# Smarter Asset Investment Planning Decisions

## Cosmo Tech AI-Simulation Platform

AI Simulation, is a next-generation technology that combines the power of artificial intelligence and simulation techniques. By simulating complex scenarios functions, this revolutionary approach empowers businesses to gain profound insights into the impact of their decisions at all levels of the organization. AI-Simulation technology is the next step forward in the evolution of strategic asset management tools.

## Cosmo Tech Asset Investment Planning Balancing risk, cost, performance

Cosmo Tech Asset is an AI-Simulation Twin that provides three levels of understanding: the description of what exists and what is happening, the prediction of possible futures, and finally the prescription of optimization and action paths. By combining these levels, the Cosmo Tech Asset Simulation Twin helps asset-intensive organizations to move from reaction to anticipation with a unique predictive and prescriptive solution for complex, long-term strategic asset investment planning.

By running unlimited scenarios to anticipate all possible situations, detecting new ways to achieve objectives and automatically obtaining the best plan to reach the goals set, organizations can optimize capital expenditures, improve operational efficiency, reduce total asset management costs all in accordance with decision-making policies and processes that are sensitive to uncertain real-world conditions.

### What our customers are saying

“When we started working with Cosmo Tech, we had no global visibility on the impact of the decisions we were making when developing our strategic plans while facing CAPEX constraints.”

– Expert Leader Industrial System 4.0  
at Renault

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Enterprise grade platform

Fully scalable & flexible platform that lets you maintain an efficient and accurate mapping of real system behavior over time.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
