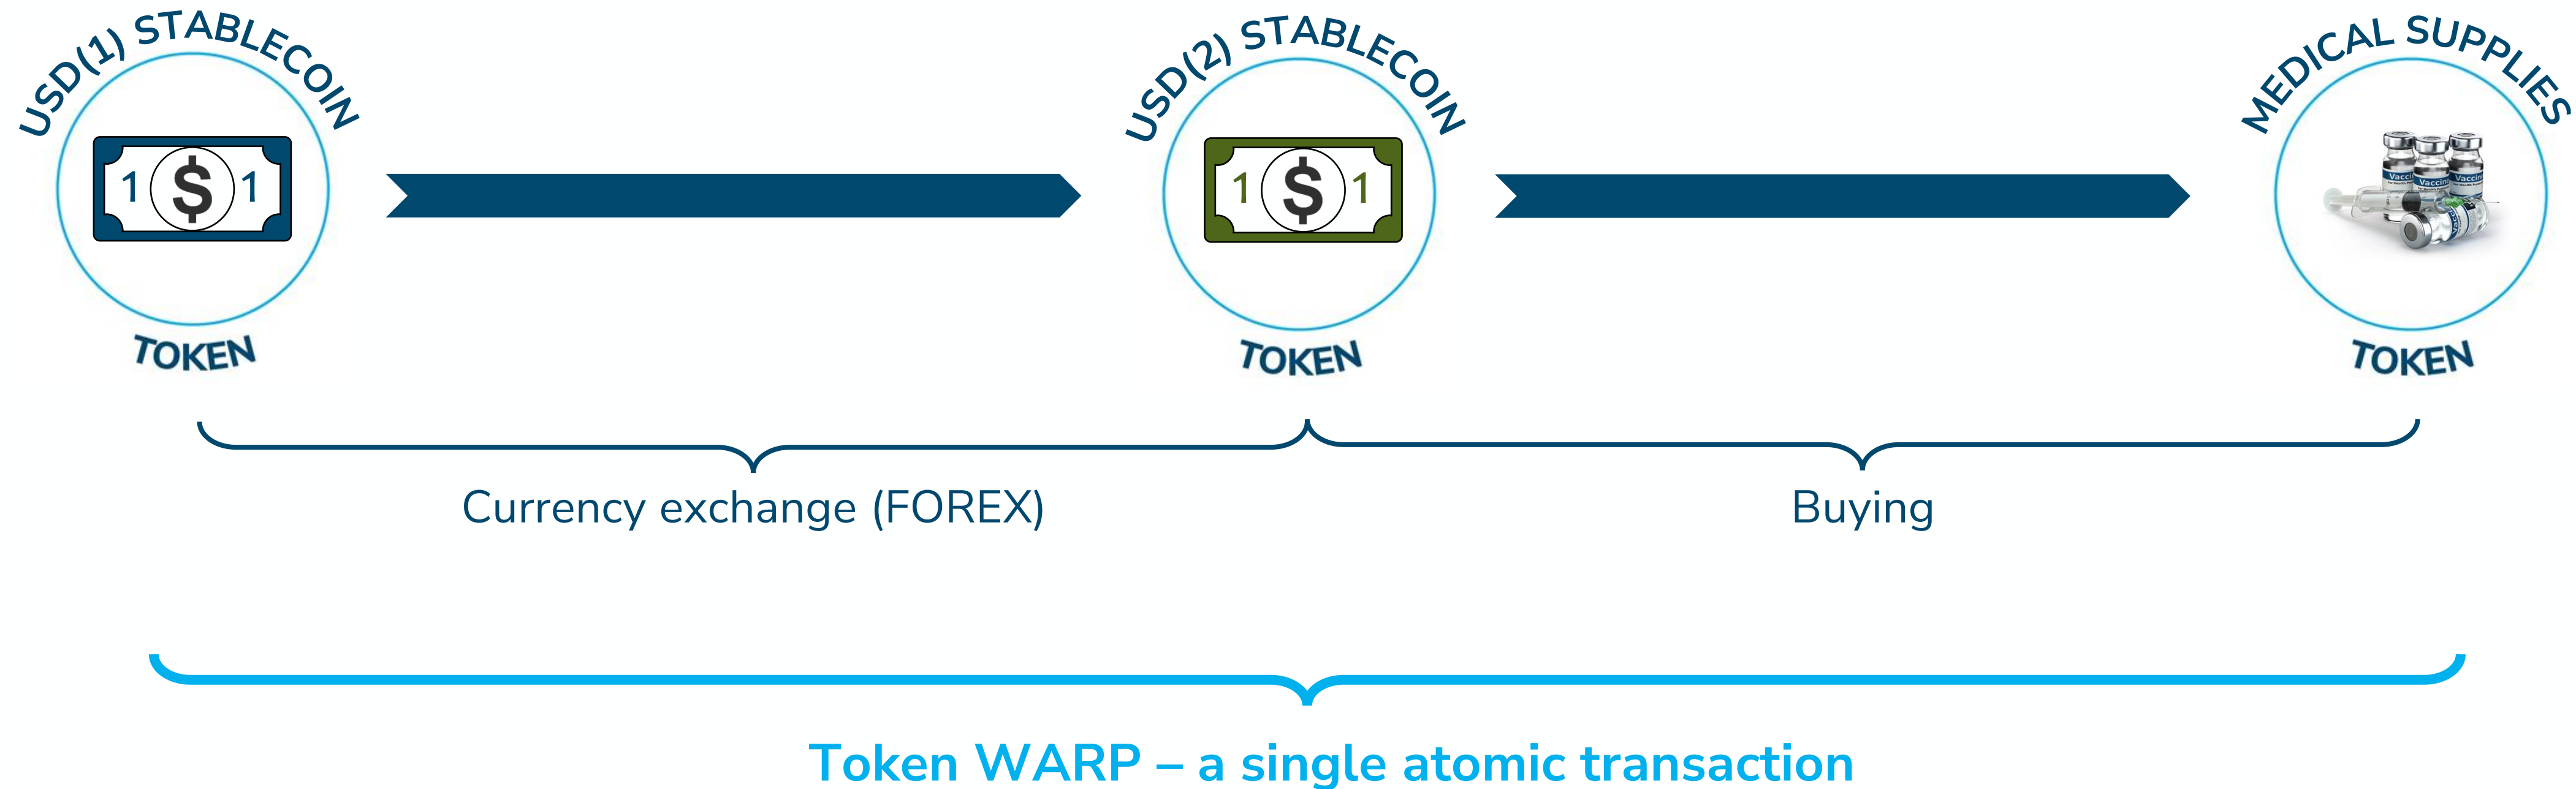

TOKEN WARP PROTOCOL

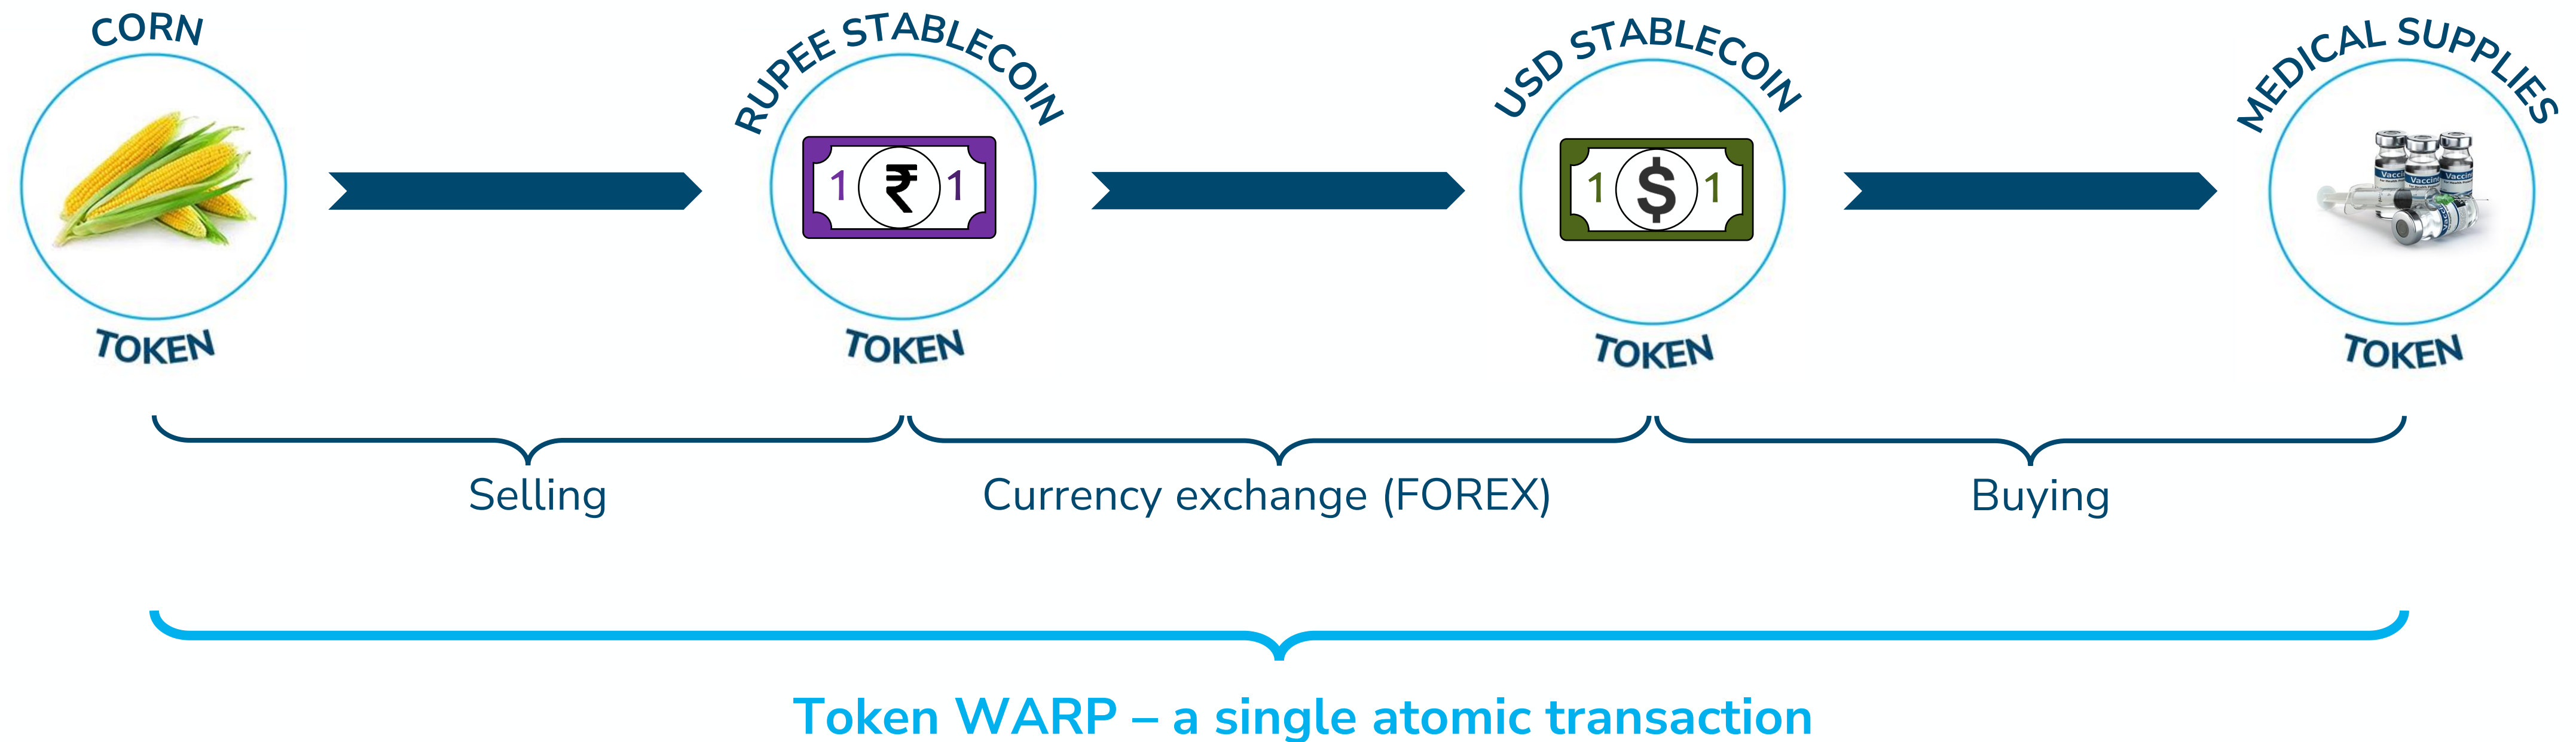

CORELEDGER INVENTED AND BUILT A SOLUTION FOR DECENTRALIZED TRADING (DEFI), WHICH IS REFERRED TO AS **TOKEN WARP (16/770,838). THE PATENT IS ALREADY GRANTED IN JAPAN AS THE FIRST COUNTRY**

