

# Develop, Deploy & Monitor

Your enterprise-grade GenAI applications with state of art accuracy, **in minutes**.

## +27%

*Search accuracy enhancement*

Attested by a **leading global service provider**

## *Scale* 1000X

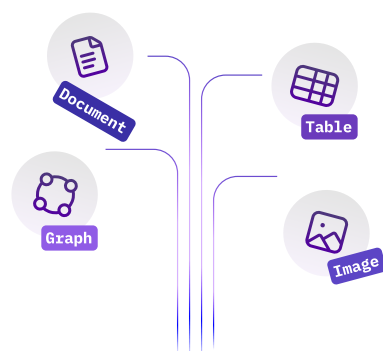

**GenAI at Enterprise Scale:** Powering 1000x Larger Data Workloads Than Competitors.

## *productivity* 5 min

**Time to Value:** From months to minutes  
Time it takes to develop your custom GenAI Application

## Beyond Text

CorvicAI goes beyond text, natively reasoning across **graphs, images, documents, and tables** — connecting insights through multi-structured reasoning

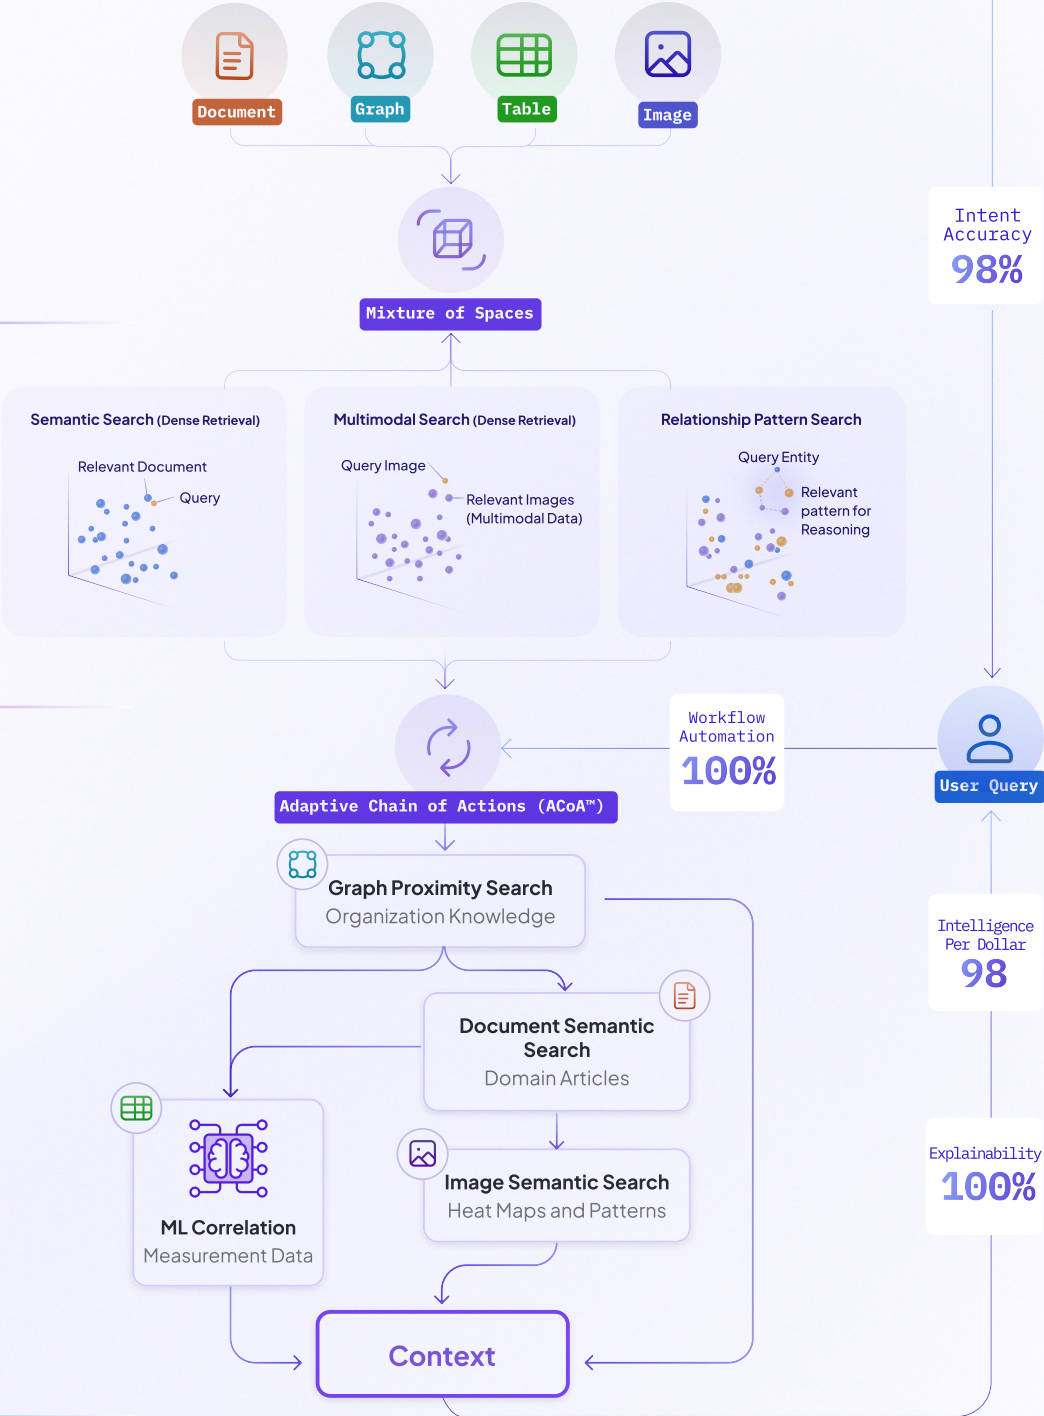

User Query

What are the primary causes of increase in defective units in the final assembly line for Q2 2024?

Enterprise Private Data at Scale

Advanced Automation for Complex Operations on Diverse Data

Agentic Orchestration

1. **Welding Inconsistencies (68%)** – irregular heat distribution and misalignment, particularly during peak production hours.
2. **Software Calibration Errors (20%)** – deviations in torque application in electronic fastening processes. `[robotic_db.sensor_data] +1`
3. **Supplier Material Defects (12%)** – 15% increase in metal fatigue and micro-cracks in chassis components from Supplier X. `[Q2_inspection_reports.pdf]`
