Azure DevOps to GitHub Migration Menu

coveros

KEY FEATURES

✔ Repository migrations preserve commit history, branches, and pull requests. Minimal downtime during migration.	✔ Individual Repository and Pipeline size are all treated the same. So big repos costs the same as little repo.
✔ Offerings are flexible to accommodate client needs.	✔ The process of removing old repos and consolidating ADO organizations during migration is included.
✔ All services are white glove. Everyone gets treated as royalty.	✔ These are designed to be incremental so you can buy a number of a given item to cover the client's needs. Think Chinese menu (examples below).

Hands-on is more expensive for Repo migrations due to the need to gain access and client management. Hands-on pipeline migration is cheaper due to the complexity of navigating a client through the process and the required skills.

OFFERING	DESCRIPTION	NOTES	STYLE	COST PAID TO COVEROS
1 ADO Repository Migration *250 repos*	Migrate up to 250 repos.	If ADO pipelines are used for CI/CD we assist with making sure everything is updated and working post-migration.	Hands-on	**$8500**
2 ADO Repository Migration *250 repos*	Migrate up to 250 repos.	If ADO pipelines are used for CI/CD we assist with making sure everything is updated and working post-migration.	Hands-off (Advisory only)	**$5000**
3 ADO Pipeline Migration *250 pipelines*	Migrate up to 250 pipelines from ADO to GitHub actions/workflows	Migrates and converts ADO pipelines to GitHub Actions workflows. Ensures continuity of CI/CD processes.	Hands-on	**$22,500**
4 ADO Pipeline Migration *250 pipelines*	Migrate up to 250 pipelines from ADO to GitHub actions/workflows	Migrates and converts ADO pipelines to GitHub Actions workflows. Ensures continuity of CI/CD processes.	Hands-off (Advisory only)	**$28,000**

EXAMPLES

Client 1:	260 repos in a single Organization. Want hands-on, repository migration.	**#1 (1x) = $8500**
Client 2:	Multiple organizations. 20 repos, 300 repos, 80 repos. Want hands-off advisory repository migration.	**#2 (2x) = $10,000**
Client 3:	200 repos in a single organization, 200 pipelines. Want hands-on, repository and pipeline migration.	**#1 (1x) + #3 (1x) = $31,000**