AUTOMATIC CURRENCY CONVERSION COMBINED WITH A PURCHASE

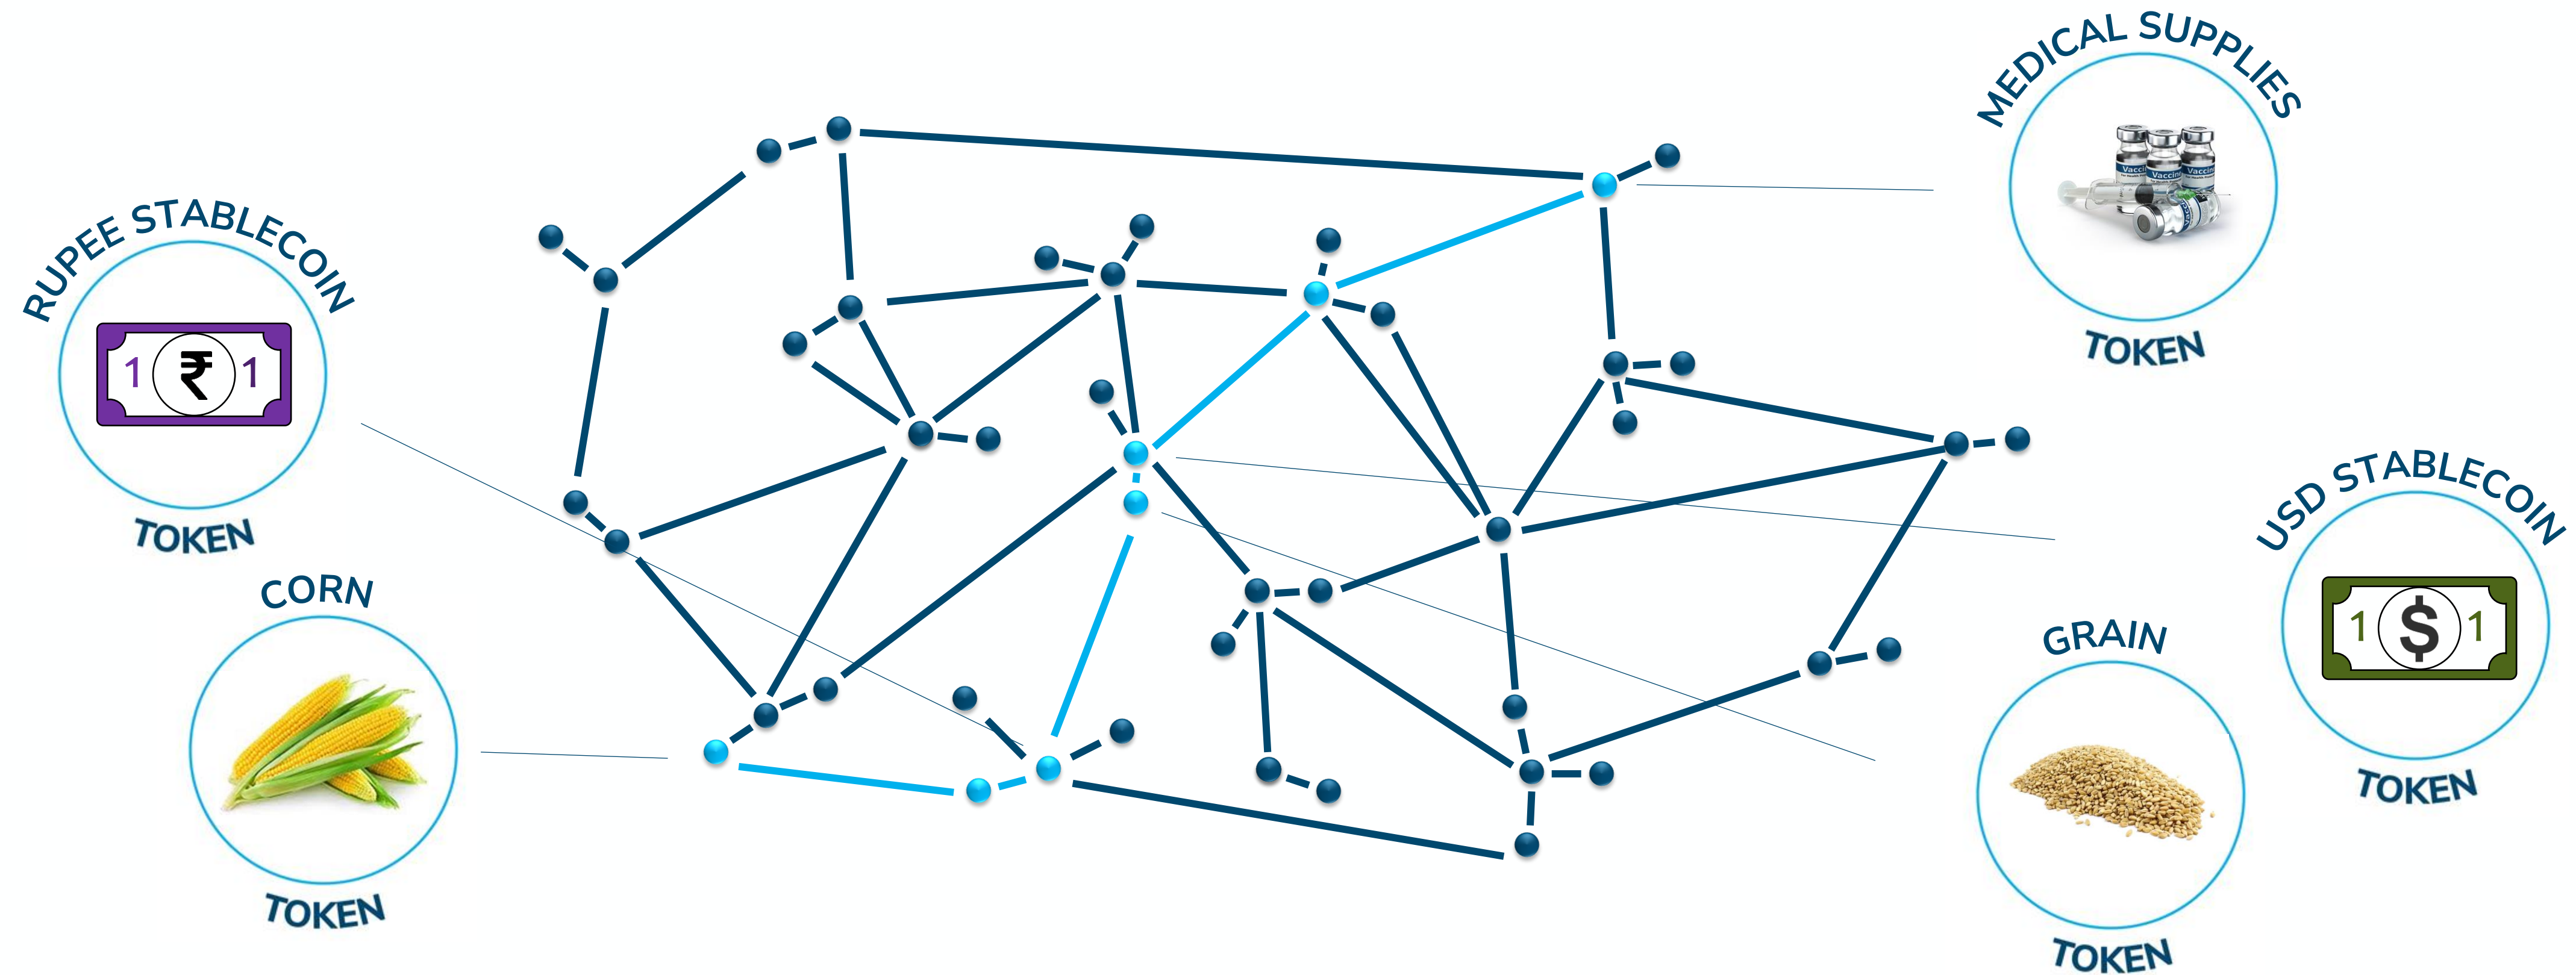

Even if two digital assets have their name and unit of measure in common, they are different assets on blockchain. If the buyer has one asset, the seller demands another, one has to do a currency exchange. The TokenWARP solves the challenge of having the proper currency.

MULTIPLE VALUE CONVERSIONS IN A SINGLE SEAMLESS TRANSACTION!

