What's New

Setup

Press  icon to get more information about the connection parameters.

Obtain data

Use [REST Source](#) component to get data from service resources.

Insert data

Use [REST Destination](#) component to insert data into service resource.

Manage remote files and directories

Use [File Transfer Task](#) to manage remote files and directories.

Configuration

Service

Base URL address: <https://exchange-rates-api.oanda.com/v2>.

Authentication

APIKey

The authentication uses a *parameters-based authentication*.

The authentication has the following user-defined parameters:

- **APIKey:** Required. Specify API key.

The following request parameters will be automatically processed during the authentication process:

- **Authorization:** `{{connection.user.APIKey}}`

Documentation: <https://developer.oanda.com/rest-live-v20/authentication/>.
