

The Governance Platform for Microsoft 365

Make Microsoft 365 Security, Governance, and Administration effortless with CoreView ONE. Detect and remediate misconfigurations and excessive privileges, drive adoption with proper governance, and enhance admin productivity, all while boosting ROI.

The Challenge: Microsoft 365 Complexity

Microsoft 365 is the world's most comprehensive digital workspace and collaboration solution. But with scale comes complexity:

- 18+ Admin Interfaces
- 40+ Workloads
- 5000+ Configuration Types
- 80+ Admin Roles
- Evolving APIs
- Hybrid and Multi-Tenant Orgs
- PowerShell Sprawl
- 3rd Party App Permissions

This complexity makes best practice security, governance, and administration impractical, exposing you to risk, and limiting ROI.

The Solution: CoreView ONE

CoreView ONE pulls APIs across Microsoft 365 to give you unified visibility and control with powerful security, governance, and productivity tools that make best practices effortless.

What CoreView ONE Does for You:

Detect M365 Misconfigurations: CoreView gives you tools to easily establish a configuration baseline and detect drift.

Restore Tenant Configurations in Disaster: Take a snapshot of your configurations and effortlessly restore them when needed.

Find External Users and Unused Licenses: CoreView gives you 60+ OOTB policies to detect risks and auto-remediate them.

Automate User Onboarding and Offboarding: Build custom automations with 150+ OOTB actions and custom PowerShell.

Delegate Secure Access With Virtual Tenant Segmentation: Create custom least privilege roles in minutes.

Get Visibility of 3rd Party and Entra App Permissions: Get rapid visibility of excessive permissions and take action.

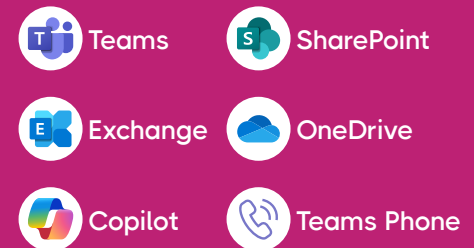

Manage Hybrid and Multi-Tenant Environments: Get unified visibility and control across complex environments.

End-to-end Coverage