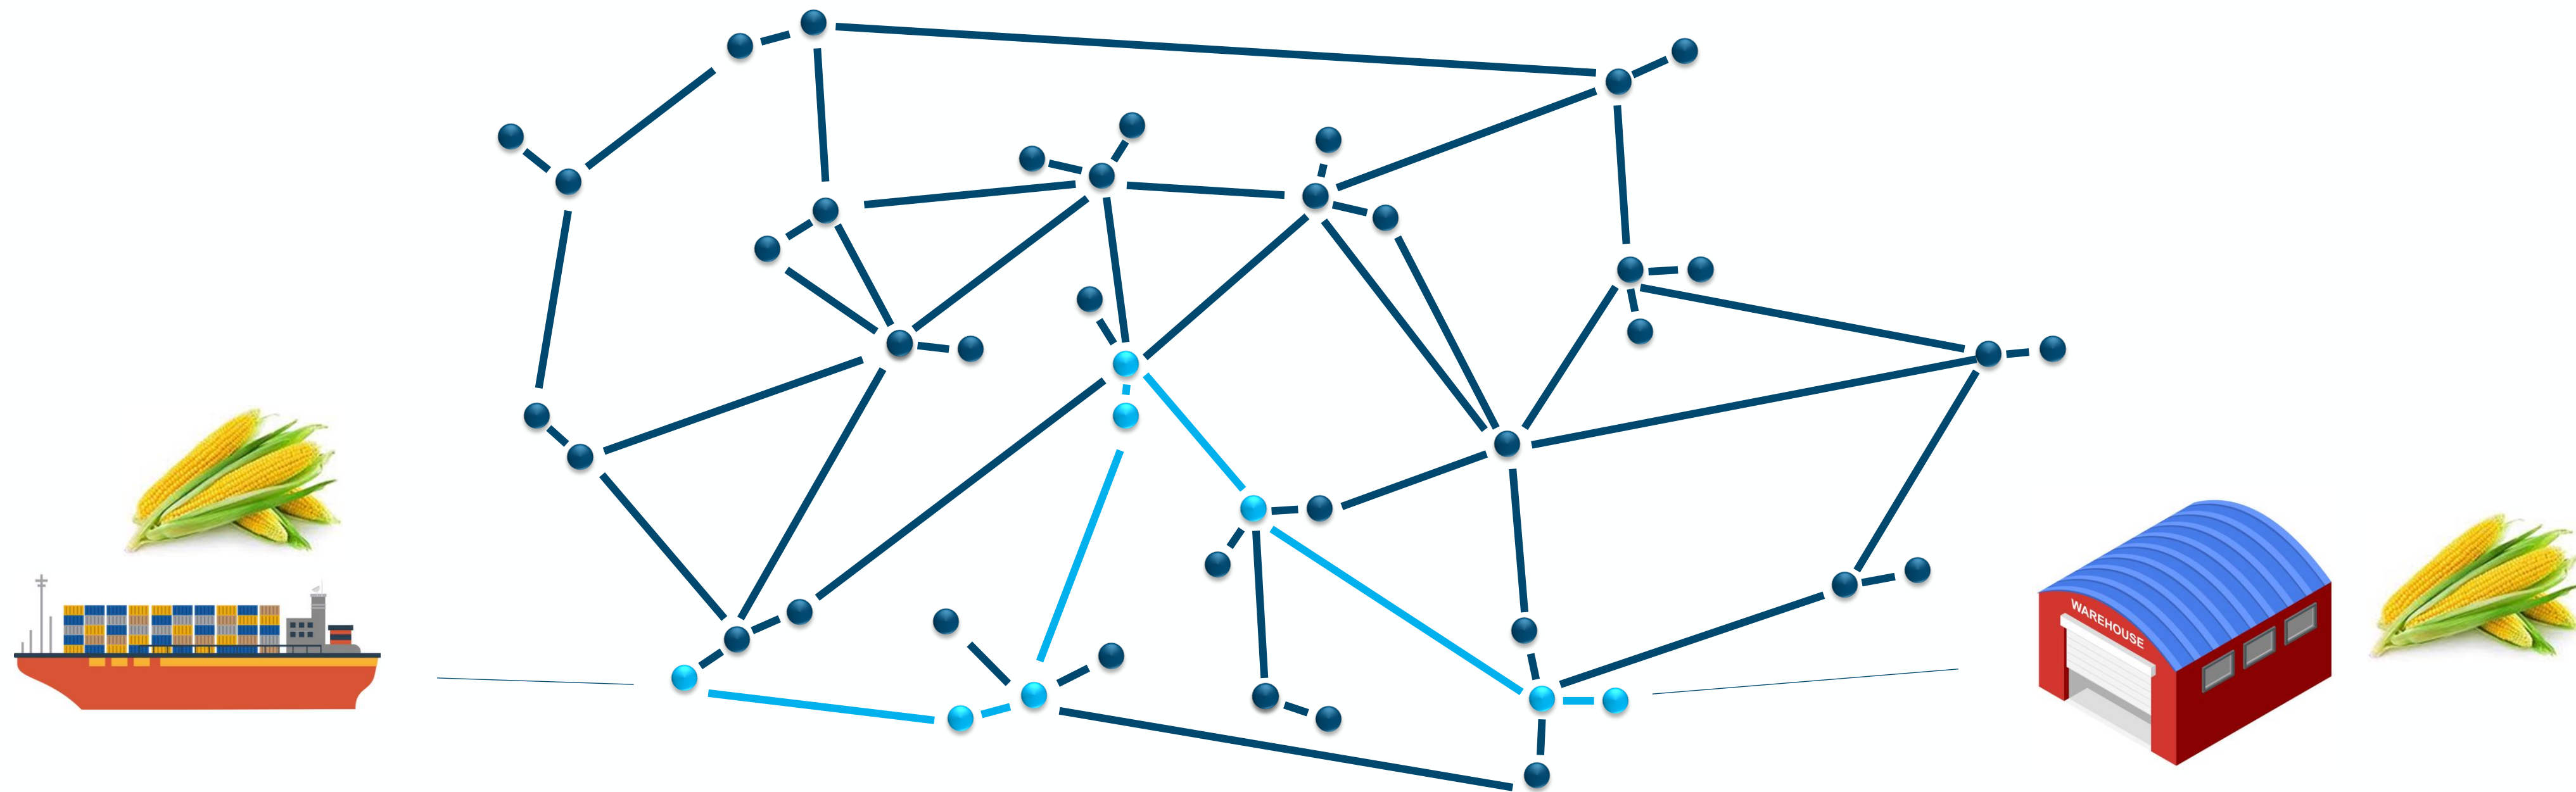

The Token WARP can combine selling, currency exchange and buying into a single atomic transaction, which unleashes tremendous potential for supply chain management, commodity trading, logistics and more

ROUTING VALUES LIKE THE INTERNET ROUTES DATA – GLOBAL BARTER

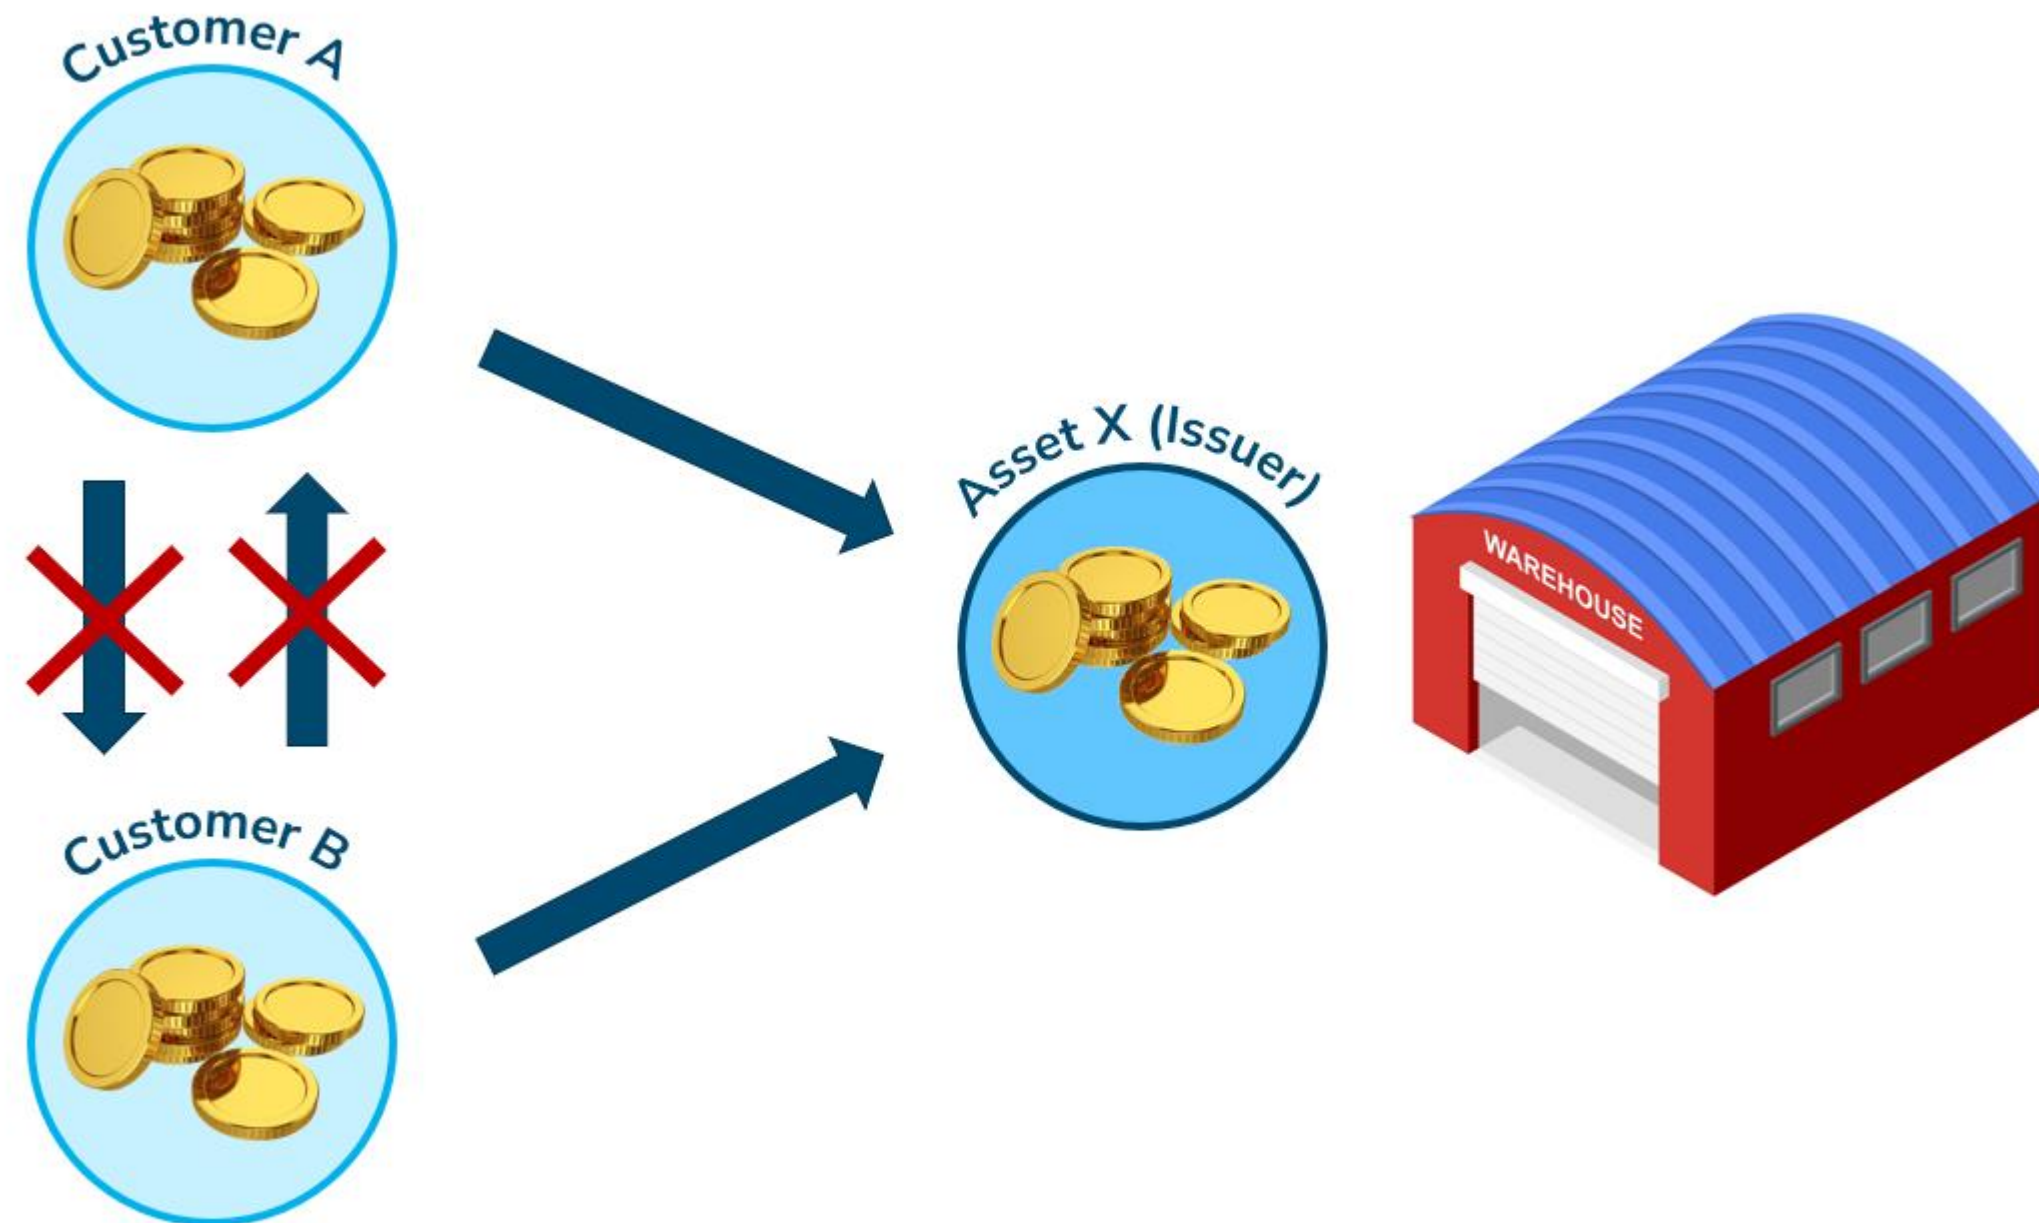

The Token WARP solves the problem of finding a matching trade-counterparty in global barter transactions by creating virtual (ad-hoc) connections between tokenized assets

MOVE CLAIMS INSTEAD OF REAL GOODS – LOCATION SWAP

The Token WARP can increase supply-chain effectiveness by swapping assets with same properties but different location.

SOLVING THE REGULATORY CHALLENGE – NON FUNGIBLE ASSETS

- New way to “tokenize” asset-backed values without creating a stablecoin
- Avoids regulatory hurdles
 - Faster go2market (months instead of years)
 - No additional cost with regulation
 - No running costs with regulatory tasks
- Perfect copy&paste solution for many companies
 - Can be applied to currencies and bank accounts, precious metals, industrial metals, equity, etc
 - Accounting for assets held in storage
 - Coupons and storage certificates

The Token WARP allows to suppress “securities features” of tokenized assets, so that they won’t count as financial products in most jurisdictions

CORRESPONDENCE BANKING – SWIFT ALTERNATIVE

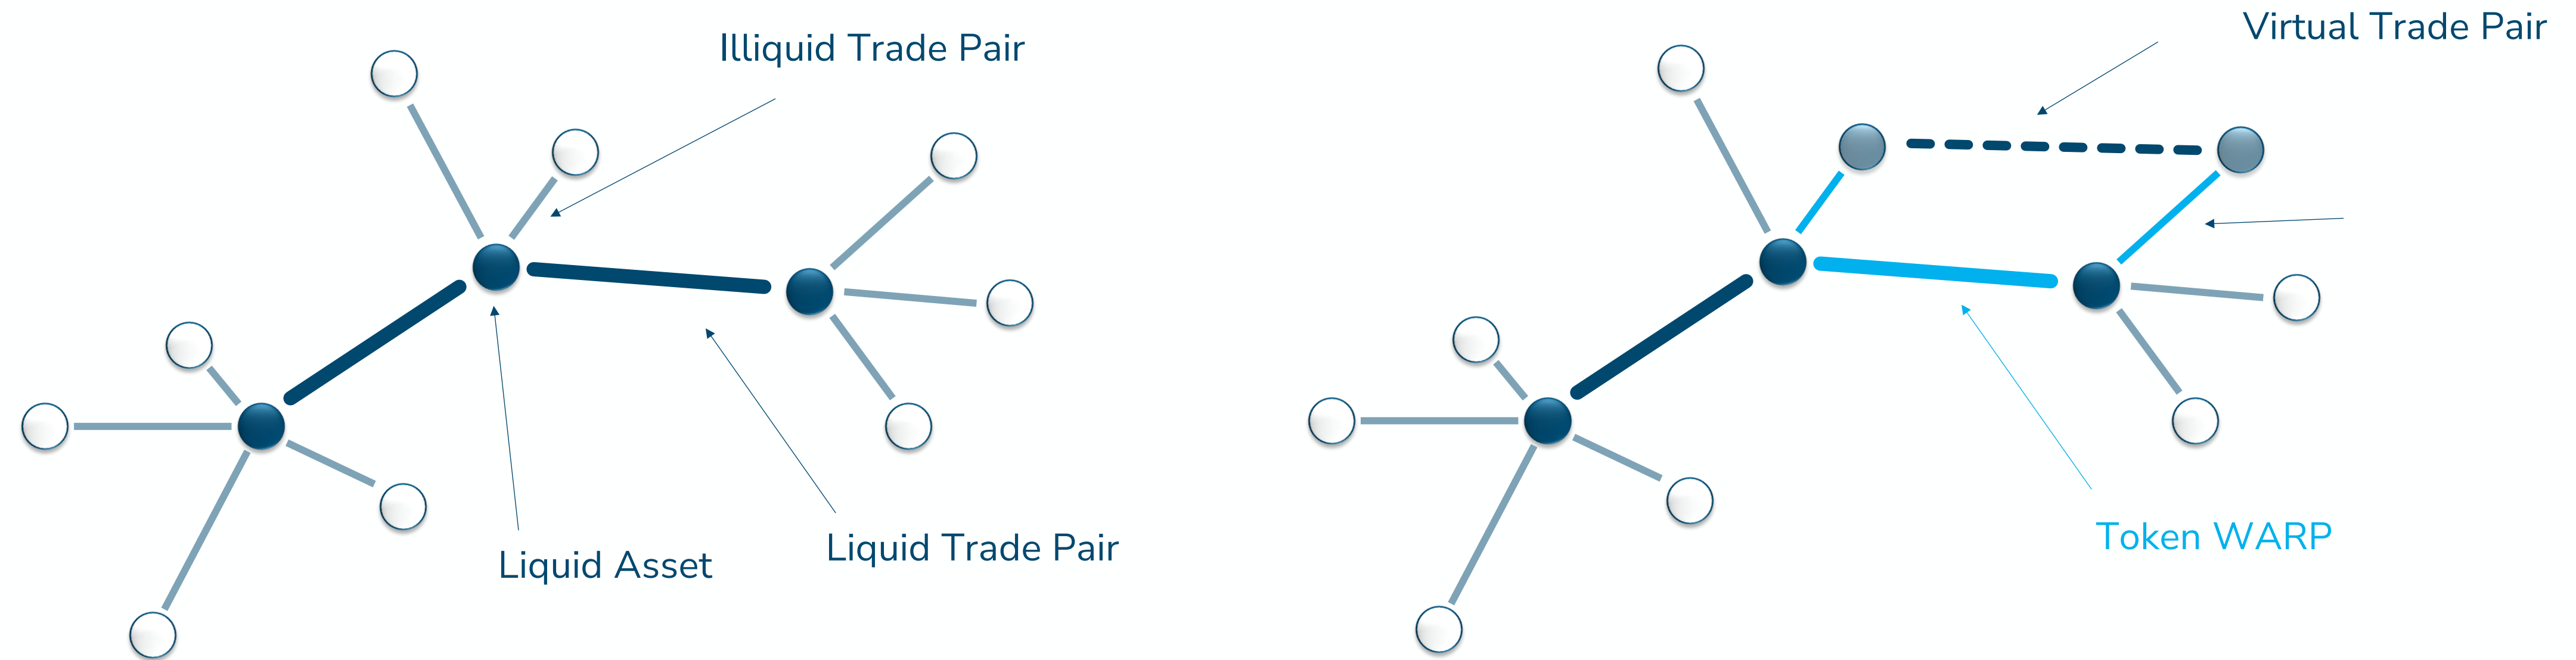

- Unique way of moving values between institutions
- Seamless and atomic transactions
 - No rollback or interdiction
 - Any currency
 - No involvement of the banking system
- Can be used for anything – even commodities

The Token WARP can be used to implement correspondence banking on blockchain and route any kind of value. Even a currency-conversion on-the-fly is possible.

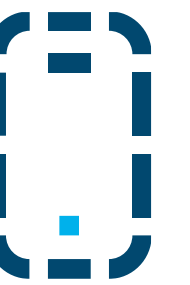

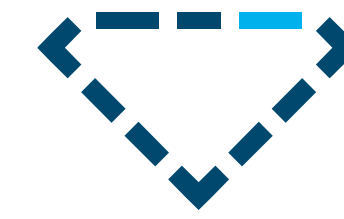

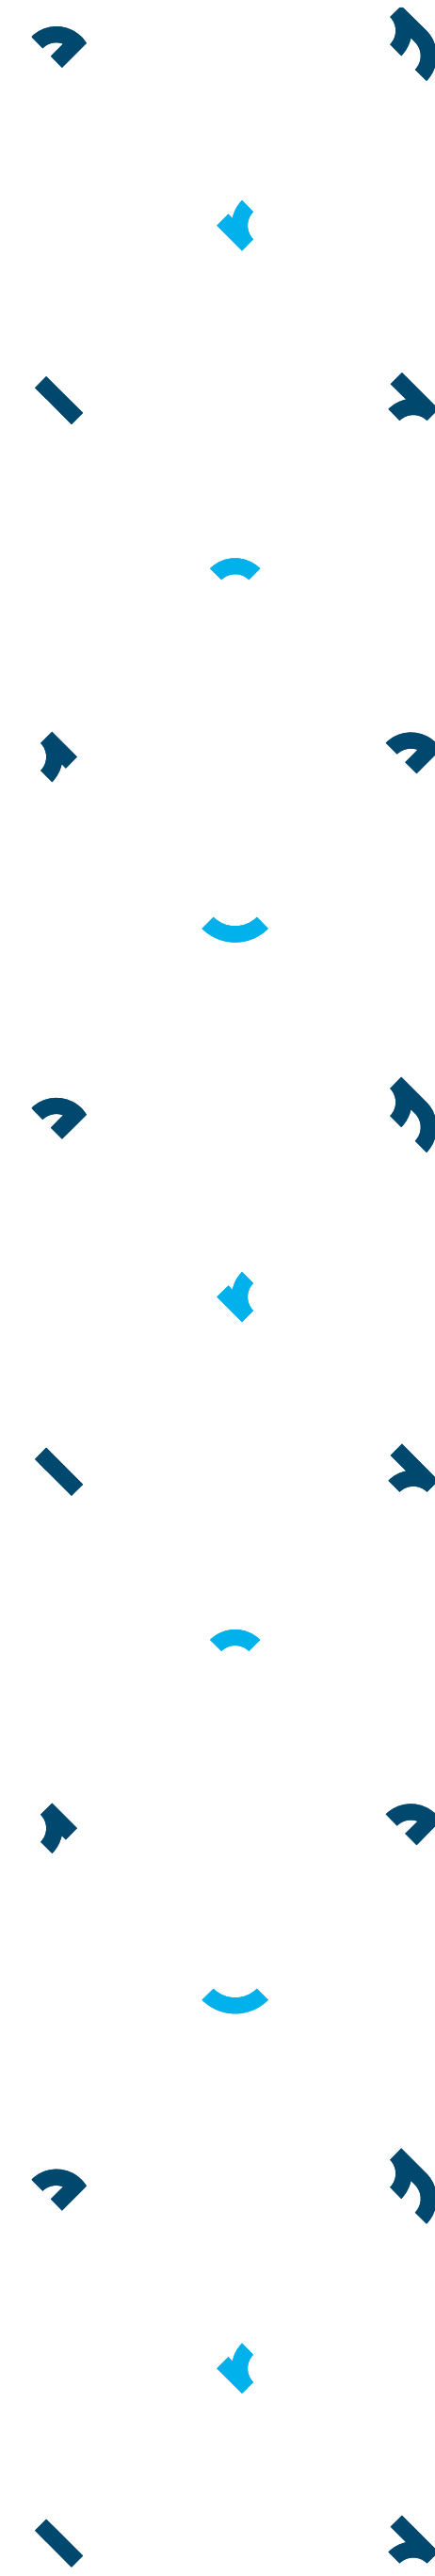

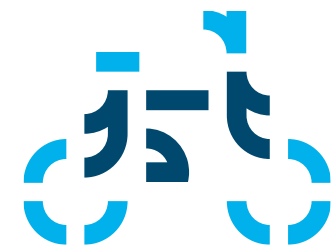

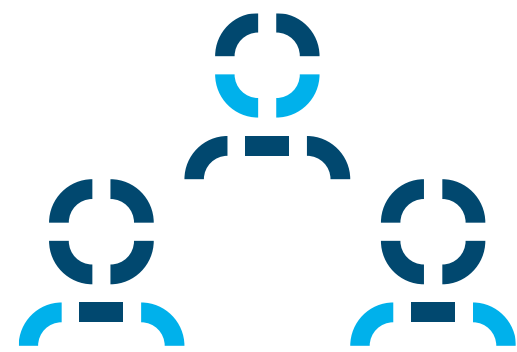

SMART LIQUIDITY ALLOCATION THROUGH LIQUIDITY SHARING

The Token WARP makes assets directly tradable without the need of a dedicated orderbook. Liquidity of trade pairs along the WARP is shared with otherwise illiquid assets.
